I was facing one of Canada's top players in this game: the talented GM Razvan Preotu. I have no doubt that Preotu is a highly skilled player, but, at least in my encounters with him, he plays in a provocative and perhaps "greedy" manner that has not boded well for him. When this game was played, I had been an IM for about a year, and he had a similar tenure as a GM. --- **1.d4 Nf6 2.Nc3 d5 3.Bf4 a6 4.e3 h6 5.Nf3 e6**

'Inf 50/(397) Summerscale & Johnsen : 'RR: 'Inf 50/(397)'" This chapter will demonstrate play in the middlegames and endgames you can expect to see arise from our openings. It's fairly similar to the Model Games chapter, but here we will start commentary a ways into some of my games, so I can provide first-hand analysis of how a strong player thinks in these situations. The opening will be presented so you know how we got there. Then I'll give you a taste of how to press! Along with wriggling out of nasty positions, one of my talents is winning level endings. It's obviously very tough against experienced over-2000s and Masters, but I've had great success against mid-range players (1600-2000) . This chapter is the nucleus of this course -

it's about more than just openings! **1.d4 Nf6 2.Nc3 d5 3.Bf4 g6 4.e3 Bg7 5.Nf3 c6**

[Another plan is 5.Nf3 0-0 6.Be2 It seems passive for White, but it was played by Magnus Carlsen recently, so it deserves attention. c5 Once again, this is the most natural continuation.

A) 7.dxc5 This is probably the best option. Nbd7!? This should be preferred *(over 7...Qa5)*

A1) 8.Nxd5 is also possible, since after Nxd5 9.Qxd5 Bxb2 White can sacrifice an exchange with 10.0-0 Bxa1 11.Rxa1

White definitely has compensation for the sacrificed material. The most practical solution is to give back the exchange with Qa5 12.Bh6 Qxc5 13.Qb3 *(13.Qxc5?! Nxc5 14.Bxf8 Kxf8∓)* 13...b6 14.Rd1 Nf6 15.Bxf8 Kxf8= as played in the game 0-1 (31) Sriram,J (2388)-Ganguly,S (2650) Bhubaneswar 2018;

A2) 8.0-0 Nxc5 9.Be5 b6!? is a nice pawn sacrifice. After 10.Bxf6 Bxf6 11.Qxd5 Bb7 12.Qxd8 Rfxd8⩱ and Black has a fantastic compensation thanks to the bishop pair. B) 7...Ne4!? The most aggressive option. The idea is to discourage white knight from retreating to c3.

B1) 8.c3

f6! This is the best plan for Black. The e5-break can be played without additional preparation since f2-pawn is hanging. *(* The idea behind 8. c3 is that after *8...c6 9.Na3 Qb6* he can protect the b2-pawn with *10.Qb3)* 9.Be2 c6 10.Na3 e5 White cannot take on e5, so 11.Bh2 is forced. Richard Palliser,Kitty Kat: 'merely gave Black good counterplay in Madaminov-Shimanov, Internet (blitz) 2021.']

6...Bd7

[A new move for us and a very sensible one, Eric having long ago pointed out that 6...Bf5?! 0.94/19 Richard Palliser,Kitty Kat: '6...Bg4-d7 0.09' 7.Nb5! Na6 Richard Palliser, Kitty Kat: ' Inhibits Nb5-c7+.' 8.c3 g6?! 1.49/21 *(⩲8...h5* 0.76/19 Richard Palliser,Kitty Kat*)* 9.Qe2! was rather good for White in Chernyshov-Overbeck, Pardubice 2010.]

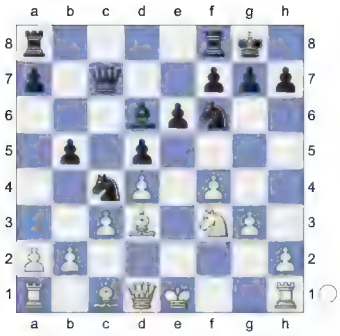
7.Nb5 Bxb5 8.Bxb5+ Nc6

And so White has acquired the bishop-pair, but he would likely prefer not to have a pawn on f3 here and Black should be fine, enjoying a solid position and the typical queenside counterplay such Exchange Caro structures tend to offer. **9.c3 e6 10.Be3!?**

[A new move, getting out of the way of ...Bd6. Indeed, I'm fairly confident van Foreest would have met 10.Ne2 with Bd6 , as actually occurred in a game last year: 11.Bg5 Qb6 12.a4 a6 13.Bd3 Qc7 14.g3 was Miladinovic-Iordachescu, Internet (blitz) 2020, and now maybe Na5!? might have been tried, and if 15.b3 h6 16.Be3 h5!? with a complex struggle ahead.]

10...Bd6

11.f4 The point of the young Russian's play becomes clear. White will establish his traditional grip on the e5-square after all. Can Black use his small lead in development to create some counterplay? **11...Qc7 12.g3 0-0 13.Nf3 Na5!** Yes, is the answer, as again we see this thematic knight manoeuvre. Dare I say with ...a6 and ...b5 on the way, as well as the hole on e4, that van Foreest was already allowing himself too dream of reaching '+4' or at least of playing for a win as Black? **14.Bd3 Nc4 15.Bc1!?** Keeping the two bishops, but while White will be able to untangle with b3 and Bb2/Bd2, it's pretty clear that he cannot hope to be better once Black activates his second knight. **15...b5**



16.0-0 Ne4

[Very natural and tempting, but there was also 16...Be7!? to enable the knight on c4 to retreat to d6.]

17.Qe2 f5

[17...b4!? is a typical Stockfish idea, but it's likely correct that Black has full compensation for the pawn after 18.Bxe4 dxe4 19.Qxe4 bxc3 20.bxc3 Nb6 , and if 21.Ng5 g6 followed by ... Rfc8.]

18.b3! Nb6?!

[Clearly 18...Nxc3? 1.19/24 Richard Palliser,Kitty Kat: '18...Nc4-a3 0.24' 19.Qxe6+ Kh8 20.Bxf5 Richard Palliser,Kitty Kat: '!' Rae8 21.Qd7 would not be wise,]

[and 18...Na3!? feels a little hard to believe, although it may well be playable,]

[but there was certainly 18...Na5! , as now the potentially pressure against b3 keeps White's queenside ambitions in check after 19.Bb2?! *(White should probably prefer to head for the messy and roughly balanced alternative that is 19.Bxb5 Nxc3 20.Qxe6+ Kh8 21.Bd7)* 19...a6 .]

19.Bd2?!

[Returning the favour, but it's not immediately obvious why the engines are clamouring for 19.Bb2! . Doesn't the bishop just bite on granite here? The answer is revealed after a6 20.a4! bxa4 21.c4! when Black just seems to be in trouble. Clearly c4-c5 is threatened and even Richard Palliser,Kitty Kat: 'when Black just seems to be in trouble. Clearly c4-c5 is threatened and even. Threatens to win with c4-c5.'

A) 21...axb3? 0.71/21 Richard Palliser,Kitty Kat: '21...Bd6-b4 0.19' 22.c5 Bxc5 1.32/21 *(⌓22...Be7* 0.72/20 Richard Palliser,Kitty Kat*)* 23.Rfc1 just leaves White winning a piece and most likely on the dark squares too;

B) 21...Bb4! 22.c5 Nd7 23.bxa4 is likely in White's favour with ideas of Ng5 very much in the position.]

19...a6 20.Rac1

[Now 20.a4!? -0.42/21 Richard Palliser,Kitty Kat: '20.Rf1-b1 -0.06' bxa4 21.c4! isn't quite so good as Black has Richard Palliser,Kitty Kat: 'isn't quite so good as Black has. Black must now prevent c4-c5.' axb3! 22.c5 Bxc5 Richard Palliser,Kitty Kat: '!'

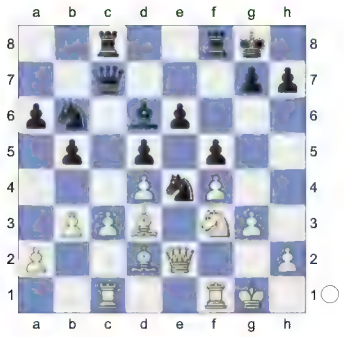
26.Qb2! Qc3 27.Bd4 Qxb2 28.Bxb2 a5 when Black is rather weak on the dark squares, but it is four pawns for the piece and I'm happy to trust the engines that Black is most likely OK.]

20...Rac8



Ruling out c3-c4. Black is certainly now OK and Esipenko is quick to switch focus. **21.Ne5 Qe7 22.g4?!** -0.72/24

[Very ambitious, even if White needed to win and had already taken some positional liberties. 22...Nxd2 23.Qxd2 fxg4?! -0.23/19

3.Bf4 e6 4.Nb5

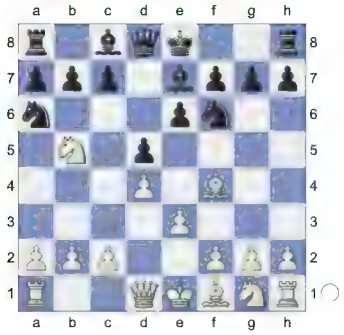
[The topical move, although I still suspect many club players will prefer

4.e3 , as covered, or so I'm told, in Simon Williams's forthcoming repertoire for Everyman Chess.]

4...Na6

[Erigaisi has also faced 4...Bb4+!? 5.c3 Ba5 and following 6.e3 a6 7.Na3 Nbd7 8.Nf3 0-0 White wasted no time in regrouping with 9.Nb1 , which led in Erigaisi-Dubov, Internet (rapid) 2022, after c5!? 10.dxc5 Bc7 11.Bxc7 Qxc7 12.b4 b6 13.cxb6 Nxb6 14.Be2 e5 to a position where the engines slightly prefer White, but from a practical perspective at least it would be surprising if Black didn't have decent play for his pawn.]

5.e3 Be7



6.h4!?

[Immediately! Only in April's update did we see the no less striking and closely-related 6.Nf3 0-0 7.h4!? c6 8.Nc3 c5 in Van Foreest-Giri, Oslo Esports Cup (rapid) 2022, where I suspected that White should now go 9.h5!? .]

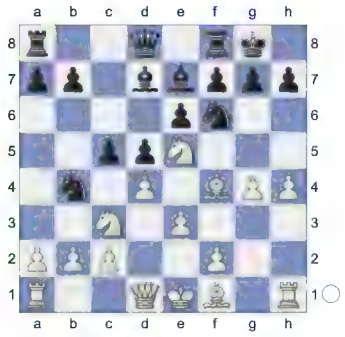
6...c6 7.Nc3 c5 8.Nf3 Play now looks very likely to transpose to our previous note, but actually it never does as Harsha now elects not to castle. The position is equal. **8...Bd7!? 9.Ne5** A thematic leap, not least when Black's knight is on the rim rather than c6.

9...Nb4?!

[Heading for c6 is sensible, but also rather slow. Black needed to disrupt with 9...Qb6! when 10.Qd2 *(10.Nxd7 Nxd7 11.Bb5* is also possible, but here Black has at least *Rd8)* 10...Rc8 remains pretty unclear and certainly I wouldn't feel too confident as White going 11.0-0-0 here, *(*with *11.Rh3!?* perhaps a good way to cover across to c3 and so safely continue to swap b2 for b7. *)*]

10.g4! Another thematic move and one which seizes the initiative. **10...0-0** 0.64/22

[10...Qa5= 0.19/18]



Brave, but at least this way the knight obtains a retreat square on e8. **11.dxc5±** This wasn't essential, but it certainly doesn't do White any harm to take the options of ...cxd4 and ...c4 off the table. White is more active. **11...Bxc5 12.g5 Ne8 13.h5**

[13.Qd2 simplifies Nc6 14.0-0-0 Bd6 15.Nxd7 Qxd7 16.h5]

13...f6?! 1.12/19

[An understandable bid for freedom and to fight back on the kingside, but it seems that nothing too awful should be happening to Black after 13...Bd6 , and if 14.g6 0.13/20 *(14.Nxd7 Qxd7 15.a3 Nc6 16.Qd2* followed by 0-0-0 should at least favour White*; 14.Nxd7±* 0.49/21 *Qxd7 15.Bxd6 Nxd6 16.a3)* 14...fxg6= 15.hxg6 h6

MPL Indian Chess Tour #2 (5.8) 03.06.22

[Richard Palliser]

1.d4 Nf6 2.Nc3 d5 3.Bf4 e6 4.Nb5

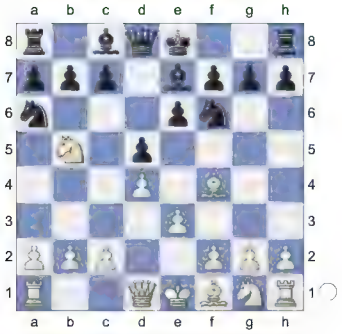
[The topical move, although I still suspect many club players will prefer 4.e3 , as covered, or so I'm told, in

Simon Williams's forthcoming repertoire for Everyman Chess.]

4...Na6

[Erigaisi has also faced 4...Bb4+!? 5.c3 Ba5 and following 6.e3 a6 7.Na3 Nbd7 8.Nf3 0-0 White wasted no time in regrouping with 9.Nb1 , which led in Erigaisi-Dubov, Internet (rapid) 2022, after c5!? 10.dxc5 Bc7 11.Bxc7 Qxc7 12.b4 b6 13.cxb6 Nxb6 14.Be2 e5 to a position where the engines slightly prefer White, but from a practical perspective at least it would be surprising if Black didn't have decent play for his pawn.]

5.e3 Be7



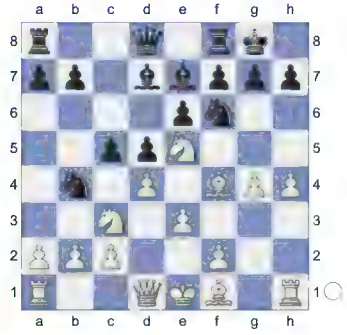
6.h4!?

[Immediately! Only in April's update did we see the no less striking and closely-related 6.Nf3 0-0 7.h4!? c6 8.Nc3 c5 in Van Foreest-Giri, Oslo Esports Cup (rapid) 2022, where I suspected that White should now go 9.h5!? .]

6...c6 7.Nc3 c5 8.Nf3 Play now looks very likely to transpose to our previous note, but actually it never does as Harsha now elects not to castle. **8...Bd7!? 9.Ne5** A thematic leap, not least when Black's knight is on the rim rather than c6. **9...Nb4?!**

[Heading for c6 is sensible, but also rather slow. Black needed to disrupt with 9...Qb6! when 10.Qd2 *(10.Nxd7 Nxd7 11.Bb5* is also possible, but here Black has at least *Rd8)* 10...Rc8 remains pretty unclear and certainly I wouldn't feel too confident as White going 11.0-0-0 here, *(*with *11.Rh3!?* perhaps a good way to cover across to c3 and so safely continue to swap b2 for b7. *)*]

10.g4! Another thematic move and one which seizes the initiative. **10...0-0**



Brave, but at least this way the knight obtains a retreat square on e8. **11.dxc5** This wasn't essential, but it certainly doesn't do White any harm to take the options of ...cxd4 and ...c4 off the table. **11...Bxc5 12.g5 Ne8 13.h5 f6?!**

[An understandable bid for freedom and to fight back on the kingside, but it seems that nothing too awful should be happening to Black after 13...Bd6 , and if 14.g6 *(14.Nxd7 Qxd7 15.a3 Nc6 16.Qd2* followed by 0-0-0 should at least favour White*)* 14...fxg6 15.hxg6 h6 .]

14.gxf6 Nxf6 15.Rg1

[Eyeing g7 while getting off the h1-a8 diagonal. This makes a lot of sense, although even after 15.Qd2 d4 16.exd4 Bxd4 17.h6]

[and 15.Qe2!? d4 16.exd4 Bxd4 17.0-0-0! White should be doing quite well.]

15...Be8!

[Good defence. Erigaisi's idea against

15...d4 was presumably 16.h6! g6 *(16...dxc3? 17.Rxg7+ Kh8 18.Nxd7 cxb2 19.Rb1 Qa5 20.Bc4!* seems to be winning for White*)* 17.a3 , and if dxc3 18.axb4 Bxb4 19.b3 when White is in control and menaces a rather large sacrifice on g6.]

16.Bh3?

[Losing the thread. White should have settled for simply 16.h6 g6 17.a3 Nc6 and only then 18.Bh3 , thereby preserving control and a definite plus.]

16...Nxh5!

[16...Bxh5!? 17.Bh6 g6 was also promising.]

17.Bxe6+ Kh8 18.Nxd5 The point of White's play, but his huddle of centralised pieces creates a strange impression and, moreover, they are vulnerable. **18...Nxd5**

[18...Rf6! would have been hard to spot in a rapid game, but after 19.Nxf6 *(*or, and importantly, *19.Bg5 Rxe6! 20.Bxd8 Rxd8* when Black will pick up a third piece as well as the initiative for the queen*)* 19...Qxf6 there wouldn't have been anything for the king on h8 to fear, in contrast to which its counterpart would very much have felt the heat.]

19.Qxd5 Nxf4 20.exf4 Bxf2+??

[Tempting, but flawed. Instead, with 20...Qe7 21.Nd3 Bd6 22.0-0-0 Bxf4+ 23.Kb1 Bc6 Black would have been slightly for choice with his bishops and/or pressure against f2.]

21.Kxf2 Qh4+ 22.Rg3

[Or even 22.Kg2! Rxf4 23.Raf1 Qg5+ 24.Kh2 when the bishop can drop back to h3.]

22...Rd8?

[22...Qh2+ 23.Qg2 Rxf4+ was a better try, if still rather good for White after 24.Rf3 Rxf3+ 25.Nxf3 Qc7 .]

23.Nf3! Rxf4

[The black queen suddenly lacks a great square in view of 23...Qf6 24.Qe5]

[and 23...Qe7 24.Qe5 followed by Rh1.]

24.Rh1 It's all over bar a few final desperate kicks. **24...Qxh1 25.Qxd8 Rf8**

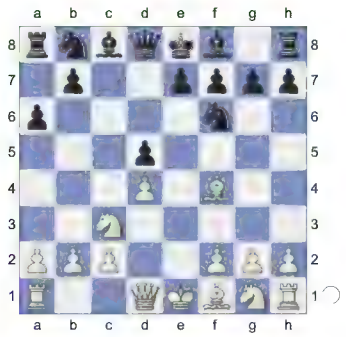
' **1.d4** Kitty Kat **1...d5 2.Bf4 Nf6 3.Nc3 c5 4.e3 cxd4 5.exd4 a6**

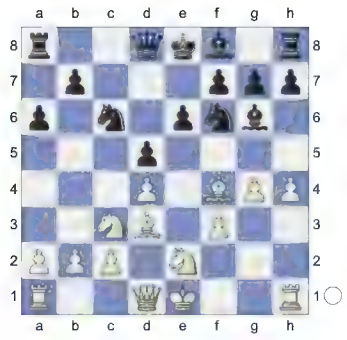
[5...Nc6?? This huge mistake has been played also by very strong players. But now White is immediately winning: 6.Nb5! That's why the move 5...a6 was so important.]



Black wants to develop his knight to c6, but it's very important first to don't allow

the Nb5 idea. **6.Bd3 Nc6** We have entered a hybrid version of the Caro-Kann Exchange variation (e4 c6 d4 d5 exd5 cxd5 Bd3) . In this line, it's generally less common to develop the knight to c3, as the move c2-c3 is considered more harmonious with the pawn structure. However, in this particular situation, developing the knight to c3 opens up the possibility of a rapid queenside castle, offering a dynamic choice. The key point here is that Black has played a7-a6—a move that is useful in this structure but typically made after completing development. As always, there are pros and cons to consider. **7.Nge2** The move 7.Nge2 makes significantly more sense than 7.Nf3 because, in the event of the typical 7...Bg4, White can now respond with 8.f3. This sequence allows White to maintain better control over the center and avoid potential complications that could arise from the immediate pressure on the knight after 7. Nf3. **7...Bg4** This is by far Black's most common continuation. The reason is that in the Exchange Caro-Kann, Black typically aims to develop the light-squared bishop ahead of the pawn chain. However, in this specific position, I believe the move 7...e6 is stronger for Black. We will discuss this in more detail when we analyze my game against Ponomariov. **8.f3** Kitty Kat: 'The position is equal.' **8...Bh5 9.h4** You can also start with 9.g4 Bg6 10.h4, and it will lead to the same. **9...Bg6 10.g4 e6**

(Diagram)



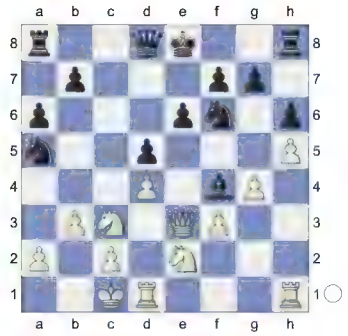
11.h5 Bxd3 12.Qxd3 We can say that this is the starting position of the 7...Bg4 variation. Regardless of the move order, this position is typically reached in the end. transposes **12...h6** Black usually plays this move to prevent White's ideas of h5-h6 or g4-g5. While it's not a forced move, many players feel psychologically more secure after making it, as it limits White's options and provides a sense of control over the position. **13.0-0-0 Bd6** This is Black's most popular move, but I'm not convinced it's the best approach. In my opinion, exchanging the dark-squared bishop favors White for two reasons: the e5 square becomes more vulnerable, and Black loses the bishop's potential involvement in a future queenside attack. In the next game I played against Mikheil Mchedlishvili, we will see what happens if Black chooses not to play Bd6. **14.Qe3** Usually, e3 is a good square for the queen, and I often like to play this move in these structures. However, in this particular position, a move like 14.Kb1 would have been more useful.

[14.Kb1! This move is always useful and it was better to start with it. Qc7 Black forces the bishop exchange, but he is losing a tempo. *(14...Na5 15.b3±* Now Ba3 doesn't come with check. *Ba3* playing anyway Ba3 would be a huge mistake for Black,

because of *16.g5±; 14...Bxf4 15.Nxf4 Qd6 16.Qe3 0-0-0 17.Nd3±* Darini-Tregubov 2016.*)* 15.Bxd6 Qxd6 16.Nc1 We are ready to continue with Nb3 or with Qe3-Nd3. 0-0-0 In these positions, Black usually castles long. On the other hand, we have a good space advantage on the kingside, and castling short would be particularly dangerous. 17.Qe3!? We can play this move if we want to place our knight to d3. *(17.Nb3±* We can continue with Na4-Nac5.*)* 17...Kb8 If 14.Kb1 was a useful move for White; logically, also, Kb8 is a very useful move for Black. 18.Nd3 I have reached this position in two online blitz games. Nd7 This is a very logical move, as Black's knight from d7 controls both the c5 and e5 squares. *(18...Rc8 19.Na4!? Nd7 20.Rhe1±* We can continue with Nac5 and our position is slightly better.*)* 19.f4 I am preparing Ne5. f6 Black takes control of the e5 square, but now we can double our rooks on the 'e' file, pressuring Black's weak e6 pawn. 20.Rhe1 Rhe8 21.Re2± You will need to play slowly these positions, but White has a more pleasant game.]

14...Na5! 15.b3 Kitty Kat: ' Dodges Na5-c4' **15...Bxf4?!** 0.56/20

[15...Ba3+± 0.05/20 After this move Black immediately achieves a great position: Kitty Kat: '=' 16.Kb1 Nc4!! 17.Qf2 *(17.bxc4* Kitty Kat *Qb6+ 18.Nb5 axb5)* 17...Nh7= Black is ready to play Qa5 followed by Rc8, and White doesn't have a clear plan. According to the engine, the best line is 18.Ka1 Bb2+ 19.Kb1 Ba3, which leads to a draw by repetition.]



If Black exchanges on f4, we should be immediately pleased because, as previously mentioned, the exchange of the dark-squared bishops is favorable for us. Additionally, it allows us to activate our knight on f4 with a gain of tempo, from where it is well-positioned to be transferred to d3 and then to e5. **16.Nxf4** Kitty Kat: ' ± ' **16...Rc8?!** While this approach might have been effective if Black still had his dark-squared bishop, now this move is dubious because Black will be unable to create a serious attack against our king, and at the same time, castling long is no longer a viable option.

[16...Qe7! It was a better continuation for Black, with the idea to continue with the long castle. 17.Nd3 0-0-0 18.Kb2±]

17.Nce2 It's not a bad move, but it's less effective compared to 17.Na4.

[17.Na4! Qd6 18.Kb1 0-0 19.Nd3± Our knights are perfectly placed: they are looking at the c5 and e5 squares!]

17...Qd6 18.Nd3 0-0 19.Kb1 As I have already explained to you, the move Kb1 is always useful. **19...Qa3** 1.10/21 My opponent attempts to initiate counterplay on the queenside. While this approach might work from a practical standpoint, objectively, it is a mistaken treatment of the position. White's initiative on the kingside has far

greater potential.

[19...Qb6!± 0.57/21 Kitty Kat]

20.c3! This move is necessary because Black was threatening 20...Rxc2. Kitty Kat: '±'

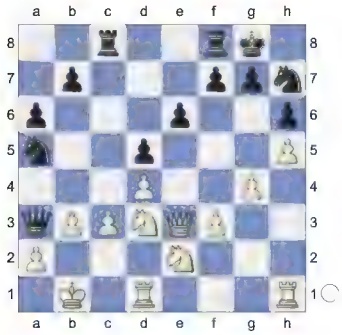
20...Nh7!



We have already seen in the 3...Bf5 section that Black's knight on h7 can be a very strong defender. In this specific case, however, it doesn't provide sufficient defense for Black's king, and White should be able to launch a quick attack. Nevertheless, it was still the best continuation for Black. **21.Rd2?!** 0.34/19 By playing this prophylactic move, which is good in itself, I lost the momentum and missed the opportunity to immediately punish my opponent's incorrect handling of the position.

[21.f4! 0.79/20 I'm not trying to make excuses, but it was the last round of a challenging tournament for me, and the game was played in the morning. Moreover, I have a deep respect for my opponent, which is why I didn't consider that a direct attack with f4-g5 could be so effective. However, after 21.f4! Black's position is already lost. There's no need for extensive analysis— we'll follow up with g5 and Rg1, and there won't be much Black can do to defend. Kitty Kat: ' ±' Kitty Kat: ' g4-g5 is the strong threat.' [8...Be7! This is how the modern engine is playing this position. The idea is that after 9.Bd3 Black can just ignore the Bxg6 threat, and play 0-0! The point is that after 10.Bxg6 fxg6 Back's king will be very safe on h7, and Black can also use the open 'f' line for his rook on f8. Black's plan in

To a large extent the presence of strong grandmasters on the White side can be explained by a desire to create original positions early on, when both sides will be on their own resources. Pragg had just become a GM 15 days ago at the age of 12 years 10 months and 13 days. So the pressure of achieving that title was off his shoulders. But at the same time I think this was another pressure situation because people wanted to know how would he fare against one of the best

rapid players in the business. That being said, even Wesley So would have faced the pressure because he was up against such a young boy, who was not even a teenager. ANSWER: White definitely wants to castle on the queenside as long as he is safe there. At the moment he does not have enough going on the kingside and a premature queenside castling might be detrimental to his king's health. Thus 14 a4 secures the knight on b5 and is actually a waiting move as well. White may want to forgo castling and put his king on d2 or f2 instead. 1.d4 d5 2.Nc3
[Seemingly hinting at a Veresov, but of late White has been experimenting with much more of a London-like follow-up. It's very hard though to believe that this isn't inferior to 2.Bf4 , which continues to receive Kamsky's seal of approval. He recently faced Nf6 3.e3 c5 4.c3 Nc6 5.Nd2 e6 6.Ngf3 Bd6 7.Bg3 0-0 8.Bd3 b6 9.Ne5 Bb7 and then switched to 10.0-0 *(10.f4 Ne7 11.Qb1* was once mentioned by Eric and was White's choice in the earlier Kamsky-Dreev, Khanty-Mansiysk (blitz) 2013, where *Ng6 12.0-0 Nh5 13.Be1 cxd4 14.cxd4 Nf6 15.a3 Rc8 16.h3 Qc7* was very solid for Black*)* 10...Rc8 11.f4 Ne7 (again we see this important defensive resource) 12.Qb1!? *(* Kamsky evidently likes to generate a bit of pressure along the diagonal so White had earlier preferred *12.Qf3* , albeit without showing anything particularly effective after *Ng6)* 12...Rc7 13.Bh4 Ng6 14.Bg5 Qa8! 15.f5? *(15.Bxf6 gxf6 16.Ng4* is more critical, but White won't manage to get f4-f5 in and *f5 17.Nf6+ Kh8 18.Qd1 Be7 19.Nh5 Rg8* looks satisfactory enough for the second player*)* 15...Nxe5 16.dxe5 Bxe5 17.Qe1 h6 , but had evidently made a bad miscalculation and eventually went down in Kamsky-Korobov, World Team Championship, Antalya 2013.]

2...Nf6 3.Bf4 e6
[Hardly terrible with White's knight on c3, but there's no need to block in the light-squared bishop. Moreover, Eric had already shown that 3...c5! 4.e3 *(4.e4!? Nxe4 5.Nxe4 dxe4* led to a rapid white win in Boguszlavszkij-Wang Xinyu, Budapest 2012, but this shouldn't be too scary for Black - see the Archive*)* 4...cxd4 5.exd4 a6 is a simple and effective method for Black. Jonny Hector has been testing this line as White of late, but I dare say that even he would have to admit that White's queen's knight is misplaced in this unusual type of Exchange Caro. Moreover, even 6.Nf3 Nc6 7.Ne5 Bf5 8.g4! Nxe5 9.gxf5 Nc6 10.Qd3 g6 11.0-0-0 Bg7 12.h4 Qa5 didn't seem anything more than unclear in Hector-Andersen, Vaxjo 2013, although the highly-creative Swedish Grandmaster did go on to triumph.]

4.e3
[Jobava plays a la the London proper. Hector has tried 4.Nb5 , but after Na6 5.e3 Be7 6.Nf3 *(6.c4 0-0 7.Nc3 c5* can hardly be a bad version of a QGD for Black*)* 6...0-0 7.h3 Bd7 8.Ne5 Be8!? 9.a4 c6 10.Nc3 c5 11.Bxa6 bxa6 12.0-0 Qb6 Black enjoyed decent counterplay in Hector-Blomqvist, Vaxjo 2013, which was played after Hector-Andersen.]

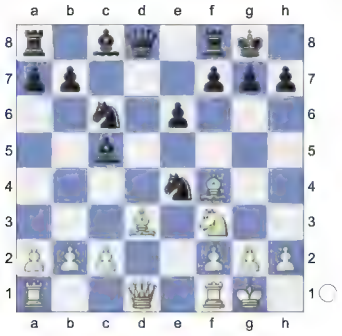
4...Bd6 5.Nf3 0-0

[Malakhov is content to develop simply rather than increase White's grip on e5, but even 5...Bxf4 6.exf4 c5 should be fine for Black, especially as 7.dxc5 0-0 8.Bd3 Qe7 9.0-0 Qxc5 10.Ne5 Nc6 11.Qf3 d4! doesn't seem to lead to anything too amazing for White.]

6.Bd3 c5 7.dxc5

[This followed by the classic Colle central break makes good sense. More aggressive souls might want to go 7.Ne5 , but after Nc6 8.0-0 *(and not, of course, 8.Ne2?? c4)* 8...a6 I'm not too sure what White's doing and ...Qc7 is on its way.]

7...Bxc5 8.0-0 Nc6 9.e4 The only consistent follow-up, if surprisingly a novelty according to the all-seeing oracle. **9...dxe4 10.Nxe4 Nxe4**



11.Bxe4 The opening hasn't gone too badly for Jobava. Indeed, surprise is rarely a bad factor in a rapidplay game. **11...Qf6 12.Bg5?**

[However, this is extremely optimistic and basically just loses a pawn. Correct was the sober 12.Qc1 when e5 would have led to rough equality after, say, 13.Bg5 Qd6 14.c3 Be6 .]

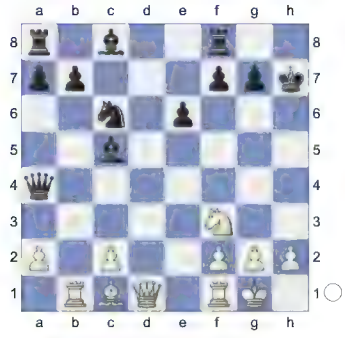
12...Qxb2 Malakhov is not an easy man to bluff. **13.Rb1**

[Alternatively, 13.Qd3 h6 14.Bh4 Qa3 and White's compensation is negligible.]

13...Qa3 14.Bc1!?

[White wants to clear the g5-square, but his priority should really have been a rook lift. After 14.Rb3 Qa4 15.Qd3 h6 16.Bf4 I don't entirely believe in White's attack, but at least this way Black would have had to proceed sensibly with something like Be7 *(and not 16...Rd8? 17.Bxc6! .)*]

14...Qa4 15.Bxh7+ This was presumably the point behind his last move. Jobava likes to move very quickly, but sometimes such a practical approach can have its downsides. **15...Kxh7**



16.Ng5+ Kg8 17.Qh5 This would be mate, but White has forgotten to ask himself a question one must always ask before making a Greek Gift sacrifice: can Black bring a queen or bishop to the b1-h7 diagonal to defend? **17...Qxc2** Embarrassingly for Jobava, the answer is yes. The game is up. **18.Rb3 Qg6 19.Qh4 e5**

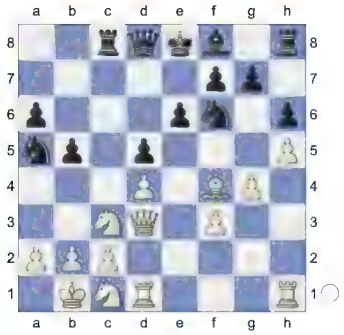
In a previous game, we saw how Black handled 13...Bd6. Now let's explore what happens if Black avoids the bishop exchange, a more strategically sound approach. **13...Rc8**
[13...Be7 13...Be7 is an alternative. This move isn't necessarily better or worse than 13...Rc8, but we'll focus on Rc8 in this game and analyze Be7 in the theoretical section.]
14.Kb1 A useful move, especially with Black's rook on the c-file, preparing for possible queenside pressure. **14...b5**

Black continues with a direct queenside assault. **15.Nc1** A standard maneuver, allowing the knight to reposition to b3 or d3 as needed.

[15.Bc1!? This move directly challenges Black's queenside expansion by preventing b5-b4 with a possible Na4. Qa5 A logical move to support b4 while discouraging Na4. *(15...b4 16.Na4 Qa5 17.b3±* With the bishop heading to b2, White gains a solid positional edge. *Be7 18.Bb2 Qb5 19.Qe3±* Nd3 is next.*)* 16.Rdg1∞ This prepares the typical f4-g5 advance, keeping both sides in the game.]

15...Na5

[15...b4 This was a better choice for Black, aiming to break through on the queenside. 16.Na4 Qa5 17.b3 Despite the positional risks, because my knight on a4 is now very strong, Black's play is concrete and leads to an interesting, balanced position. Be7 18.Ne2 Qb5 19.Rc1 *(19.Qd2 Nh7∞)* 19...0-0 *(19...Qxd3 20.cxd3±)* 20.Nb2 Nh7! 21.Qxb5 axb5 22.c3=]



Black plans Nc4, a common idea, but here it's a mistake. **16.b3** This stops Nc4 but weakens my queenside in the process.

[16.Nb3! A stronger move, opening up a kingside attack. Nc4 17.g5 hxg5 18.Bxg5 Be7 19.h6!? gxh6 20.Bxh6± With Black's king in the center, White's position is easier to play.]

16...Nc6 Black aims for Nb4, maintaining queenside pressure.

[16...Qb6 Keeping the queenside attack alive, leading to a complex but balanced game after Nd3. 17.Qe3 Be7 18.N3e2 I want to play Nd3. 0-0 19.Nd3 Looks like a very interesting position, but strong engines kill all the fun: Nc4 20.bxc4 bxc4+ 21.Nb2 Rb8 22.Bxb8 Rxb8 23.Qc3 Bb4 24.Qe3 Bf8= leading to a draw by repetition.]

17.Qe3 A natural move but less effective due to the earlier b3, which weakened the queenside. The point is that it will be harder for us to play Nd3, as our knight on c3 is not stable. **17...Nb4**

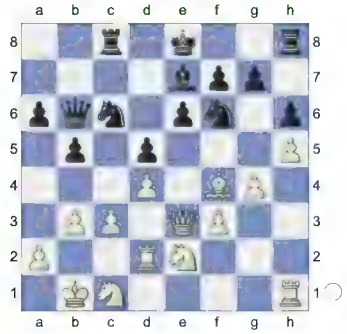
[17...Nh7∓ A better option for Black, preparing Be7 and O-O while slowing down White's kingside play.]

18.Rd2 Preparing N3e2 and c2-c3.

18...Be7 19.N3e2 Qb6?! This was a misstep. If Black wanted to play with Qb6, then it was better to maintain the knight on a5 to have the Nc4 option.

[19...Nh7! Once again, the best choice, planning O-O.]

20.c3 Nc6



21.Nd3 b4?! This move seems like a mistake in hindsight, though

understandable given the typical nature of the queenside play.

[21...Nh7! Still the most solid continuation for Black, leading to an equal and complex game.]

22.Rc2 Preparing to use the c-file, turning Black's queenside play to White's advantage. **22...Na7**

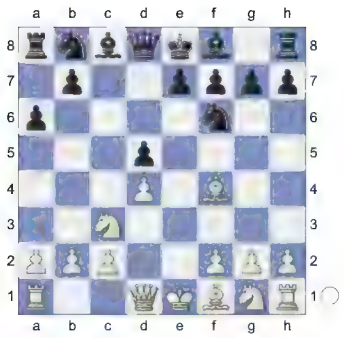
E Women's Candidates (2) 05.04.2024

[Richard Palliser]

1.d4 Nf6 2.Nc3 d5 3.Bf4 The Jobava-Priˆ , wheeled out on the biggest stage of all. **3...c5 4.e3 cxd4 5.exd4 a6**

(Diagram)



This remains a safe and sensible line for Black. **6.Nf3**

[White has even been known to flick in 6.h3 here when Nc6 7.Nf3 would take play back into our main game.]

6...Nc6 7.h3!?

[It's been a while since we examined this outwardly modest move on ChessPub. Most of our coverage has been devoted to the main line, 7.Ne5 , most recently with Fiorito-Brodsky, Titled Tuesday Blitz 2023 - see the Archive.]

7...Bf5 8.Bd3

[A simple approach. Instead, Eric once analysed 8.g4 Bg6 9.Ne5 and his line e6 *(9...Ne4?! 10.Nxe4 Bxe4 11.Nxc6 bxc6 12.f3 Bg6 13.h4 h5* would have given White good chances for an edge in Romanov-Agdelen, Teplice 2023, had he settled for *14.Bd3)* 10.h4 Nxe5 11.dxe5 d4! still looks pretty critical to both me and the engines. My predecessor's analysis continued 12.Nb5? *(12.exf6 dxc3 13.Be5* is engine-approved and after *cxb2 14.Bxb2 Rg8!* while the position may feel dangerous for Black, it's very likely that he is at least OK*)* 12...Ne4 13.h5? Qa5+ 14.Bd2 Bb4 when White is simply in some trouble.]

8...Bxd3 9.Qxd3 e6 10.0-0 The former and future women's world chess challenger is content with simple development. There's nothing at all wrong with such an approach, although the knight does look a little odd on c3.

10...Bd6

11.Bxd6

[As Eric noted, previously 11.Bg5 h6

A) 12.Bxf6 Qxf6 13.Ne2 was preferred in Indjic-Koepke, Titled Tuesday Blitz 2023, where 0-0 *(13...g5!?* was very much an idea too *)* 14.c3 Rad8 15.Rfe1 Rfe8 was about equal;

B) 12.Bh4 0-0 13.a3 Rc8 14.Rae1 Be7 had likely slightly favoured Black in Miladinovic-Dizdarevic, Belgrade 2010.]

11...Qxd6 12.Rfe1 0-0 13.a3

[Engine-approved and mainly designed to hold up ...b5-b4. The alternative was 13.Ne2 b5 14.c3 , where Black does have the minority attack, but White isn't worse and can look to get in Nc1-b3.]

13...Qc7

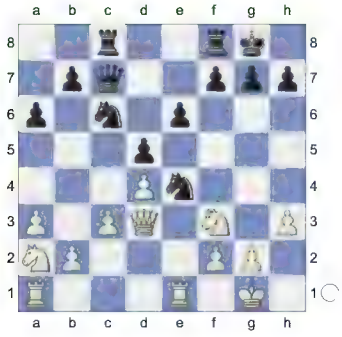
[A new move, 13...Rac8 14.Ne5 *(14.Na2!?* might well have been Tan's plan *)* 14...Qc7 15.Re3?! Nxe5 16.Rxe5 Rfd8 having left Black slightly for choice with the upcoming minority attack in Ermolaev-R.Svane, Titled Tuesday Blitz 2021.]

14.Na2! This may feel a little defensive, but also feels like a pretty good way of dealing with Black's expansionary plans on the queenside. **14...Rac8**

[Likewise, 14...b5 would have been met by 15.c3 when Rab8 *(15...Na5!? 16.Nb4 Nc4 17.Qe2 Ne4 18.Nd3* is probably about equal*)* 16.Nb4! is a handy resource.]

15.c3 Ne4!?

[A first sign of ambition from Vaishali. While 15...Ne7 might seem sensible, following up with 16.Nc1 a5 may not seem so natural and yet this and then 17.a4 Nf5 is how the engines want to play and should, at most, give White only a nominal plus.]

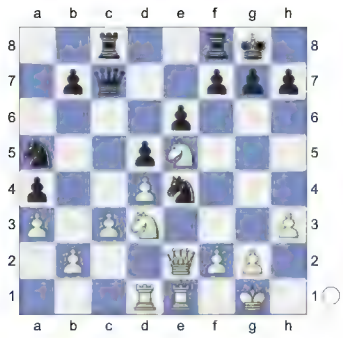


16.Qe2 Freeing d3 for the knight on a2 as Tan continues to calmly improve her forces. **16...Na5 17.Nb4 Nb3?!**

[A strange choice: what does the knight achieve here? Instead, something like 17...Nc4 18.Nd3 Rfe8 19.Nfe5 b5 would have maintained the rough balance.]

18.Rad1 a5 19.Nd3 a4 And so Black has managed to secure a grip on the queenside, but at the cost of some time, tempi which Tan now exploits to seize the initiative. **20.Nfe5! Na5**

(Diagram)



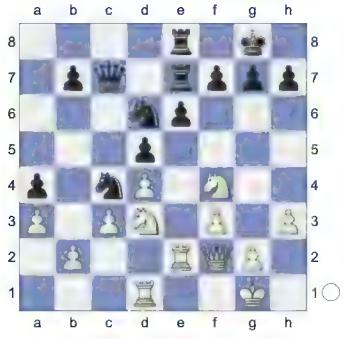
21.f3

[21.Qg4!? was also very possible. In either case, note how White wants to gradually build up on the kingside and how the knight on d3 keeps everything under control on the other flank.]

21...Nd6 22.Nf4 Nac4 23.Ned3! Keeping pieces on, with Black solidly placed but slightly lacking any real play of her own. **23...Rfe8 24.Qf2 Re7**

[Black will never manage to get in ... e5, so quite possibly 24...g6!? 25.Re2 Qd8 26.Rde1 h5 would have been a better defensive set-up.]

25.Re2! Clamping down on the e-file ahead of expanding on the kingside. **25...Rce8**



26.Rde1 b6 27.g4! The engines' assessments are gradually creeping up here, which is no surprise when you consider Black's lack of any real counterplay. **27...Nb5?!**

[This only really serves to misplace a second knight. Instead, 27...Qd8

28.h4 g6 would have dug in and while White would definitely have pressed after 29.Qh2 we're still a long way from talking about more than just a very pleasant edge for her.]

28.Qh4! Qd6?!

[28...Qd8! was again a much better square for the queen.]

29.Nh5 Already threatening to pretty much win on the spot with Qg5. **29...f6!**

[Rather forced, in view of 29...h6? 30.g5 hxg5 31.Qxg5 g6? 32.Qh6! .]

30.g5!?

[30.f4 was also possible and pretty good, but sensing the favourable trend, Tan goes straight for the jugular.]

30...f5?

[The decisive mistake. Vaishali absolutely had to find 30...fxg5 31.Qxg5 Rf7! when 32.f4! Qf8! would have held up the key f4-f5 breakthrough, albeit at the cost of a pawn: 33.Rxe6 Rxe6 34.Rxe6 Rf5 35.Qh4 Nbd6 and while clearly worse, Black would still have had definite chances to hold.]

31.Rg2

[Lining everything up, although there was also the immediate 31.Nf6+!? when gxf6 32.gxf6 Rf7 33.Nf4 wins in a similar fashion to the game (the open g-file and issue of Ng6+ spell the end for Black) .]

31...Kh8

[There's just no good defence, as we can see too from 31...Kf7 32.Nf6! Rh8 33.g6+! and wins.]

32.Ndf4! Just compare the two sides' knights! Black's are stranded far from the defence of their king White's about to nobly sacrifice themselves to break into the black fortress. The immediate threat is Nf6 then Ng6+. **32...e5 33.Nf6! gxf6 34.Ng6+!**

[Vaishali had seen enough. 34.Ng6+! Kg7 35.Nxe7 Kf7 *(or 35...Rxe7 36.gxf6+)* 36.Qxh7+ Ke6 37.Nxf5 would have won serious material while retaining a devastating initiative.]

[The best move is probably 8...Bb4! when Stockfish wants to flee with the king to f2, instead of 9.Bd3 0-0 10.Nge2 c5! 11.Bxg6?! fxg6 12.Qd3 Kh7 , which just left Black in full control of the position (...Nc6-e7-f5 is one possibility, ...Nb6-c4 another and there are also ideas of ...Ba5-c7) in Niemann-Grandelius, Riga (blitz) 2021, before White collapsed with 13.Bd6?? c4 .]

9.Qd2?!

[A new move for us, having previously noted that after 9.Bd3 Bxd3 10.Qxd3 c5 the critical line is 11.g6!? f6 12.Nge2 , which still just looks rather unclear to me.]

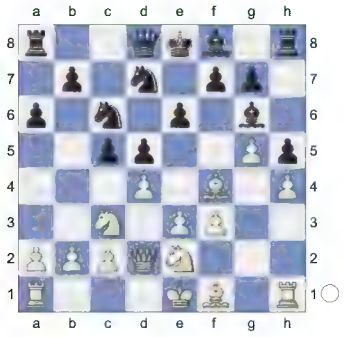
9...c5 Once again Black is quick to develop counterplay and now Bd3 would, of course, just lose a tempo for White.

10.Nge2

[Easy to criticise, but probably best and certainly 10.0-0-0?! cxd4 11.exd4 Nc6 12.Nh3 Bb4

wasn't a success for White in Bifulco-Rosenberg, Internet (blitz) 2021.]

10...Nc6



11.Bh2!?

[Prophylaxis to avoid ...e5 coming with tempo and introduce the concept of Nf4. Instead, 11.Bg2 Nb6 12.0-0 *(or 12.b3 Rc8 13.a3 Bd6 14.Bxd6 Qxd6 15.0-0 cxd4 16.exd4 Ne7!* and ...Nf5*)* 12...Nc4 13.Qc1 cxd4 14.exd4 Rc8 would leave White's position already beginning to creak quite alarmingly.]

11...cxd4 12.exd4 Qb6!?

[Stefanova decides it's high time to get on with things. Black might also have made a pretty useful move in 12...Rc8 , very much still intending ... Bb4 and/or ...Nb6.]

13.Na4?!

[A strong grandmaster and star of the FIDE Grand Swiss is already floundering and 13.Nf4!? Qxb2 14.Rb1 Qxc2 15.Nxg6 Qxd2+ 16.Kxd2 fxg6 wouldn't have given White enough for two pawns (d4 is hanging), but was still probably the best try,]

[since 13.0-0-0? is simply demolished by Nb4 .]

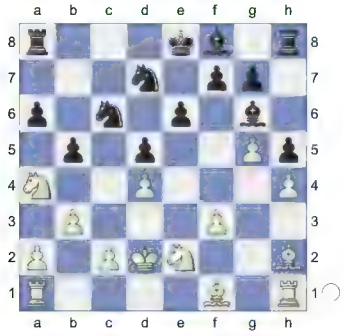
13...Qb4 14.b3

[14.Nac3!? Qxb2 15.Rb1 Qa3 16.Bh3 would have been pretty desperate, but probably also a better try, followed by Rb3 if needed.]

14...Qxd2+

[Tempting and strong, but 14...Bxc2! would just have nicked a pawn.]

15.Kxd2 b5

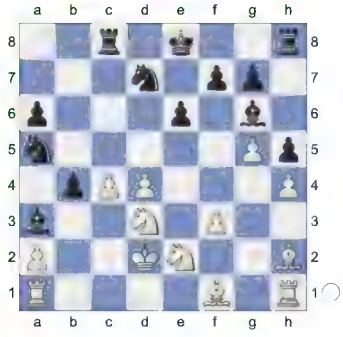


16.Nb2 Ba3 17.Nd3 Rc8 18.c3 b4! Stefanova has always been very dangerous with the initiative and here keeps finding the way to stay in forward gear. **19.c4?**

[19.Nxb4 Nxb4 20.cxb4 Bxb4+ 21.Ke3 Rc2 is pretty horrific for White, but probably had to be tried.]

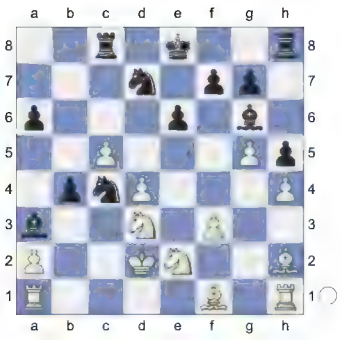
19...dxc4 20.bxc4 Na5

[20...Nb6! would have been even stronger, and if 21.c5 Nc4+ 22.Kc2 Nb2 23.Nef4 Nxd4+ 24.Kd2 Bf5 , which is fasting becoming a massacre.]



21.c5 Nc4+ 22.Kc2 Ne3+ 23.Kd2 Nc4+ 24.Kc2 Ne3+? 25.Kd2 Nc4+

(Diagram)



26.Kc2 Ne3+

[Repeating moves against her much higher-rated opponent, but after 26...0-0 27.Nef4 Bf5 Black would have retained a dangerous initiative with ...e5 imminent,]

[and the immediate 26...e5! would just have left White in huge trouble in view of 27.dxe5? *(27.Bg1 0-0 28.Bh3* is the engines' desperate suggestion, but they also then point out *Nxc5! 29.dxc5 Rcd8* when White surely wouldn't have survived*)* 27...Nxc5 .]

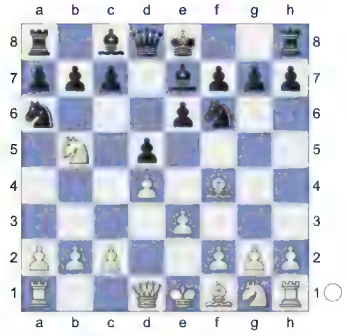
[b) 3...c5 4.e3 a6 isn't such a good move order in view of 5.dxc5 e6 6.Na4! Bxc5 7.Nxc5 Qa5+ 8.c3 Qxc5 9.Nf3 Nc6 10.Bd3 Qe7 11.Ne5 0-0 12.0-0 , which left White with an edge in Rapport-Ma Qun, Chinese League 2019.]
[c) A day earlier than our main game, Naroditsky had faced 3...Bf5 . He notably now plumped for 4.e3 *(* we've considered expansion with *4.f3 e6 5.g4 Bg6 6.h4* much more often, including in Naroditsky-Kiewra, US Online League 2015, in the Archive *)* 4...e6 5.Nf3 , which can hardly be bad, of course, and after Bd6 6.Ne5 Nfd7 7.h4 f6?! 8.Nxd7 Nxd7 9.g4 Bg6 10.h5 Bf7 11.h6! g6 12.Bxd6 cxd6 White's kingside clamp gave him a useful long-term advantage in Naroditsky-Macieja, Greensboro 2019.]
4.Nb5 Taking up the challenge. **4...Na6 5.e3 Be7**



6.Nf3 0-0 7.a3

[and 7.Bd3 c6 8.Nc3 Nb4 9.h3!? Nxd3+ 10.cxd3 b6 11.0-0 Bb7 12.Qb3 Nd7 also wasn't overly impressive for White in Rapport-Giri, Wijk aan Zee 2019,]
[but as well as the text, White should certainly consider 7.h3!? , as we've also noted before.]
7...Nh5
[We've previously only noted that 7...b6 0.34/19 Richard Palliser,MH: '7...Bc8-d7 -0.15' 8.c4 Bb7 9.Qc2 c6 10.Nc3 c5 11.Rd1 was perhaps a shade better for White in Jobava-Swiercz, Abu Dhabi 2015.]
[As such, the Cuban Grandmaster prefers to hunt down White's bishop. Another logical approach would be 7...c5 8.h3 Bd7! when it seems that White has to retreat his knight in view of Richard Palliser,MH: 'when it seems that White has to retreat his knight in

view of. And now ...Bd7xb5 would win. ' 9.a4?! -0.63/19 *(9.Nc3=* -0.18/20 Richard Palliser,MH*)* 9...c4! , threatening simply to take on b5 and round up the resulting weak pawn, as well as to go Richard Palliser,MH: ' ∓!' 10.Nc3 Bb4 .]

[7...c6!? Richard Palliser,MH 8.Nc3□ c5=]

8.Be5 White might as well force a weakening before ceding the bishop-pair. Richard Palliser,MH: 'White might as well force a weakening before ceding the bishop-pair. The position is equal.'

8...f6 9.Bg3 c5

[A new move. Eric no less had previously faced 9...Nxg3?! 10.hxg3 Rf7 0.76/20 and after *(10...c6=* 0.12/19 Richard Palliser,MH *11.Nc3 b5)* 11.c4 c6 12.Nc3 Nc7 13.Bd3 g6 14.Qc2 White was just doing pretty well in Prie-Granda Zuniga, World Senior Championship, Acqui Terme 2017.]

[However, should the text turn out to be too ambitious, then Black would do well to consider 9...c6!? 10.Nc3 g6 , even if this does run the risk of allowing White to shred Black's queenside structure.]

10.c4! Just as Eric was, Naroditsky is quite right to counter aggressively in the centre, a part of the board where unusually neither black knight has much influence. **10...g6**

[The alternative was 10...Nxg3 11.hxg3 f5 0.86/19 , but after *(11...cxd4±* 0.48/19 (Richard Palliser, MH) was preferrable. *12.exd4 Bd7)* 12.Nc3 Black's position still but appears rather loose.]

Once again we find Black having to resort to this tidying manoeuvre. He does have the bishop-pair, but of much more importance is his cramped and fairly unpleasant position. **16.Nc3 Bf8 17.b4!** Logical expansion and, of course, White wouldn't mind being given an isolated pawn on d4 if that meant he could target e6. **17...Ne7 18.Qb3 Kg7 19.Re2** Richard Palliser,MH: ' White has more active pieces. 14...Qc7 15.Be3 Keeping the bishop-pair. Jimmy Liew: 'QUESTION: What do you think of White's decision to avoid exchanging bishops?'

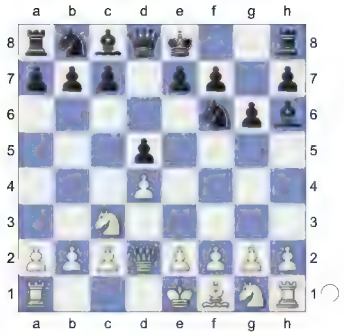
1.d4 Nf6 2.Nc3 d5 3.Bf4 g6 4.Qd2 Bg7 5.Bh6 Bxh6



6.Qxh6 Bf5 This is Black's strongest move, in my opinion. **7.Qd2** During the game, I wasn't aware of the 7.f3 idea, so I opted for the standard 7.Qd2, which might be slightly imprecise.

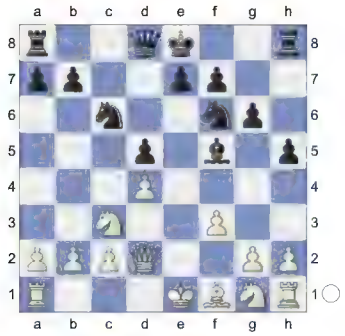
[7.f3! This is the critical move that puts pressure on Black. If 7...Bxc2, White can unleash 8.g4! with a dangerous initiative. But don't worry if this is new to you—I'll break it down in detail in the theoretical section.]

7...c5! This is Black's standard response in this variation. A textbook example of how to challenge White's center. **8.e3**

[8.dxc5?! d4∞]

8...cxd4 9.exd4 Nc6 Black's development is flawless so far. The coordination of the pieces is excellent, though there is a lingering vulnerability on the dark squares. However, finding a way to exploit this is far from straightforward. **10.f3** I played f3 to tighten my grip on the e4 square. This is part of a broader plan—if Black is careless, I'm ready to push 11.g4.

10...h5



My opponent was sharp, quickly shutting down any ideas of g2-g4. A good move that shows awareness and understanding of the position. **11.Bb5** Time to complete development. I'm aiming for Nge2 and castling kingside. **11...Qd6** This is a move you'll see often—not necessarily here, but in similar structures. Black's idea is to prepare a6, hoping to exchange on c6 and maintain a strong center. However, a more direct approach might have been better.

[11...Rc8! This is Black's best move, which isn't surprising. Thanks to the knight on c3, Black can often create counterplay along the 'c' file.]

[11...a6?! While it might look logical, this would have been a positional mistake. After 12.Bxc6+ bxc6 13.Na4± White gains a grip on the dark squares that would make Black's life very difficult.]

12.Nge2 a6 13.Bxc6+ Qxc6 14.0-0 The queen on c6 isn't doing much. It's a small detail, but in chess, small details can decide the game. A rook on c6 would have been far more effective.

[14.Rc1!?]

14...h4 This move doesn't pose any immediate threats, but it's a sneaky one! Black is grabbing space on the kingside, setting the stage for future play.

[14...Kf8!? This might seem odd at first, but improving the king's position with 14...Kf8 followed by 15... Kg7 is a solid plan. Don't underestimate the importance of king safety in the middlegame.]

15.a4 This seemingly simple move puts Black in a tough spot. Should he let me play a4-a5, fixing his pawns, or should he challenge it? Sometimes, the most effective moves are the least flashy. **15...a5?!**

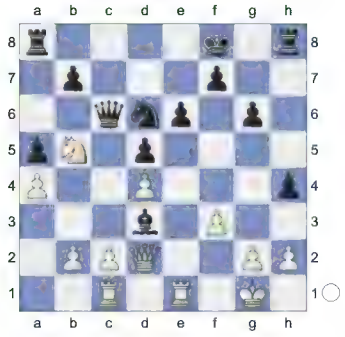
[15...Kf8! Was Black's right continuation. 16.a5 Kg7± We are a bit better, but Black's position is solid.]

[15...b6?! This move might seem natural, but after 16.a5! b5 17.Na2± We have the important b4 and c5 squares for our knight, and Black's position is hard from the practical point of view.]

I'm not a fan of this move. It weakens the b5 square, which could become a long-term problem for Black. **16.Rfe1** Patience is key in these positions. No need to rush—we should focus on slowly improving our pieces. The rook on e1 is well placed, and our long-term plan should involve preparing c2-c4 when the time is right. **16...Kf8 17.Nf4** With this move, Black's king can no longer head to g7 without leaving the e7 pawn vulnerable. This restricts Black's options and gives me more control over the position. **17...e6 18.Rac1** As I mentioned earlier, I'm gradually preparing c2-c4. No need to force anything—better to wait for the right moment. **18...Ne8** My opponent wants to maneuver his knight to d6. **19.Nb5 Nd6 20.Nd3!?** A creative move, if I may say so myself! However, it might not have been the best choice. Creativity in chess is a double-edged sword—it can lead to brilliant ideas or subtle mistakes.

[20.Nxd6 Qxd6 21.c4 dxc4 22.Rxc4± leaves White with a slight but persistent advantage. The c-file, weak dark squares and safer king make for a strong combination.]

20...Bxd3



21.cxd3! Even though computers might suggest that Black can hold this position, practically speaking, it's tough. White has strong control over the c-file, and the weaknesses on b5 and the misplaced queen on c6 are starting to tell. **21...Qb6 22.Qf4 Nxb5 23.axb5** We've reached a position where Black's practical chances are dwindling. The pressure is mounting, and eventually, I managed to convert this into a win. **23...Rh5 24.Rc5 Kg8 25.Qf6 Rh8**

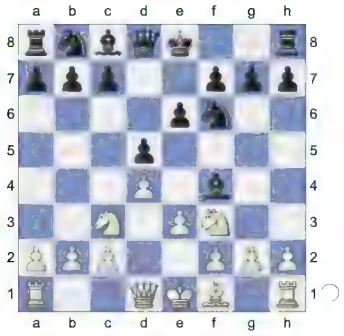
1.d4 Nf6 2.Nc3 d5 3.Bf4 e6

[A solid and pretty decent response. Another is 3...c5 when 4.e4!? *(4.e3 cxd4 5.exd4 a6* is just a decent Exchange Caro for Black*)* 4...Nxe4 5.Nxe4 dxe4 is a position we've touched on before. White's play is aggressive, but not especially dangerous, with 6.dxc5 Qa5+ 7.c3

Qxc5 8.Qa4+ Nc6 9.Qxe4 Bf5 equalising comfortably before 10.Qe3?! e5 11.Qxc5 Bxc5 12.Bg3 0-0-0 saw Black beginning to take over in Bortnyk-Grischuk, Internet (blitz) 2016.]

4.e3 Bd6 This very solid approach is something of a problem for White, as we've seen before. **5.Nf3 Bxf4**

[Kovalyov refuses to fear White's increased grip on e5 after this. Black also seems to be fine after 5...0-0 6.Bd3 c5 , as we first considered in Jobava-Malakhov, Warsaw (rapid) 2013.]



6.exf4 0-0

[As I've previously pointed out, even 6...c5 7.dxc5 0-0 8.Bd3 Qe7 9.0-0 Qxc5 10.Ne5 Nc6 should be OK for Black, despite White's slightly more comfortable development.]

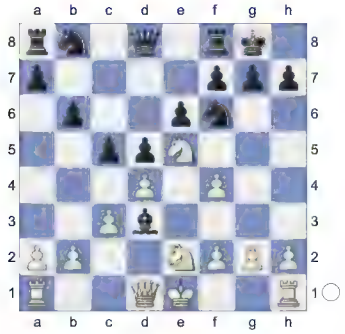
7.Bd3 b6 A notable approach, preparing ...c5 without needing to worry about White then capturing the pawn. **8.Ne2**

[Trying to improve his worst-placed piece. Instead, 8.0-0 c5 9.Ne5 hopes for a capture on d4, but after Bb7 I'm really not sure what White's supposed to do next.]

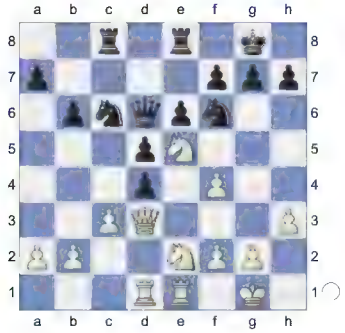
8...Ba6

[New. Similar was the previously-seen 8...c5 9.c3 Ba6 , which certainly looked very comfortable for Black after 10.Bxa6 Nxa6 11.a4 Nc7 12.0-0 Nce8! 13.Nc1 Nd6 in Miladinovic-Draskovic, Ulcinj 2014.]

9.Ne5 c5 10.c3 Possible thanks to his 8th move, but in any case Black can hardly experience any problems here. **10...Bxd3**



11.Qxd3 Qd6 12.0-0 Nc6 13.Rfe1 Rac8 14.Rad1 Rfe8 Both sides have centralised and ... both sides will rather struggle to play for a win with each so solid. **15.h3 cxd4**



16.Nxd4

[Alternatively, 16.Nxc6 Qxc6 17.Nxd4 Qd7 18.Nf3 Qa4 19.Qd2 Ne4 20.Qe2 Red8 and Black again has everything under control.]

16...Nxd4 17.Qxd4 Qc5 18.g4 Re7 19.a4

[Cordova has just seized some useful space, but presumably couldn't see what to do next. Indeed, after 19.a4 Black might just retreat his queen, but even Qxd4 20.Rxd4 Kf8 21.Kg2 Ne4!? is fine, and if 22.c4 f6! 23.cxd5

exd5 24.Rxd5 Nc5 25.Rc1 Rec7 26.Nf3 Ne6 , regaining the pawn.]

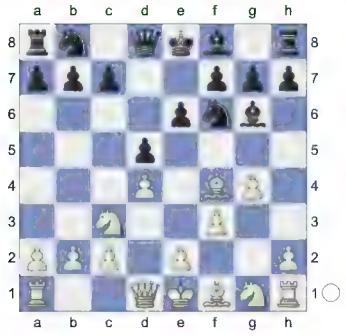
[Ipatov,Alexander]

1.d4 Nf6 2.Nc3 d5 3.Bf4 Bf5 4.f3 e6 5.g4
[5.Qd2! Is White's most interesting move, in my opinion. But we will speak about it in the theoretical part.]
5...Bg6

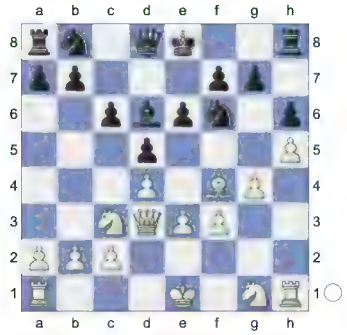


6.h4 h6 7.e3 * 7...c6 GM Baadur Jobava: 'If you recall from the previous game, Mamedyarov played 7...c5, which allowed me to place a strong knight on b5. This time my opponent opts for a more conservative approach with 7...c6, which prevents the Nb5 ideas. In my opinion, 7...a6! is Black's best move, planning to play c7-c5 later. This way, White will not have Nb5 ideas.' **8.h5** GM Baadur Jobava: '?!' GM Baadur Jobava: 'This move is natural but it is a mistake. It is better for White to keep the pawn on h4.'
[8.Bd3! This move is preferable without the inclusion of h5-Bh7. Bxd3 9.Qxd3 The main difference here is

that with the pawn still on h4, we have potential g5-hxg5-hxg5 ideas. From the previous game, you already know that when White's pawn is on h5, Black has the strong resource Nh7! to stop all g4-g5 ideas, and White cannot make much progress on the kingside. Bd6 10.Nge2± This is a better version for White compared to what happened in the game.]

8...Bh7 9.Bd3 Bxd3 10.Qxd3 Bd6

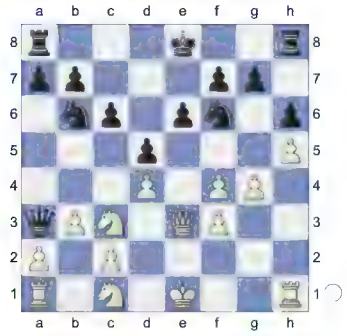
[10...b5! This is Black's strongest idea. He can then continue with Nbd7-Nb6-Be7-Nh7-00, and his position will be fine. For example: 11.Nge2 Nbd7 12.0-0-0 Be7 13.Kb1 Nb6 14.Rdg1 Nh7= 00 next, and Black is absolutely fine.]



GM Baadur Jobava: '?!' GM Baadur Jobava: 'It is not ideal for Black to develop the bishop to d6 because when he captures on f4, White will recapture with the e-pawn. Also, when Black's bishop is on d6, Black cannot develop a knight to d7 without playing a move like Qe7 or Qc7 first, which would cost another tempo.' **11.Nge2N**

[11.Bxd6]

11...Bxf4 12.exf4 GM Baadur Jobava: '!' GM Baadur Jobava: 'This is an important positional idea. Now we will play for the e5 square with a maneuvre like Qe3-Nc1-Nd3.' **12...Nbd7 13.Qe3** GM Baadur Jobava: '!' GM Baadur Jobava: 'The queen is ideally placed on e3 in this structure. Our plan is Nc1-Nd3, but by playing 13.Qe3, we are not committed to anything yet, and our opponent cannot be sure of our next move.' **13...Qe7** GM Baadur Jobava: 'I don't know if Black had some better ideas, but I think that the general evaluation would not change much: White is pressing.' **14.Nc1** GM Baadur Jobava: '!' GM Baadur Jobava: 'The start of our knight maneuvre.' **14...Nb6 15.b3** GM Baadur Jobava: '!' GM Baadur Jobava: 'OBviosuly we don't want to allow Nc4.' **15...Qa3**



GM Baadur Jobava: 'My opponent places a queen on a3 so that I will not have long castle options, but my king will be fine also on the kingside as we will see.' **16.Kf2 0-0-0∞ 17.Kg3** The king is well-placed on g3. **17...Nfd7 18.Nd3 Rde8 19.Qc1!?** I am offering a queen exchange, and if Black exchanges queens, I can push a2-a4, which will gain space on the queenside. **19...Qd6** My opponent chose to keep the queens, which is a personal choice and not necessarily the best one objectively.

[Also in the endgame White's position is better, for example: 19...Qxc1 20.Raxc1 Kc7 21.Ne2 C2-c4 next. Kd6 22.c4±]

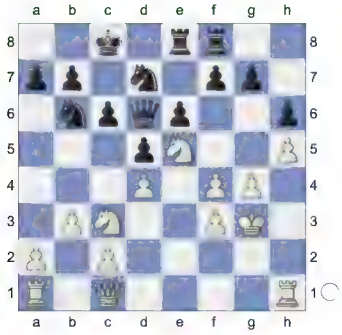
20.Ne5? This move looks natural but is a

mistake. Now Black can exchange on e5 and then play for f7-f6.

[20.a4! This should have been my move, where I am better, for example: Kb8 21.a5 Nc8 22.Na4±]

20...Rhf8?

[20...Nxe5! This was the right way to punish my 20th move. 21.fxe5 Qc7= Black will continue with Nd7-f7-f6 and later g7-g5 ideas might come (maybe supported by a rook on g8) . The position is complicated, but Black is not worse objectively.]



21.a4

[21.Nd3± I had the chance to go back and continue in the previous style, with a2-a4 next. But of course it is difficult to go back like this in a game, and if I have played 20.Ne5, it means that I liked my chances also after Nxe5, even if most likely I was wrong.]

21...Nxe5 My opponent goes for it now, but the inclusion of the moves a4-Rhf8 is convenient for White. The move a2-a4 was indeed useful for White. In fact, Black's rook on h8 may need to be repositioned to g8 to support g7-g5 ideas, while the a2-a4 move was useful for White. **22.fxe5 Qc7 23.a5 Nd7 24.Qe3**

[24.a6± This is a move that I had to include. The point is that after 24...b6, I can slowly prepare c2-c4, where Black's c6 square will be weak.]

24...f6 25.f4 Rf7

[25...a6= Black had to stop a5-a6 ideas. Then he can play Kb8-Rg8-Nf8-g5 with an interesting and complicated position.]

26.Ne2

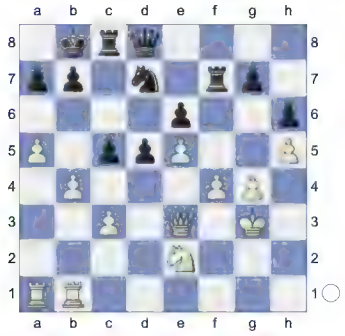
[26.a6! Once again I had to include this move. b6 27.Ne2±]

26...c5?! My opponent plays this typical push, but now his king will be vulnerable.

[26...a6!]

27.c3 fxe5 28.dxe5! White is ready for b2-b4 ideas, and then our knight on e2 can get the excellent d4 square if Black's pawn disappears from c5.

28...Kb8 29.b4 Now I will play some natural attacking moves against the Black's king. **29...Rc8 30.Rhb1 Qd8**



31.a6! Finally I have played it. **31...b6 32.c4 d4 33.Qe4+-**

(Diagram)

White is strategically winning. We can continue with b4-b5, then transfer a knight to d3, and prepare slowly for f4-f5, possibly first doubling the rooks on the f-file. If Black manages to exchange queens, our king will have the strong e4 square. White's position is objectively winning. 1-0 (33) Jobava,B (2716)-Salgado Lopez,I (2605) Yerevan 2014 [GM Baadur Jobava]

[When Magnus Carlsen essayed the Jobava-Prie in the warm-up, pairing-determining blitz tournament in Norway he twice faced 3...a6 and after 4.e3 Bf5 *(4...e6 5.g4!?* was certainly most creative in Carlsen-Caruana, Stavanger (blitz) 2017 the g-pawn might even be touched, whereas after the arguably slightly slow *c5 6.g5 Nfd7 7.Nf3 Nc6 8.a3 b5 9.h4 Bb7 10.h5* White's kingside expansion was already looking quite useful*)* 5.Bd3 Bxd3 6.cxd3! [Jobava hasn't been too busy in his pet line of late, but we shouldn't forget that last year he was seizing the chance to exploit the absence of ...a6, going on to defeat Topalov in the Olympiad after 4.Nb5!?

- see the Archive.]

4...Bd6

[As we've noted before, both this and 4...Bb4!? should be fine for Black.]

5.Nf3 0-0

[In an earlier round, one of Rapport's opponents had taken up the gauntlet with 5...Bxf4 6.exf4 , but Qd6!? *(6...0-0 7.Bd3 b6 8.Ne2 Ba6 9.Ne5 c5 10.c3* seemed fairly comfortable for Black in Cordova-Kovalyov, San Salvador 2016, as can be found in the Archive*)* 7.Ne5 a6 8.Qf3! c5 9.dxc5 Qxc5 10.0-0-0 Nc6 11.Kb1 b5 12.Nxc6 Qxc6 13.Bd3 Bb7 0.48/19 *(13...b4=* -0.01/19 (Richard Palliser,MH) is more appropriate. *14.Ne2 a5)* 14.Rhe1 0-0-0 15.Qg3 left White with both the initiative and an edge in Rapport-Nemeth, Zalakaros 2017 note how useful the doubled f-pawns are for generating pressure down the e-file and clamping on e5.]

6.Bd3 Nc6?!

[Imitating his opponent and hoping for a Bxd6 cxd6 exchange, but I'm not totally convinced by this. Preferable is the classical 6...c5 , as we first considered in Jobava-Malakhov, Warsaw (rapid) 2013.]

7.Bg5!

[Crossing Black's plans, while if 7.0-0 I wonder if Horvath wouldn't have gone in for Nxd4!? 8.Nxd4 Richard Palliser,MH: ' Black must now prevent Nd4-f3.' e5 .]

7...b6

[This feels slightly at odds with Black's last. 7...Be7 was played in a very lowly-rated correspondence encounter and after 8.a3 White should have decent chances for an edge, perhaps following with Qe2 and a kingside expansion a la the game.]

[As such, we should consider too 7...Nb4!? when the bishop might just retreat, but 8.e4 dxe4 9.Nxe4 Nxd3+ 10.Qxd3 Be7 11.Nxf6+ Bxf6 12.h4 looks like a decent enough version of a Rubinstein French for White.]

8.a3 Richard Palliser,MH: 'White is slightly better.'

[Preventing .. .Nb4 and refusing to allow Black plenty of simplification, as 8.e4 dxe4 9.Nxe4 Be7 10.Nxf6+ Bxf6 11.Bxf6 Qxf6 12.Be4 Bb7 13.0-0 would have done.]

8...Bb7 9.Qe2 Be7

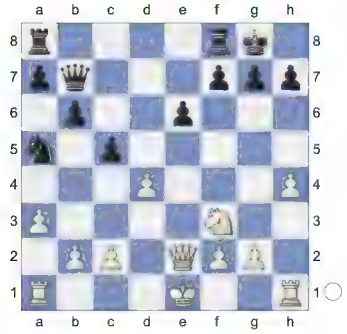
[9...Ne7!? would have been a more dynamic approach, menacing ...Ne4, and one which I suspect Rapport might have met with 10.Bxf6 gxf6 11.0-0-0 .]

10.h4!? Predicting Rapport's moves is never easy. First he makes a useful kingside advance and only then will he break in the centre. **10...Na5**

(Diagram)

11.e4 dxe4 12.Nxe4 Nxe4 13.Bxe7 Qxe7 14.Bxe4 c5 So simplification is happening after all, and just what is that pawn doing on h4? **15.Bxb7 Qxb7**

[15...Nxb7!? might have been a touch more prudent, and if 16.d5 -0.22/21 *(*White should try *16.0-0-0±* 0.37/20 Richard Palliser,MH*)* 16...Rfe8 0.17/19 . *(16...e5* -0.22/21 (Richard Palliser,MH) is superior. *)*]



16.dxc5! bxc5 17.b3 Claiming a structural plus so on the queenside had to be critical, although even here it's hard to believe that Black should be in too much danger, despite his currently offside knight. **17...Rad8 18.0-0 Rd5 19.Qe4** Now it becomes clear that rather than a weakness, we should view h2-h4 as a useful move since it allows White Ng5 ideas. **19...h6**

[19...Rc8!? would have looked to get in a timely ...c4 and after 20.Ng5 g6 21.Qe3 Qe7 followed by ...Nc6 Black should really be OK.]

[Likewise, 19...Nc6 20.Rad1 Richard Palliser,MH: ' Nf3-g5 would now be deadly.' *(*or *20.Ng5* 0.01/21 Richard Palliser,MH: '20.Ra1-d1 0.37' *g6* Richard Palliser,MH: '!'*)* 20...Qd7 21.Rxd5 Qxd5 22.Qxd5 exd5 23.Re1 Rd8 should be defensible.]

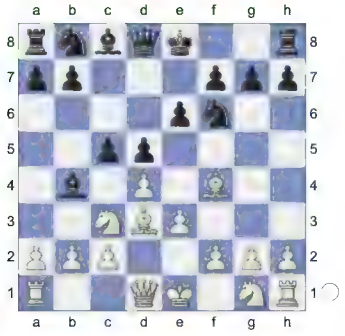
1.d4 d5 2.Nc3 Nf6 3.Bf4 e6 4.e3 Bb4 This is a logical continuation. Black pins the knight thus avoiding Nb5 ideas.
5.Bd3 c5
[Instead, 5...0-0 6.Nge2 c5 runs into 7.a3 , forcing Black to give up his bishop for the knight.]



Black should play this move immediately.
6.dxc5! QUESTION: Shouldn't White play 6 a3, virtually forcing 6...Bxc3+ as 6...Ba5 loses the pawn on c5?
[ANSWER: After 6.a3?! Bxc3+ 7.bxc3 Qa5 8.Qd2 c4 9.Be2 Ne4 Black wins the pawn on c3.]
6...Nbd7 QUESTION: Now why does Black not play 6...Bxc3+, wrecking the white pawns on the queenside?
[ANSWER: The dark-squared bishop is a very important piece here. Quite simply, Black will badly weaken his dark squares if he gives up the bishop. After 6...Bxc3+ 7.bxc3 Qa5 8.Bd6 Qxc3+ 9.Kf1 Nbd7 10.Rb1 an original position is reached. White has the pair of bishops, but his king has forfeited castling rights. This is not so bad, though, as he can tuck his king on h2 with moves like Ne2, h3, Kg1 and Kh2. From Black's point of view, he has the better pawn structure, but after a6 *(not 10...Nxc5 11.Ne2 Qa3 12.Rb3 Qa5 13.Rb5* and a piece is lost*)* 11.Ne2 Qa5 (now Black is ready to take on c5 and White has to find a way to prevent this) 12.Qe1 Qxe1+ *(alternatively, 12...Qxa2 13.Nc3 Qa5 14.Ra1 Qb4 15.Ra4 Qb2 16.Nb5 Kd8 17.c6 bxc6 18.Qa5+ Ke8 19.Nc7+ Kd8 20.Nxe6+ Ke8 21.Qd8#)* 13.Kxe1 White holds the advantage with his bishops and pressure down the b-file.]
7.Nge2 Now that the bishop is in no danger of being trapped, White secures his knight on c3. **7...0-0**
[Another game saw 7...Nxc5 8.a3 Nxd3+ 9.Qxd3 Bd6 *(9...Be7 10.Nb5 0-0 11.Nc7 Rb8 12.Nxd5* wins material for White*)* 10.0-0-0 Bxf4 11.Nxf4 Bd7 12.e4 Qc7 13.Qg3 Rc8 14.exd5 Ne4 .

After . After 15.dxe6! Kubicek, Brno 2011.]

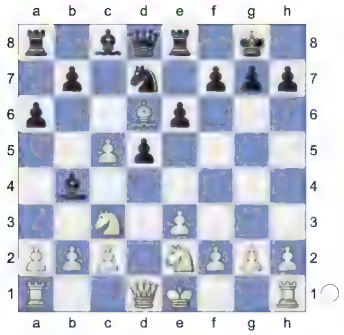
8.Bd6 Re8 9.Bb5 a6

[Instead, if 9...Ne4 10.Qd4 Qa5 11.Bxd7 Bxd7 12.a3 Bxc3+ 13.Nxc3 Nxc3 *(*or *13...Nxd6 14.cxd6 Qa6 15.e4 Qxd6 16.0-0-0 Bc6 17.exd5 exd5* when White has the advantage because he has the better minor piece and also because of Black's IQP*)* 14.b4 Qa6 15.Qxc3 , which sees White retain the extra pawn and have slightly the better bishop. At the moment castling is not possible, but with the position being closed, he can just play f2-f3 and Kf2 when his king remains safe.]

10.Bxd7 Nxd7



11.Qd4 Qa5 12.0-0-0!? QUESTION: This is a rather surprising choice, putting the king on the queenside. This looks quite risky?

ANSWER: The queenside is not the safest place for the white king, but Jobava is already anticipating the coming ending and queenside castling ensures that the rook goes to the d-file in one move which is very useful, as we will see later on. The problem is that Black is not forced to go into an ending. Keeping as many pieces as possible on the board favours him as the white king will, indeed, be uneasy on the queenside.

16.Nxe4 Nf6 Black cannot waste time; he must complete his development even at the cost of weakening his pawn structure. **17.Nxf6+ gxf6** White has the edge in this ending as he controls the important d-file and because most of Black's pawns are on the same colour as his bishop. **18.Ne2 e5 19.Nc3 Be6 20.Nd5** This forces the exchange of minor pieces. [Richard Palliser]

1.d4 Nf6 2.Nc3

[A Jobava-Prie move order. The modern-day normal London one would be 2.Bf4 g6 when by no means everyone is yet ready to be aggressive and fashionable:

A) 3.Nf3 Bg7 4.e3 0-0 5.Be2 is a very traditional move order, against which a double fianchetto plan remains popular: for example, c5 *(or 5...d6 6.h3 b6 7.c3 Bb7 8.a4 a6 9.0-0 Nbd7 10.Bh2 c5 11.Nbd2 Qc7* , as in Banusz-A. Gara, Gibraltar 2018, where White could find nothing better than

12.Bd3 and after *e5 13.dxe5 Nxe5 14.Be2 Qc6* Black was surely fine*)* 6.c3 b6 7.h3 Bb7 8.0-0 d6 9.a4 a6 . Now in Jojua-Mchedlishvili, Georgian Championship, Tbilisi 2018, White implemented a noteworthy plan: 10.Qb3! Nbd7 11.Rd1 . The idea is to enforce d4-d5 and after Ra7!? *(11...Qc7* was Dvoirys' choice, but after *12.d5 Rab8 13.Na3* White might may be able to claim a small edge*)* 12.d5 Qa8 13.c4 b5 14.axb5 axb5 15.Rxa7 Qxa7 16.cxb5 Ra8 *(16...Nb6 17.Nc3 Qa8 18.Bc4 Qa5* followed by ...Qb4 may not equalise, but should probably have been tried*)* 17.Nc3 Qa5 18.e4 Qb4 19.Qc2! Black didn't have quite enough for his very Benko-style gambit.;

B) 3.Nc3 is the trendy preference when 3...d5 would return play to our main game.*(* Some black players still prefer to head for Pirc waters, but *3...Bg7 4.e4 d6 5.Qd2 0-0 6.0-0-0* remains quite a dangerous and easy-to-play set-up for White, with *Nbd7?! 7.e5! Nh5 8.Bh6 c5 9.Bxg7 Nxg7 10.exd6 exd6 11.Nf3 Qa5 12.Kb1* already leaving him clearly for choice in Rapport-Getz, Villorba 2018. *)*]

2...d5 3.Bf4 g6 4.e3

[The consensus has come down on the side of this Barry-type approach over 4.Qd2 , but notably this and then Bg7 5.Bh6 was recently preferred by Mark Hebden. I can't believe that 0-0 6.Bxg7 Kxg7 7.f3!? *(7.0-0-0 c5* gave Black decent counterplay in Cabrera-Dvirnyy, Catalan League 2014 - see the Archive*)* 7...c5 8.e3 Nc6 9.g4 should suffice for an objective advantage, but Hebden has played it twice now and Qa5 *(*previously, *9...e5 10.dxe5 Nxe5 11.g5! Nh5* had been seen in Hebden-Murray, Bunratty 2016, when perhaps White should grab with *12.Nxd5 Be6 13.0-0-0 Bxd5 14.Qxd5 ,;* while I see that the computer has the interesting idea of keeping lines closed while aiming to show that g2-g4 was premature with *9...cxd4 10.exd4 h5!?)* 10.Bb5 e5!? *(10...cxd4 11.exd4 h5* is again touted by the engine*)* 11.dxe5 Nxg4? *(11...Nd7 12.Qxd5 Ndxe5 13.Bxc6 Nxc6 14.Nge2 Be6* with some play for the pawn was how Black might have justified his gambit*)* 12.Bxc6! *(*and not *12.fxg4? d4)* 12...d4 13.exd4 cxd4 14.Qxd4 bxc6 15.fxg4 was pretty much all over in Hebden-Bentley, British League (4NCL) 2018.]

4...Bg7 5.h4 Here we go... **5...a6!?**

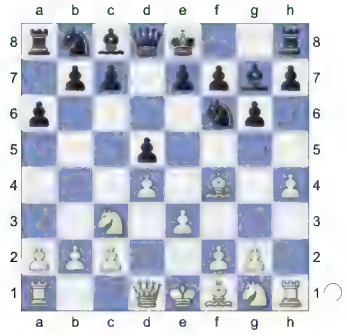
[a) 5...h5 6.Nf3 Bg4 7.Qd2! *(* I wonder if Aronian was aware of this idea of Navara's or just wanted to be a little more solid, since he preferred *7.Be2 Bxf3 8.Bxf3* in Aronian-Vachier Lagrave, Gibraltar (blitz) 2018, where *c6 9.Qd2 Nbd7 10.0-0-0 b5 11.Kb1 Nb6* gave Black sufficient counterplay*)* 7...Bxf3 8.gxf3 is an idea we first came across in Navara-Bobras, Czech Extraliga 2017, where Black now castled. Instead, c6 9.0-0-0 Nbd7 is not without its logic, but even with the black king on g8 White's play is partly directed at the central files. Here 10.Kb1 e6 11.e4 prepared to increase the pressure

with some combination of Bg5, Bd3 (or even Bh3) and Rhe1 before Qa5? 12.Nxd5! Qxd2 13.Nxf6+ Nxf6 14.Rxd2 simply bagged a pawn in Bauer-Maze, Internet (rapid) 2018.]

[b) 5...c6 6.Nf3 b5?! is rather ambitious and also a little misguided against a Barry set-up in my view: 7.Ne5 Nfd7 8.Nd3! Nf6 9.Be2 h5 10.a4! bxa4 11.Rxa4 Nbd7 12.Qa1 certainly left White fully in charge in E.Paehtz-P.Papp, Gibraltar 2018.]

[c) 5...c5 6.Nb5! Na6 7.c3 gives White his ideal set-up and after Bg4 8.Be2 Bxe2 9.Qxe2 Qd7 10.Nf3 Ng4?! 11.h5 c4 12.a4 Black was in trouble on both sides of the board in Ansell-Sreeves, British League (4NCL) 2018.]

[d) 5...0-0 6.h5 c5 remains critical in my view, *(*but not here the *6...Nxh5? 7.Rxh5 gxh5 8.Qxh5 f5* of Girya-Bodnaruk, Russian Women's Ch., St Petersburg 2017 - see the Archive. *)*]



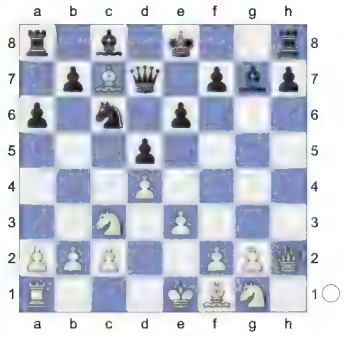
Victor is, of course, always extremely well prepared, as subscribers will be all too aware, but this still feels more like a typical internet speed move to try and avoid theory than detailed preparation. Other recent developments: **6.h5!** The Ukrainian Grandmaster wastes no time in blowing open lines for his pieces. **6...Nxh5 7.Rxh5 gxh5 8.Qxh5 e6**

[A new move for us. I still feel that White's exchange sacrifice gives him at least enough compensation, if not definitely more than that. Here we previously considered 8...c6 9.Nf3 h6 10.0-0-0 Nd7 11.Qh2! Nf8 12.Bc7 Qd7 13.Be2 in that great modern-day masterpiece Jobava-Savchenko, Minsk 2014 - see the Archive.]

9.Qh2

[Picking off c7. In the only previous test White had preferred 9.Nf3!? which also appears rather effective. Certainly Nd7? *(9...Nc6* , and if *10.Ng5?! Qe7* , would be a better defence *)* 10.Ng5 Qe7 would already have left Black in trouble in Tologontegin-Vakhidov, Ashkhabad 2017, had White now found 11.Nxe6! Qxe6 12.Nxd5 , and if 0-0 13.Bd3 h6 14.Nxc7 Nf6 15.Qh2 Qb6 16.Nxa8 Qxb2 17.Rd1 .]

9...Nc6 10.Bxc7 Qd7



11.Nf3 Increasing White's stranglehold on the key e5-square. Already Black's position is far from easy to handle, especially in a rapid game, and I suspect that he is also objectively just in some trouble. **11...b5 12.Qg3 Bf6**

[12...Bf8!? to re-emerge on b4 one day feels like a better try.]

13.e4! And why not? The centre is opening to the detriment of the black king. **13...Nxd4**

[Principled at least. Instead something like 13...Bb7 14.exd5 exd5 15.0-0-0 Be7 16.Re1 Kf8 17.Qf4 h5 18.Bd3 would have left White in charge of the position thanks to his far superior coordination.]

14.Nxd4 Bxd4 15.0-0-0

[White can even afford to allow Black a little tactic. 15.exd5!? e5 16.Qg7 Rf8 17.Ne4! would also have been pretty effective, in view of Qxc7 18.d6 .]

15...Bxf2

16.Qxf2 Qxc7 17.exd5

Black's problems become ever clearer - where is his king going to find sanctuary? **17...Qe5**

[Decent defence from Victor. 17...0-0 was the alternative, but after 18.d6 Qd8 19.Ne4 f5 20.Qg3+ Kh8 21.Qe5+ Kg8 22.Nc5 White's position would have virtually played itself.]

18.Re1 Qg5+ 19.Kb1 f5?

[Desperation. 19...0-0 20.Ne4 Qg6 21.Nf6+ Kg7 22.Re3 Qxf6 23.Rg3+ Qg6 24.Bd3 f5 would have left Black's position riddled with holes, but still really had to be tried.]

20.dxe6

[Bortnyk isn't in a rush and calmly takes his time to win a pawn then create some luft with tempo, but he might also have been somewhat more direct with 20.Qc5! .]

20...0-0

21.a4! Re8

[21...bxa4 22.e7 Re8 23.Qd4 reveals why White was quite so keen to deflect the black pawn away from b5.]

22.axb5 axb5 23.Bxb5 Re7!

Victor spies his last chance, the a-file.

24.Bc4

[Keeping control. 24.Nd5 Rea7 25.Qxa7! Rxa7 26.e7 Rxe7 27.Nxe7+ Kg7 28.Nxc8 Qxg2 29.Bd3 should also be winning with care, but we mustn't forget that this was a rapid game.]

24...Kg7?

[Still trying to get in ...Rea7 will prove far too slow. Black would have been clearly worse, but still fighting after 24...Bb7 25.Rd1 Kh8 .]

25.Qd4+ Kg6

26.g4!

[Either the g-file will decide or the h-file after 26.g4 f4 27.Bd3+ .]

3.Bf4 e6

[It's notable that the Ginger GM still likes to wheel out the 'Jobava London' from time to time, including against one of our columnists. Williams-Mikhalevski, Internet (blitz) 2020, saw Victor introduce 3...Bg4 4.f3 Bd7!? , which makes a slightly strange impression, at least for me. Following the logical sequence 5.e4 e6 6.e5 Ng8 7.Be3! Ne7 8.f4 Nf5 9.Bf2 h5 10.Bd3 g6 11.Nf3 White enjoyed a pleasant edge in a Gurgenidze structure, although Victor did later manage to win.]

[Ivan Saric meanwhile didn't take long to become an adherent of the Jobava-Prie, and switch sides, 3...g6 4.Qd2 *(4.e3 Bg7 5.h4* would be standard, as we've seen on plenty of occasions of late *)* 4...Bg7 5.e3 (a little strange in conjunction with Qd2) 0-0 6.h4 h5 7.Nf3 c5 8.Ne5 Nc6 9.0-0-0? [In other recent developments, 3...c5 4.e3 a6 5.Nf3 e6 6.dxc5 Bxc5 7.Bd3 Nc6 8.0-0 0-0 9.e4 h6 10.exd5 exd5 11.h3 Re8 looked like a reasonable IQP set-up for Black in Williams-Albornoz Cabrera, Internet (blitz) 2020,]

[while 3...a6 4.e3 e6 5.Bd3 c5 6.Nf3 Nc6 7.a3!? b5 8.h3 Bb7 9.0-0 Rc8 10.Re1 *(10.dxc5 Bxc5 11.e4* would be more standard*)* 10...Be7 *(10...c4 11.Bf1 Be7* looks very comfortable for Black, and if *12.e4? dxe4 13.Nxe4 Nxd4!)* 11.dxc5 Bxc5 12.e4 dxe4 13.Nxe4 was perhaps slightly in White's favour in Saric-Martinez Reyes, Internet (blitz) 2020.]

Tromso Olympiad (5.8) 06.08.2014

[Richard Palliser]

1.d4 Nf6 2.Nc3 d5 3.Bf4 g6 This feels rather provocative, especially

against Jobava. Tromso also saw Black test:

[a) 3...Bf5 4.f3 e6 5.g4 Bg6 6.h4 is quite an important line. Previously, we've seen

A) but as I remarked there, 6...h5!? 7.g5 Nfd7 can hardly be ridiculous either: 8.e3 a6 9.Bd3 Bxd3 10.Qxd3 c5 is a how a few games have gone and now the critical 11.g6!? f6 12.Nge2 Nc6 13.a3 Qb6 14.Bh2!? 0-0-0 *(14...Qxb2 15.Kf2!* looks like decent compensation as *Qb6 16.Rab1 Qa7? 17.Nf4* is not really what Black wants to be doing*)* 15.0-0-0 left White for choice in Ipatov-Kantans, Tromso Olympiad 2014.;

B) 6...h6 in Jobava-Mamedyarov, World Rapid Championship, Dubai 2014,]

[b) Four rounds after our main game, Winants could be found on the white side and had to face 3...c6 4.e3 b5!? . Even to a non-classical mind this looks quite shocking (why not develop first?), and 5.Nf3 e6 6.Bd3 Nbd7 7.0-0? Be7 8.Ne5 Nxe5 9.Bxe5 b4 10.Na4! gave White an edge in Winants-Saric, Tromso Olympiad 2014.]

4.Qd2 c6!?

[A new move for us and an attempt to avoid coming under a direct attack. However, 4...Bg7 5.Bh6 0-0 6.Bxg7 Kxg7 should be fully playable for Black, as we saw in Cabrera-Dvirnyy, Catalan League 2014.]

5.f3 If Black isn't going to complete his fianchetto, it must be sensible to take over the centre. **5...b5**

(Diagram)

6.a3 White often makes this little nudge in the Jobava-Prie. Here it's essential preparation for e2-e4, but in any case it's surprising how rarely the insertion of a2-a3 turns out to be a weakness, even when White goes long. **6...Bg7**

[Winants decides to allow the white bishop in after all. Previously, 6...Nbd7 had tried to gain a tempo, but, of course, White doesn't have to go Bh6 here and 7.e4 Nb6 8.e5 Ng8 9.Bd3 e6 10.Nh3 b4 11.Ne2 a5 12.0-0 was quite pleasant for him in Boguszlavszkij-Szegi, Kisber 2011.]

7.Bh6

[I'm not especially taken with Black's opening as here too one can make a decent case for 7.e4 , but Jobava prefers to get the bishops off.]

7...Bxh6 8.Qxh6 Qd6 9.e3

[Despite what I wrote above, 9.0-0-0?! a5 looks rather risky for White with his pawn not on a2,]

[and as 9.e4 dxe4 10.fxe4?! Qxd4 drops a pawn, Jobava has to proceed more slowly.]

9...e5 Winants counters classically, but even here White can claim an edge.

10.Bd3 Nbd7

(Diagram)

11.Nge2 Harmoniously and swiftly developing. Meanwhile Black can't castle and might come under pressure in the centre (e3-e4 is in the air), and on the queenside (a3-a4). **11...a6 12.b4!** Not only does this prevent Black freeing his position with ...c5 (once again we find the early ...b5 not turning out well), but it may also mean that a3-a4 will come with even greater effect. **12...a5**

[Winants does his best to obtain some play. Instead, 12...Qf8 would have been rather slow and after 13.Qxf8+ Kxf8 14.a4 Black would have come under unpleasant pressure on the queenside.]

13.0-0 exd4 14.Nxd4 There was nothing wrong either with the other recapture, but Jobava always likes to play actively where possible. **14...Ne5 15.h3!** Another prophylactic move not immediately approved of by the engines. Now f3-f4 is coming and Black's position is just rather unpleasant. **15...Bd7**

16.f4 Nxd3 17.cxd3 axb4?!

[Black hopes to survive with his king on e7, but he is up against Jobava. Perhaps the grim 17...Ng8 had to be tried, and if 18.Qg7 Qf6 19.Qxf6 Nxf6 20.e4 0-0 when White is better, but with a lot of work still ahead.]

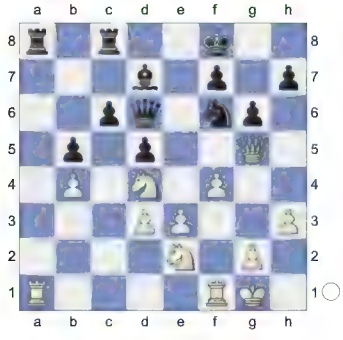
18.axb4 Ke7 19.Qg5!

[Pinning. At first 19.f5 looks quite good, but after g5! 20.Qxg5 Qxb4 Black is not without his chances in the resulting mess.]

19...Rhc8

[19...h6 was perhaps more principled, although after 20.Qe5+ Qxe5 21.fxe5 Nh5 22.Kf2 followed by g2-g4 and e3-e4 White would have obtained some advantage with his well-placed knights.]

20.Nce2 Kf8



21.Rxa8 Rxa8 22.f5!?

[Jobava wants to attack, but sticking with 22.Qe5 and a positional course was hardly weak.]

22...Qe5 23.h4?

[It's not impossible that the swift-moving Jobava had missed the tactic in the next note. Correct was 23.Nf3! Qxf5 24.Qh6+ Kg8 25.Ned4 Qxd3 26.Ne5 Qd2 27.Rxf6 . Black can actually fight back here with Ra2 28.Qg5 Bxh3 , but after 29.Rxf7 Qxg2+ 30.Qxg2 Rxg2+ 31.Kh1 Rg3 32.Ndxc6 White should still win the

ending.]

23...Kg7 Suddenly matters aren't so clear. **24.Nf3**

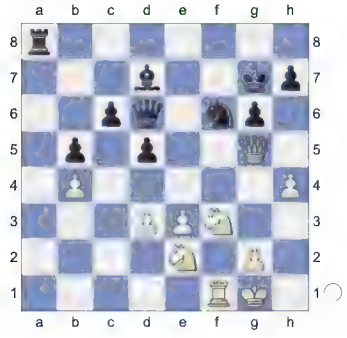
[At first 24.fxg6 Qxg5 25.hxg5 seems decisive, but after Ng4 26.Rxf7+? Kxg6 the bishop can't be taken due to the threat of mate on the back rank.]

24...Qd6?

[Collapsing. The bold 24...Qxf5 was required, refusing to fear 25.Ne5 h6 26.Rxf5 hxg5 27.Rxf6 *(27.Rxg5 Rh8* is also far from definitely good for White *)* 27...Kxf6 28.Nxd7+ Ke7 29.Ne5 gxh4 30.Nxc6+ Kd7 31.Ne5+ Ke6 when a draw might well have arisen.]

25.fxg6 fxg6?

[The worst of the kingside pawn moves. 25...h6 was a better try, although after 26.Qe5 Qxe5 27.Nxe5 fxg6 28.Nd4 Black would have found his c-pawn falling in view of Rc8? 29.Rxf6! .]



26.Ne5 Re8 27.d4

[Black is almost in zugzwang and even 27.d4 Rf8 28.Ng3 Ne8 doesn't save him, since 29.Rxf8 Kxf8 30.Qf4+ Ke7 31.Qf7+ Kd8 32.Qxh7 picks off some more pawns.]

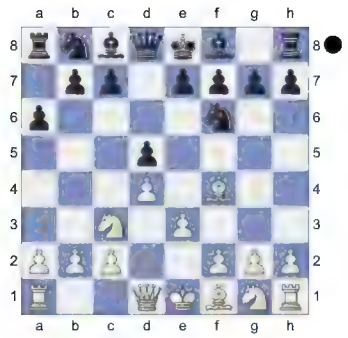
4.e3 Nabaty,Tamir: 'Diagram

(Diagram)



It is important to first play the move which you will need in any case and not to reveal what you want to do next. For example, if White started with 4.Nf3 after 4...Bf5 the idea from the previous game will not be possible anymore.'

4...g6!? Nabaty,Tamir: 'Richard Palliser: '!?"

[A new move for us. Previously we've just considered 4...e6 5.Nf3 *(5.g4!?)* 5...c5 , which would surely be a much more sensible choice against Jobava. 6.a3!? A prophylactic move. It looks like a waste of time again, but in fact it is almost always a good move in such positions. For example, after the expected ...b7-b5 (with or without ... cxd4) ...b5-b4 is prevented, and after 6...Nc6 7.Bd3, ...Nb4 is prevented. Also after ...Qb6, ...Qxb2 is prevented in view of Nc3-Na4 trapping the queen. Nc6 *(6...Nh5 7.Be5)* 7.h3 Another prophylactic move, making a hole for the bishop in case of ...Nh5 while also creating "luft" for the king after short castling. b5 8.dxc5 Bxc5 9.Bd3 Bb7 10.0-0 Bd6 11.Re1 0-0 12.Bxd6 Qxd6 13.e4 dxe4 14.Nxe4 Nxe4 15.Bxe4 Diagram

Black has weak pawns on the queenside and doubled pawns on the kingside. In a pawn endgame, in almost every case, White will be winning due to outside passed pawn he can obtain whenever he wants. Kf8 27.Rd1 First White improves his pieces to the maximum extent possible: Rd4, a3-a4-a5, g2-g3, and king to the center. f5 28.Rd4 Kg7 29.a4 Kf6 30.a5 h6 31.g3 Rc7 Sadly, Black can only wait as he cannot bring the king to the queenside because after Rh4 the h6 pawn will fall. 32.Kf1 Rc8 33.Ke1 Rc7 34.Kd2 Rc8 35.Ke3 First step completed. Rc7 36.Bf3! Now White exchanges the bishops. Usually there is tendency for rook endgames to end in a draw. But in this case, due to the activity of White's rook compared to Black's passive one and the terrible weakness of Black's pawns, this is obviously not a draw. Bxf3 37.Kxf3 Rc6 38.Rd7 h5 39.Ke2 e5 40.Rb7 Ke6 41.h4 Rd6 42.Rb6 As I said before, almost every pawn endgame in this pawn structure should be winning for White. [Black's light squares are a little tender after Nabaty,Tamir: 'Black's light squares are a little tender after' 17.Qh5+ Nf7 18.Nh4 0-0 , but ...Nh8 will help to cover them.]

17...0-0 As Steve Giddins wrote in his notes for CHESS, "The king looks safe enough here for the time being, but White retains good positional compensation, and somehow, one feels that the Sword of Damocles still hangs over the black monarch." 3.Bf4 e6 4.Nb5

[Avoiding 4.e3 Bb4 and Goryachkina's earlier choice too.]

4...Na6 5.e3 Be7

[The most natural move if you ask me. Previously, 5...Bb4+!? 6.c3 Be7 7.a4 0-0 8.Bd3 c6 9.Na3 had given White chances for an edge in Goryachkina-Ju Wenjun, 12th matchgame, Vladivostok 2020, as we saw a year ago.]

6.Nf3 0-0 7.Be2

[Modest. White should avoid the 7.Ne5?! Ne4! Richard Palliser,MH: ' With the idea ...f7-f6.' 8.Bd3 -0.79/21 *(8.f3=* -0.19/23 Richard Palliser,MH *Nf6 9.Nc3)* 8...f6 of Paikidze-Zatonskih, US Women's Championship, Saint Louis 2018,]

[and there's also 7.h3!? , as I've mentioned on a few occasions before.]

7...c6 Richard Palliser,MH: ' Prevents c2-c4.'

[This can hardly be bad and it should be remarked that this was an Armageddon encounter (i.e. a blitz time control), so there likely wasn't enough time for rising Russian star Shuvalova to consider 7...Nh5!? . Here 8.Be5 f6 9.Bg3 c6 Richard Palliser,MH: ' Dodges c2-c4' 10.Nc3 g6 continues to look like the critical line to me.]

8.Nc3 Richard Palliser,MH: 'The position is equal.' **8...c5**

[while previously we saw that 8...b6 9.Ne5 Nb8 10.a4 -0.27/22 *(⌓10.Bd3* 0.12/22 Richard Palliser,MH*)* 10...a5 0.23/22 *(⌓10...c5* -0.27/22 Richard Palliser,MH*)* 11.0-0 Nfd7 12.Bd3 was perhaps slightly better for White in Alekseenko-Rychagov, Moscow (blitz) 2019,]

9.0-0 Bd7

[Completing development, but with White having held back on Ne5 or h3, I can't really explain why 9...Nh5 10.Be5 f6 11.Bg3 Nxg3 12.hxg3

A) and here Richard Palliser,MH: ' Black should play' 12...cxd4 0.00/24

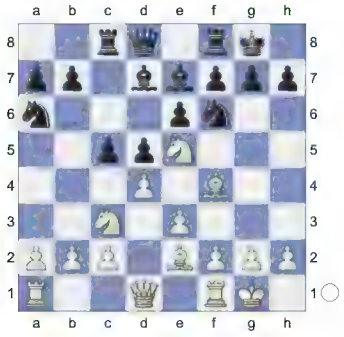
10.Ne5 Finally this thematic leap.

10...Rc8

[Bearing in mind White's next, we should consider too 10...Nb4 when I suspect that Goryachkina might have reset with 11.Nb1!? , *(* since while Black is a touch passive, she is surely fine after *11.a3 Nc6 12.h3 Rc8 .)*]



11.a3 Nc7?! 0.18/20

12.dxc5! White often makes this exchange a little faster in the Jobava-Prie, but here it's certainly a good one, avoiding any trouble with a .. .c4, ...b5, ...a5, ...b4 type pawn storm. Richard Palliser,MH: '=!' **12...Bxc5 13.Bd3 a6?!** 0.55/19

Caplin Hastings Online (1.6) 09.01.2021

[Richard Palliser]

1.d4 Nf6 2.Nc3 d5 3.Bf4 c6 4.e3 Qb6!?

[Posing an immediate question and hoping to dissuade White from going long. Previously, we've only really considered 4...Bf5 when 5.f3 e6 6.g4 Bg6 7.h4 h5 8.g5 Ng8 9.Bd3 Bxd3 10.Qxd3 reaching a tabiya of sorts where White should have an edge - see Juegel-Harff, Belgian League 2016, in the Archive.]

5.Rb1

[Wadsworth was no doubt satisfied with Black's solid structure after 5.Qd2!? Qxb2 6.Rb1 Qa3 7.Bd3 , but I dare say that, speculative or not, Jobava might still have sacrificed the pawn here.]

5...Bf5

6.f3

[Three rounds later Mark Hebden deviated with 6.Bd3 Bxd3 7.cxd3 , which makes good sense, just as in our main game. Hebden-Wadsworth continued e6 8.Nf3 Nbd7 9.0-0 Be7 10.h3 0-0 11.b4 Rfc8 12.Qb3 *(12.Na4* looks more to the point;

or even *12.e4!?*) 12...a5! 13.a3 axb4 14.axb4 Qa6 15.b5 Qa3 , with sufficient counterplay for Black.]

6...e6 7.g4 Thematic Jobava-Prie expansion. **7...Bg6 8.h4 h6 9.Bd3 Bxd3 10.cxd3!?**

[Once again, a tempting recapture, bolstering White's central presence, not least in the event of any ...c5 dxc5 exchange. That said, 10.Qxd3 can hardly be terrible and after Qa6 (Sharikov-Rodchenkov, Moscow 2020) 11.Nge2 Qxd3 12.cxd3 followed by Kd2, and maybe even Rbg1, White is surely slightly for choice.]

10...Nbd7

[Black would have done better to go 10...c5! without delay and following 11.dxc5 Bxc5 12.d4 Be7 13.Nge2 Nc6 there would have been everything to play for in this Exchange Slav-type situation.]

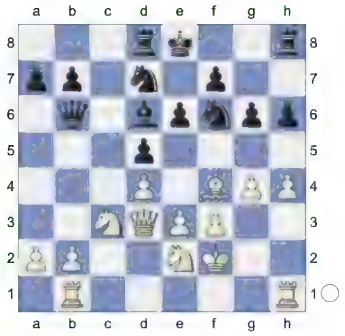
11.Nge2 c5?!

[The thematic break, but Black would probably have done better to have sat tight with 11...a5 and ...Be7.]

12.dxc5 Bxc5 13.d4 Bd6 14.Kf2! A safe spot for the king and a move which sums up why White is better. His king is quite safe, whereas its counterpart doesn't really want to commit to either flank and so come under a direct attack. Note how the knight on d7 contributes little to Black's position. **14...g6**

[14...Rc8 15.Qd3 0-0!? is preferred by the engines, but 16.Bxd6 Qxd6 17.Ng3 would scare many a human here.]

15.Qd3 Rd8



16.Na4! Howell continues to take control of the position. **16...Qc7 17.Rbc1 Qb8 18.Nc5**

[A good case might also be made for a preliminary 18.b4!? ahead of invading on c5.]

18...Nxc5 19.Rxc5

[19.dxc5!? Bxf4 20.exf4!? would pretty much force d4 , but even here 21.b4 looks fairly good for White, with such fine pawns and control of both flanks.]

19...Nd7 20.Rc2 h5!

Thus far Wadsworth has been rather outplayed, but this was still a good move, asking a big question of White over the

kingside. **21.g5?!**

[This may not be too terrible, but why seal up the kingside and allow Black to safely castle? I dare say that Howell was soon wondering why he hadn't preferred 21.gxh5! Rxh5 22.Bg5 , keeping the kingside open and continuing to leave Black under pressure with Nf4 on its way.]

21...0-0 22.Rhc1?!

[Now Black is definitely OK, whereas 22.Bxd6 Qxd6 23.Qc3 might yet have retained an edge.]

22...e5! Breaking out. **23.dxe5 Nxe5 24.Qd4!?**

[Risky. Black should not be worse after 24.Bxe5 Bxe5 25.Kg2 Bg7 , but this would have been a much safer path for White.]

24...Nc6 25.Qf6?

[25.Bxd6 Qxd6 26.Qf4! was required to maintain the balance.]

25...d4!

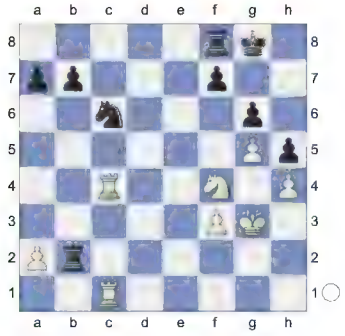
This fine pawn sacrifice must have come as a cold shower to Howell. Suddenly White is in serious trouble. **26.exd4 Bxf4**

[Hardly terrible, but 26...Nb4! would just have been very strong, and if 27.Rc3 Nd5 28.Bxd6 Rxd6 when White is losing the exchange and will see his queen and king continue to be targeted.]

27.Qxf4 Qxf4 28.Nxf4 Rxd4 29.Rc4

[29.Ng2!? Nb4 30.Rc7 , and if Nd3+ 31.Ke3 , might have been a better defensive try.]

29...Rd2+ 30.Kg3 Rxb2



Bagging a clear pawn. **31.Nd5!** Improving the knight and going for counterplay against the black king is White's best hope of rescuing the game.

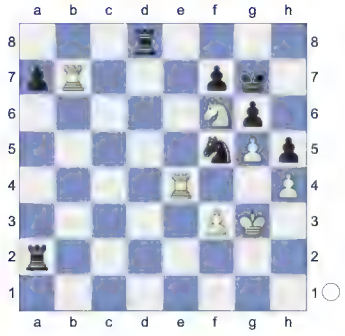
31...Rd8 32.Nf6+ Kg7 33.Re4?

[Ambitious and surely too ambitious, especially when converting Black's extra pawn after 33.R1c2 wouldn't have been such an easy task, with Rxc2 34.Rxc2 Rd1 35.Re2 Ra1?? 36.Re8 a graphic example of what to avoid.]

33...Rxa2 34.Rb1 Nd4!

[Wadsworth continues to rise to the challenge. 34...b6? 35.Rc1 Na5 36.Rc7 would have given White enough counterplay.]

35.Rxb7!? Easy to criticise, but probably not such a bad practical try. **35...Nf5+**



36.Kf4 Nd6 Forking the white rooks. **37.Rc7 Nxe4 38.fxe4** was objectively

stronger followed by transposing back into our previous note or going **38...Rf2+**

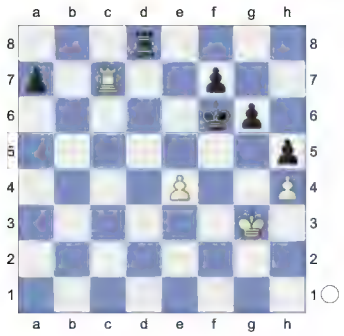
39.Kg3 Rxf6?! 40.gxf6+ Kxf6



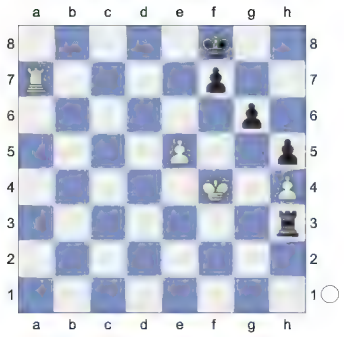
41.Rxa7 Rd3+

[41...Rd1 would arguably have been slightly more accurate, but it quickly becomes clear that Wadsworth has missed a trick.]

42.Kf4 Rh3?

[By now 42...Rd4! was required and would have maintained good winning chances for Black.]

43.e5+ Ke6 44.Ra6+ Ke7 45.Ra7+ Kf8



46.e6! Ouch. This powerful pawn sacrifice gives White enough counterplay to dash Black's aspirations of the full point. **46...fxe6**

[46...Rxh4+ 47.Ke5 fxe6 48.Kf6! is similar, White being set to save the game with relative ease after Rf4+ 49.Kxg6 h4 50.Kg5 .]

47.Kg5 e5 48.Kxg6 Rxh4 49.Kf6 As so often in rook endgames, the difference in activity between the two kings makes all the difference. **49...Rf4+ 50.Kxe5 Rf7**

27th Bunratty Masters (5.1) 23.02.2020
[Richard Palliser]

1.d4 Nf6 2.Nc3 The same move order as seen in Williams-Balaji in last month's update. **2...d5 3.Bf4 e6 4.Nb5**

[This leap was popular in the early days of the Jobava-Prie, went out of fashion to an extent, but now once again seems critical, at least to me. Why? Well, quite simply it avoids 4.e3

A) another recent game which caught my eye saw 4...a6!? 5.Bd3 Bd6 6.Nf3 *(6.Nce2!?* isn't totally ridiculous*)* 6...Bxf4 7.exf4 Qd6 8.Qd2 *(8.Ne5 b6 9.0-0 c5 10.dxc5!? bxc5 11.Na4* followed by c2-c4 might be a better approach *)* 8...b6 9.Ne5 c5 10.0-0 0-0 11.Qe3 c4! 12.Be2 b5 and in T.Wall-J.Rogers, British League (4NCL) 2020, Black enjoyed decent counterplay, partly on account of his hard-to-breach kingside;

B) 4...Bb4 5.Nge2 . Matthew Turner was recently happy to repeat this slightly awkward knight development, but after 0-0 6.a3 Be7 7.Nc1 b6 8.Be2 Ba6 *(8...Bb7 9.0-0 c5 10.Nd3 Nbd7* also looks quite comfortable for Black *)* 9.Bxa6 Nxa6 10.0-0 c5 11.Nd3 Nb8 12.Ne5 Qc8 13.Qf3 Nc6 Black had surely managed to equalise in Turner-Fitzsimons, Bunratty 2020.]

4...Na6

[Black's most popular move in recent practice, but here too 4...Bb4+!? is arguably more critical.]

5.e3

[White has also begun with 5.a3 when we considered c6 6.Nc3 Bd6 7.e3 b6 8.Nf3 in Sheng-So, Internet (rapid) 2017 - see the Archive.]

5...c6

[Black prepares to tidy his kingside without delay. Instead, 5...Bb4+?! is a strange one, but was seen in the pivotal 12th game of the recent Women's World Championship match, where 6.c3 Be7 *(6...Ba5??* now pretty much loses to *7.Qa4 c6 8.Nd6+)* 7.a4 0-0 8.Bd3 c6 9.Na3 c5 10.Nf3 gave White a pleasant edge, Goryachkina-Ju Wenjun, Vladivostok 2020.]

6.Nc3 Nb8 This piece didn't have to retreat just yet and we now have a position which might come about from a 4 e3 c6 move order - Black can surely do better. **7.Nf3**

[Natural development. Instead, as we've seen before, 7.Bd3 c5 8.dxc5 Bxc5 9.Nf3 0-0 10.0-0 Nc6 and then 11.e4 dxe4 12.Bxe4!? Qxd1 13.Raxd1 Nxe4 14.Nxe4 Be7 should be OK for Black.]

7...a6

[Even here I have to wonder about 7...Bb4!? , and if 8.Bd3 c5 9.dxc5

Nbd7 , which should equalise despite the loss of a tempo with the c-pawn.]

8.Ne5!?

[A new move and likely a better choice than allowing 8.Bd3 c5 9.0-0?! *(9.dxc5 Bxc5 10.0-0 0-0 11.e4* must once again be critical*)* 9...c4 , as White did in Bortnyk-Riazantsev, Minsk (blitz) 2015.]

8...c5 9.Qf3 Short is quick to exploit one upside of his last move and to adopt an aggressive set-up. **9...Nc6 10.0-0-0 Bd6**

[10...Nxe5!? 11.Bxe5 Nd7 12.Bg3 Be7 is the engines' calm preference, refusing to worry about Black's lag in development, since 13.dxc5 Bxc5 14.e4 d4 15.Ne2 e5 holds up well enough for Black.]

11.h4!

[Sounding the charge so must have been tempting, although it was also positional to switch to purely positional vein and pursue a dark-square clamp with 11.Nxc6!? bxc6 12.Bxd6 Qxd6 13.Qg3! Qxg3 14.hxg3 .]

11...Qc7 12.Bb5?!

[A tempting move to make, but White should really have preferred 12.Nxc6! and I suspect Nigel would have done had the game not begun at 9.15 on a Sunday morning. Here bxc6 *(or 12...Bxf4 13.Qxf4 Qxc6 14.g4* with a very strong initiative*)* 13.dxc5! Bxf4 14.exf4 Qa5 leaves White with a few routes to the upper hand, including even the materialistic 15.Qe3 Nd7 16.Qd4 f6 17.Na4 Rb8 18.b3 .]

1.d4 Nf6 2.Nc3 d5 3.Bf4 e6 4.Nb5 Na6
[As I remarked recently, this has been fairly topical of late. The alternative is 4...Bb4+ 5.c3 Ba5 when 6.e3 *(6.a4 a6 7.b4!?*

is likely more critical, as we've seen before *)* 6...0-0 7.Bd3 a6 8.Na3 was seen in Darini-Mousavi, Iranian Championship, Tehran 2017, and after Nbd7 9.Nf3 c5 Black must be fine.]

5.a3!?

[Preparing to retreat to c3. The alternative is 5.e3 and after c6 *(5...Be7 6.Nf3 0-0 7.h3* turned out well for White in Trjapishko-Gabrielian, Taganrog 2017, as we saw in last month's update*)* 6.Nc3 Nb8 *(6...Qb6* is neutralised by *7.a3!* and after *Ne4?! 8.Nxe4 dxe4 9.Rb1 c5* in Tabatabaei-Mousavi, Iranian Championship, Tehran 2017, one promising path would have been *10.f3!? exf3 11.Nxf3 Bd6 12.Ne5)* 7.Bd3 c5 8.dxc5 Bxc5 9.Nf3 0-0 10.0-0 Nc6 11.e4 dxe4 we've tended to focus on the more natural knight recapture and with good reason as 12.Bxe4 Qxd1 13.Raxd1 Nxe4 14.Nxe4 Be7 15.Nd4 Nxd4 16.Rxd4 f5 17.Bd6 (Trjapishko-Kakabaev, Moscow 2017) Rd8 18.Rfd1 *(or 18.Rdd1 Kf7 19.Bxe7 Rxd1 20.Rxd1 Kxe7 21.Ng5 h6 22.Nf3 Bd7 23.Ne5 Bc6* which should really be tenable rook endgame*)* 18...Kf7 19.Bxe7 Rxd4 20.Rxd4 Kxe7 seems fine for Black whose bishop will spring to life.]

5...c6

[So is in no rush. I've previously suggested that Rodshtein's 5...Be7 6.e3 0-0 7.Nf3 c5!? might be more critical.]

(Diagram)

6.Nc3 Bd6 7.e3 b6

[This was almost a novelty. A queenside fianchetto makes more sense than 7...Nc7 when I'm still not totally sure where the knight is going and 8.Nf3 Bxf4 9.exf4 Qd6 10.Ne5 gave White definite chances for an edge in that leading Jobava-Prie clash, Jobava-Topalov, Baku Olympiad 2016, as we saw last year.]

8.Nf3 Bxf4

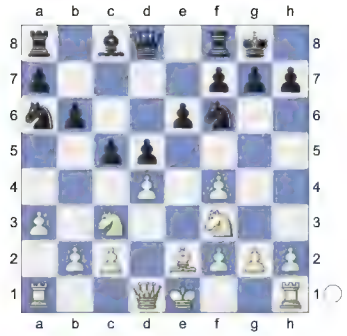
[And this is an actual novelty, 8...0-0 9.Ne5 Qc7 10.Bd3 Bb7 *(10...Nc5!* would have been consistent and equalised *)* 11.Qf3 Nd7?! 12.Qh3 having left White slightly for choice in Curien-Brait, Basel 2017.]

9.exf4 0-0 10.Be2

[10.Bd3 c5 11.0-0 Bb7 12.Re1 would be a calm approach, but perhaps So has realised that Black can get away with Nc7 13.Ne5 c4 14.Be2 . Yes, his bishop is bad, but the queenside pawns will roll and Nfe8! rather crosses White's plans.]

10...c5

(Diagram)



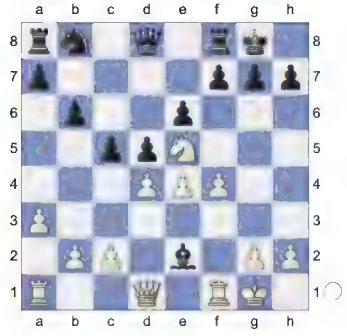
11.0-0 Nb8 Very unhurried, improving Black's worst-placed piece while preparing to exchange off his potentially bad bishop. **12.Ne5 Ba6 13.Nb5!?**

[Sheng wants to preserve his bishop. Most likely I'd prefer 13.Bxa6 Nxa6 14.Re1 when Black should be OK, but White has a bit of pressure and pressure which could easily translate into an edge, as shown by Nd7 15.f5! Nxe5 16.Rxe5 .]

13...Ne4 Black too is, of course, allowed to exploit his semi-outpost. **14.f3 Bxb5**

[14...Nd6! would have been stronger, since Black seems to have sufficient control after 15.Nxd6 *(15.a4 Nf5* is quite awkward*)* 15...Qxd6 16.Bxa6 Nxa6 17.Re1 Nc7 .]

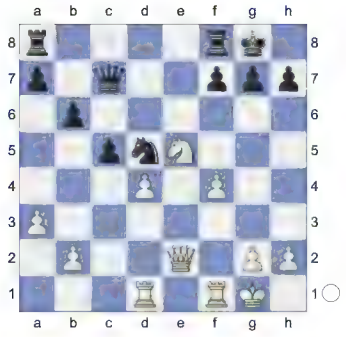
15.fxe4! Bxe2



16.Qxe2 Nd7 Black scurries to complete development. Of course, only White can be slightly better here, but Black is extremely solid and White must be careful not to overextend. **17.exd5 exd5 18.Rad1**

[I also wondered about 18.Qf3!? Nf6 19.dxc5 bxc5 20.c4 , but after dxc4 21.Rad1 Qc7 22.Nxc4 Rad8 White may regret the slightly weakening f2-f4 and Black should be fine.]

18...Nf6 19.c4 Aggressive and challenging enough, but So refuses to panic. **19...Qc7!** Calming stepping out of the path of the white rook as exchanges loom. **20.cxd5 Nxd5**

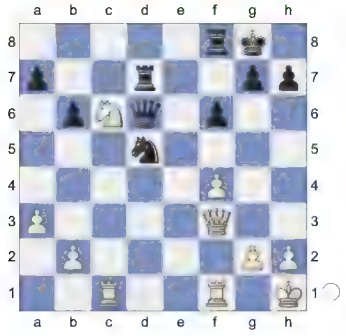


21.dxc5 Qxc5+ 22.Kh1 Rad8 23.Rc1 Qd6 24.Qf3! f6?

[White's slightly more advanced knight gives him a spot of pressure, but, of course, f4 and e3 could become weak. Here 24...Ne7! would have been sensible, but So instead badly underestimates the danger.]

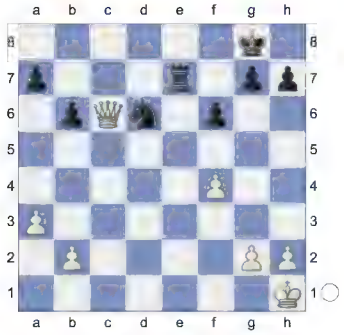
25.Nc6 Rd7

[And not, of course, 25...Rc8 26.Qxd5+! .]



26.Rfd1 The pin is going to win material. **26...Rc8!** Good defence from

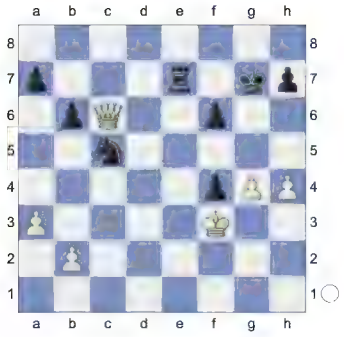
So, enabling him to gain rook and knight for the queen. **27.Ne7+! Nxe7 28.Rxc8+ Nxc8 29.Rxd6 Nxd6 30.Qc6 Re7**



31.h3

[31.Qd5+! Kh8 32.Kg1 would have been simple and strong. A timely advance of the white g-pawn should dispel any illusions about a fortress.]

31...Ne4 32.g4 g5! A good practical try, hoping to gain some squares for the knight. **33.Kg2 Kg7 34.h4 gxf4 35.Kf3 Nc5**



36.Kxf4?

[An easy move to make when relying largely on just the two-second increment. 36.Qd6! Rd7 37.Qxf4 was the way to recapture, although after Nd3 38.Qf5 Ne5+ 39.Ke4 Re7 Black can begin to entertain definite hopes of holding out.]

36...Nd3+ 37.Kg3 Re3+ Black's two pieces combine perfectly to force perpetual as the white king can't go to f3, although... **38.Kg2 Re2+ 39.Kf3??**

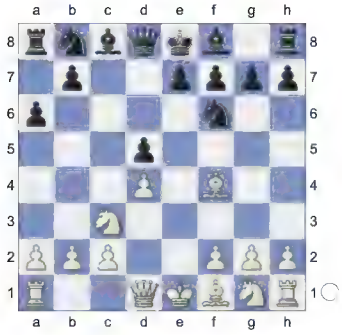
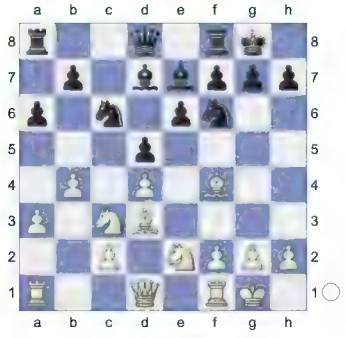
■ **Vazquez,Guillermo** **2510**
6. Floripa Open 2020 (10.6) 26.01.2020
[Vazquez,Guillermo]

This was the last round of the tournament, and I needed to win to score a GM norm **1.d4 Nf6 2.Nc3** I was already quite happy when I saw this move. It usually leads to more complex fights than the main lines **2...d5 3.Bf4 c5 4.e3 cxd4 5.exd4 a6**



6.Bd3 This was already a surprise for me
[I knew only about 6.Nf3 Bg4 7.h3 Bxf3 8.Qxf3 Nc6 9.0-0-0 e6 10.g4]
6...Nc6 7.Nge2
[7.Nf3 Bg4 is just good for Black]
7...e6!? This was the first decision in the game. I close my bishop on c8. but White has already commited the knight to e2 which is more passive than on f3 and blocks some of White's pieces.
[7...Bg4 8.f3 Bh5 9.g4 Bg6 10.h4 was the alternative, but I did not like giving white time for his kingside expansion]
[7...Nb4 gets the bishop pair, but gives White a lead in development which felt important with the likely opposite-side castling 8.a3 Nxd3+ 9.Qxd3]
8.a3 I was surprised by this move. Since I did not play Nb4 in the previous move, I did not see why White would stop me now. Also a3 signals that White is not going to castle queenside.
[I expected something like 8.Qd2 Be7 9.0-0-0 b5 with a double edged game, in which I liked my chances.]
8...Be7
[8...Nh5!? derserved attention, with the idea to develop the bishop to d6 without exchanging it]
9.0-0 0-0 10.b4 Another surprise, but anyway I am still not sure of what White's plan should be in this position. This seems to weaken c4 and c3, but White is hoping to get a grip on c5, but usually White would wait foe me to play b5 before going b4.
[10.Qd2 b5 11.b4 would have been a better version of the same idea.]
[10.h3!? so that the bishop can drop back to h2 in case of Nh5.]
10...Bd7 I decided to make a useful move and keep the options open. This prepares Rc8 or even Na7-Nb5
[10...Nh5 11.Be3 Bd6 was a way to play on the kingside. Black might even try f5, followed by f4 or Nf6-Ne4, with good play.]



11.Qb1?!
[11.h3!? again, playing against Nh5. I was intending to play Na7]

11...Na7?! During the game, I kept underestimating the idea of playing Nh5, and that would explain many of my choices in the next few moves.

[11...Nh5! 12.Be3 Bd6 is a better version for Black of 10 ... Nh5, since the white queen is far from the kingside.]

[11...a5 12.b5 Na7 was also a better version of what I did in the game]

12.a4 Nc6

[12...a5 was my original intention, but after 13.bxa5 Qxa5 14.Qxb7 White just wins a pawn for not much.]

13.Na2 a5

[13...Nh5!? still, this was playable and quite strong.]

14.b5 Na7 Here I started questioning my previous choices and I felt White should have a way to get an advantage, because I have a bad bishop on d7, temporatily a bad knight on a7 and no breaks. Even though I feel White should be better, I found no advantage here. My plan is to play Nc8 and Bd6, to hopefully prepare e5.

[14...Nb4 exchanging the knights does not help me 15.Nxb4 Bxb4 *(15...axb4* just drops the pawn *16.Qb3 Qa5 17.f3)* 16.c3 Be7 17.Qc2± the weakness on c3 is not so important, and my lack of space and bad bishop on d7 will be felt eventually.]

15.Rc1 I did not like this idea, it seems that there were 2 more challenging options.

[15.c4 dxc4 16.Bxc4 Nc8 17.Nac3 Bd6 seems ok for black. I continue with Qe7(c7), Rd8, Be8, Ne7 and Rac8. 18.Qd3 Bxf4 19.Nxf4 Qc7 20.Nfe2 Rd8 21.Rac1 Be8]

[15.Nac1 Nc8 16.Nb3 seemed logical to improve the knight and maybe even continue with Nd2-Nf3. White keeps a more pleasant positon by still close to equality. Bd6 *(16...Nh5!?)* 17.Qc1!? Qc7 18.Qe3 Bxf4 19.Nxf4 Nd6 20.Rfe1 Rac8 *(20...Bc8 21.Nd2 b6 22.Nf3 Bb7 23.Ne5 Rac8 24.Qh3↑)* 21.Nd2 with still a game left. White will get some attacking chances on the kingside but he has some weaknesses on the queenside]

15...Ba3

[15...Nc8 16.c4 dxc4 17.Rxc4 Bd6 18.Be5 h6 might also be ok for me, but I got more ambitious and decided to stop c4]

16.Rd1?! I do not see what the rook is doing on d1

[16.Re1 was more natural and what I expected Nc8 17.Nac1 Bd6 with similar play to 15 Nac1, but here White does not have the option of Qc1, so this seems to be an improved version for Black]

16...Nc8 17.Nac1

[17.c4 dxc4 18.Bxc4 Bd6=]

17...Bd6 Now I got an improved version of the line with 15 Nac1, White's queen is still on b1 and the rook is misplaced on d1. **18.c3** Quite a natural move, but it does not do anything towards stopping e5 or improving the queenside pieces,

and it also creates a target on c3 while c2 was solidly defended by the bishop on d3.

[18.Nb3 Qc7 19.Bxd6 Nxd6 20.Nd2 is what I expected, with equality but still a lot of play.]

18...Qc7 Now the game is definitely going in a good direction for me.

[18...Bxf4 is what the engine suggests, but I did not see a reason to improve the white knights 19.Nxf4 Qc7 20.Nce2]

19.Bg5? This is a real mistake. I am not sure what my opponent feared in the quiet alternatives.

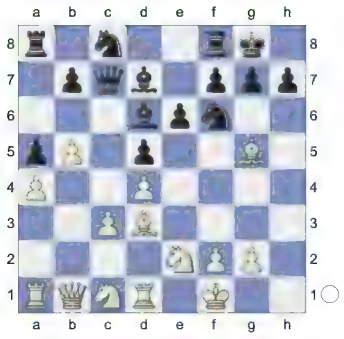
[19.Bxd6 Nxd6 Seems comfortable for Black, as I have many ways to improve my pieces.]

[19.g3 Bxf4 20.Nxf4 Qxc3 and it seems I can get away with taking that pawn]

[19.Bg3 Bxg3 20.hxg3 Re8∓]

19...Bxh2+ 20.Kf1 Bd6

[I also considered 20...e5 but I did not see a reason to play this is Bd6 works]



21.Bxf6?! Seems quite natural to regain the pawn, but I expected White to try to find compensation instead, but I still cannot find any satisfactory way.

[21.g3 is too slow h6 *(21...Ne7!?)* 22.Bxf6 gxf6 23.Kg2 e5 24.Rh1 e4∓]

[21.Nb3 Ne7∓]

21...gxf6 22.Bxh7+ Kg7 White's pieces are still stuck on the queenside, and the black rooks will be first to the open files in the kingside. I thought my position was probably winning already. I did not see a way for White to stop the attack on the kingside. **23.Bc2 Rh8 24.Rd3** A creative attempt to reorganize the pieces, but now it will be hard to activate the queen

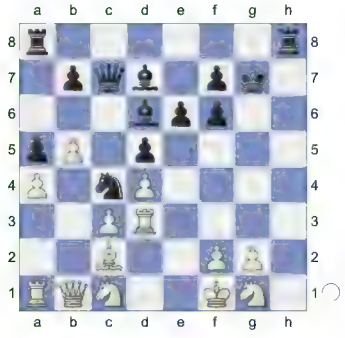
[24.Ng1 Nb6 25.Bb3 Rh1 26.Nce2 Rah8 27.Qd3 seemed like a better setup, but Black should still be winning slowly.]

24...Nb6 Improving the pieces before going for any concrete tactics.

[24...Rh1+ 25.Ng1 Bh2 26.Nce2 White still fights Bxg1 27.Nxg1 Qh2 28.Ke2]

25.Ng1 Nc4

[25...e5 was better, activating the bishop on d7 and making use of the knight defending d5.]



26.Nce2 Rh1 27.Qc1

[27.Ng3 Bxg3! using the tactic 28.Rxg3+ Qxg3 29.fxg3 Nd2+]

27...Rah8 28.Ng3 R1h4 I did not see the need to force matters. The white pieces seem to be all tied up.

[28...Bf4 29.Qd1 Bxg3 looks tempting, but white has 30.Qg4+ *(30.Rxg3+? Qxg3 31.fxg3 Ne3+-+)*

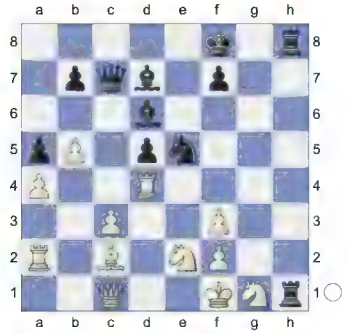
30...Kf8 31.Rxg3 and White seems to be gaining some counterplay, even thought the engines give a convincing -7 evaluation.]

29.Qe1 f5 Bringing more pieces into the attack **30.N3e2 f4**

31.Qc1 Kf8 I did not even want to allow an eventual Qg5+ **32.Ra2 e5!** I improved all my pieces to the maximum, so now I have to find the break. **33.dxe5 Nxe5 34.Rd4?!** Allowing a nice finish, but White had no good alternatives.

[I thought 34.Rxd5 Be6 35.Qd1 Bxd5 36.Qxd5 offered more resistance, but the position is still bad after R8h5]

34...f3! 35.gxf3 Rh1-+



White is now defenseless against Bh3+ **36.Qe3 Nc4 37.Qd3 Bh3+ 38.Ke1 Rg8 39.Rg4 Bxg4 40.fxg4 Rxg4**

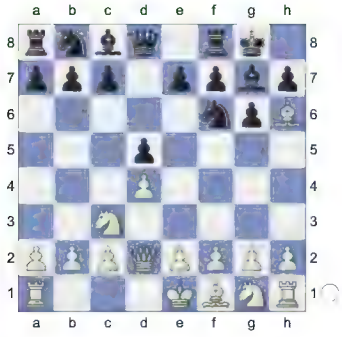
Catalan League (9.2) 22.03.2014
[Richard Palliser]

1.d4 Nf6 2.Nc3 d5 3.Bf4 The topical Jobava-Prie Attack. **3...g6!?** This may seem risky, but has received some attention of late and may appeal to King's Indian and Grunfeld players.
4.Qd2
[Clearly the most natural choice, although the only time this position's been seen on ChessPub, Eric covered 4.f3 - see Barva-Farkas, Hungarian League 2011, in the Archive.]
4...Bg7 5.Bh6 It's hard too to believe that this isn't best, although alternatives have been tried:
[a) 5.h4?! asks too much and c5! 6.e3 *(6.dxc5 d4* also works out well for Black, and if *7.Nb5 Ne4)* 6...0-0 7.Nf3 Nc6 was a Barry Attack with a misguided h2-h4 in Faldon-S.Franklin, London 2013.]
[b) 5.0-0-0 0-0 6.f3 c5 also secures decent enough counterplay, with

7.dxc5 Qa5 8.Kb1 Qxc5 9.e3 *(9.Nxd5?! Nxd5 10.Qxd5 Qb4 11.Bc1 Be6* looks like great value for a pawn *)* 9...Nc6 10.Na4 Qb4 11.Qxb4 Nxb4 12.Ne2 Re8 13.a3 Nc6 being about equal in Ratkovic-Martic, Belgrade 2014.]

5...0-0

[A rising young star preferred 5...Bxh6!? 6.Qxh6 c5 in Koneru-Lei Tingjie, Chinese Team Championship 2013, but after 7.dxc5 Qa5 8.e3 Qxc5 9.Nf3 Nc6 10.Bd3 Bd7 11.0-0 White was slightly better, since going long would leave Black vulnerable to ideas of both Ng5 and a direct queenside attack.]



6.Bxg7 Kxg7 7.0-0-0 c5!?

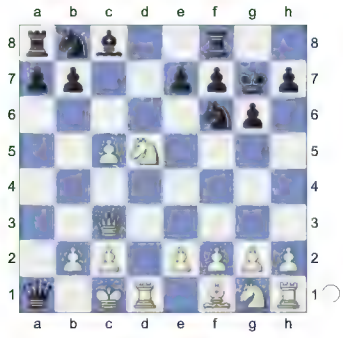
[The standard break, although Black doesn't have to offer a pawn and I could imagine many preferring 7...c6 8.f3 b5 . One practical test saw 9.e3 *(* a little meek in appearance, but prudent moreover, *9.e4 b4 10.e5 bxc3 11.exf6+ exf6 12.Qxc3 Qd6* shouldn't be anything for White*)* 9...a5 10.g4 a4 11.Nce2! Qb6 12.g5 Nfd7 13.h4 b4 14.h5 when White's attack was the more potent in Williamson-Kalaiyalahan, High Wycombe 2013.]

8.dxc5 Qa5 9.Nxd5!?

[This must be critical, if risky. When Eric had this position in his early days with the line he preferred 9.Nf3 , but Qxc5 10.e3 Bg4 11.Be2 Nc6 was rather comfortable for Black in Prie-Suarez Real, French League 2010.]

9...Qxa2 10.Qc3 The only move and now we reach a sharp and extremely uncharted position. **10...Qa1+**

[There was no need to force the white king to move just yet. Indeed, I quite like 10...Be6!? : for instance, 11.e4 *(or 11.Nxf6 exf6 12.Nf3 Nd7 13.Nd4 Rac8 14.Nxe6+ Qxe6* with easy play and the initiative*)* 11...Bxd5 12.exd5 Kg8 13.b3 Rc8 14.Qb2 Qxb2+ 15.Kxb2 Rxc5 16.d6 Nc6 17.dxe7 Re8 when Black will create some pressure with a timely knight raid to g4 or b4.]

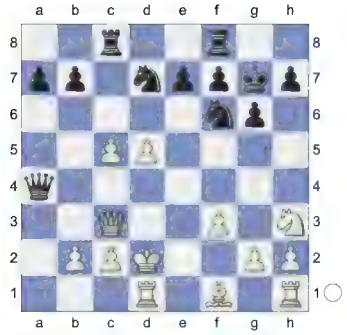


11.Kd2 Qa4 12.f3

[Covering a key square and preparing to expand. An important alternative is 12.Ke1 , but after, say, Rd8 13.Nf3 Na6 14.e3 Be6 Black is always going to have plenty of compensation. Just consult the king on e1 and rook on h1 if you're not convinced.]

12...Be6 13.e4 Bxd5! Rapid development is the aim of the game. Dvirnyy wants to go after the white king. **14.exd5 Nbd7 15.Nh3 Rac8**

(Diagram)



16.b3 Qh4!?

[Ambitious. 16...Qa3 17.Ra1 Qxc5 18.Qxc5 Nxc5 would have been at the least very comfortable for Black, but Dvirnyy wants to retain the queens and is quickly rewarded.]

17.g3?

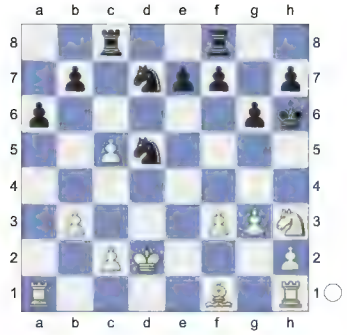
[It's always natural to want to attack something, but now White finds himself in trouble. I dare say that Cabrera wasn't too comfortable with his position, but 17.c6! would have maintained rough equality: for example, bxc6 18.Ba6 Rc7 19.Kc1 Nb8 20.Be2 Rd8 21.f4! and with Black's queen a little offside, White shouldn't be worse.]

17...Qh6+ 18.Qe3 There was nothing better with either c5 or d5 falling. I wonder if a move earlier Cabrera had just missed that Black didn't have to exchange on e3. **18...Nxd5 19.Qxh6+ Kxh6 20.Ra1?!**

[This in conjunction with White's next only makes matters worse. After 20.Kc1 Rxc5! he would, though, have been in some trouble in any case, since 21.b4 Nxb4 22.Rxd7 Rxc2+ 23.Kd1 Rfc8 24.Ke1 a5! gives Black too much for the piece.]

20...a6

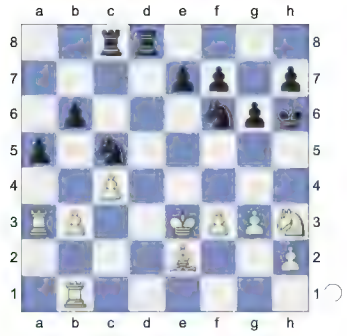
(Diagram)



21.c4?! Nxc5 Picking up a pawn and with tempo. **22.Ra3 Nf6 23.Be2 a5**

[The Italian Grandmaster isn't in a hurry, although he might also have played more vigorously with 23...e5 .]

24.Rb1 Rfd8+ 25.Ke3 b6



26.b4 axb4 27.Rxb4 Rc6 28.Ra2 White has staved off immediate disaster, but is, of course, a pawn down with a bad bishop. **28...e5 29.Nf2 Kg7 30.Rab2 Nfd7**

31.Nd1 Ra8 Little by little Black improves his forces. There's no need to rush. **32.Kf2 Ra3 33.Ne3 e4 34.Nc2 Rxf3+!?**

[Simplifying, although I suspect that Black would have done better to continue his unhurried approach with 34...Rc3 followed by ...Rd6 and/or ... Nd3.]

35.Bxf3 Nd3+

36.Ke3 Nxb2 37.Bxe4?

[Collapsing. White will emerge two pawns down due to a little tactic, whereas 37.Be2 Nd3 38.Bxd3 exd3 39.Kxd3 would still have offered him some chances to resist.]

37...Nxc4+ 38.Kd4 Nce5!

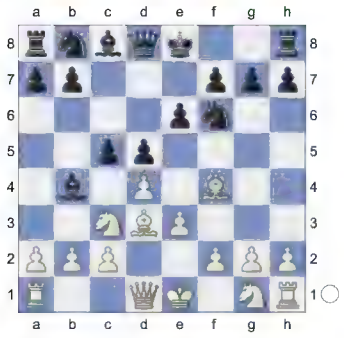
4.e3 Bb4 5.Bd3 c5



French-like play from Black and now White should really exchange, as we've seen before. **6.dxc5 Nbd7 7.Nge2 0-0!**

[Best, whereas 7...Nxc5 0.01/21 Richard Palliser,MH: '7...a7-a6 -0.49' 8.a3 Nxd3+ 0.44/22 *(8...Ba5=* -0.06/21 Richard Palliser,MH*)* 9.Qxd3 gave White a definite edge in Jobava-Shalamberidze, Georgian Team Championship 2014.]

8.0-0 Richard Palliser,MH: 'The position is equal.'

8...Nxc5 -0.02/20

[8...Bxc5∓ -0.39/20 (Richard Palliser, MH) should be considered. 9.e4 dxe4 10.Bxe4 Nxe4 11.Nxe4 Bb6]

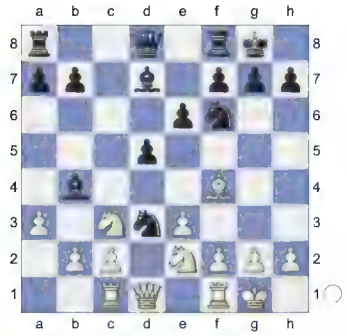
9.Rc1 By no means the only or definitely the best move, but one I rather like. Panarin places his rook in anticipation of the exchange on d3. Can White really be better here when the bishop-pair is falling one might well wonder. Probably not, although if Black is careless he might well find himself struggling to challenge a nibble. **9...Bd7**

[One might have expected 9...b6 0.19/19 , but perhaps Panarin wasn't sure about Richard Palliser,MH: '9... Nf6-h5 -0.36 , but perhaps Panarin wasn't sure about' 10.a3 Bxc3 11.Nxc3 Nxd3 12.cxd3 . Repels Nc3-b5' *(12...d4 13.Nb5* Richard Palliser,MH: '!' *Nd5 14.Bd6 Re8* Richard Palliser,MH: '!' *15.e4* does give White a pull. *)*]

10.a3 Nxd3

[I would have preferred to provoke a concession with 10...Ba5!? 11.b4 *(11.Bd6 Nxd3* hits c1 and b2 to avoid losing material*)* 11...Nxd3 12.cxd3 Bb6 when 13.Na4 Bxa4 14.Qxa4 Qe7 should be tenable for the second player.]

(Diagram)

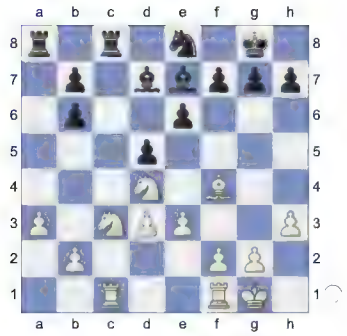


11.cxd3! Be7 12.Qb3 Demidov is quick to exploit the fact that his b-pawn hasn't advanced. The position resembles an Exchange Slav, but with the d4-square free, ...Bc6 can always be met by Nd4.

12...Qb6

[A big call and by no means forced. Black does have some weaknesses after 12...Bc6!? 13.Nd4 Nd7 14.Nxc6 bxc6 15.Na4 Richard Palliser,MH: ' Dodges Qd8-b6' e5 0.11/18 *(15...c5∓* -0.31/22 Richard Palliser,MH*)* 16.Bg3 Richard Palliser,MH: '=' Rc8 , but at least his central expansion supplies some compensation for them.]

13.Qxb6 axb6 14.Nd4 Now we can see that Black's main problem is that his light-squared bishop lacks a good role and it's not so easy even to challenge on the dark squares. However, to be fair, it seems that he is perfectly OK here thanks to the following strong regrouping. **14...Rfc8 15.h3 Ne8!**



Good defence from Panarin, preparing not so much ...Bd6 (Black would prefer to keep the bishop-pair), as . ..f6. **16.Bg3**

16...f6 17.Rc2?! Tempting, but also allowing counterplay based on the open c-file. **17...e5?**

[A tactical slip. Instead, 17...b5! would have exploited White's last and after 18.Rfc1 b4 19.axb4 Bxb4 any nibble can only belong to Black with his bishops.]

18.Nxd5 Oh dear. Suddenly e7 hangs and the rook on c2 is still overprotected.

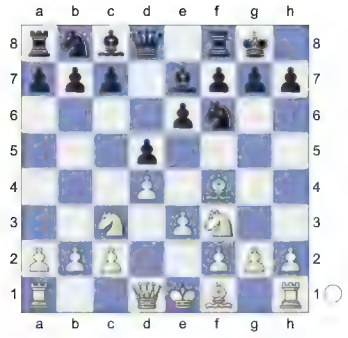
1.d4 Nf6 2.Nc3 d5 3.Bf4 e6
[Luke McShane was yet another strong grandmaster to dabble in this theory-avoiding, semi-topical line of late. He had to face 3...c6 4.f3 Bf5 5.g4 Bg6 6.h4 h6 7.e3 e6 and here notably held back on the development of the king's bishop: 8.Nh3!? Bd6 9.Qd2 Qc7 10.0-0-0 Nbd7 11.Bxd6 Qxd6 12.Nf4 0-0-0 13.Rg1 , which left White with a pleasant edge in McShane-Levene, London (rapid) 2015, and Luke went on to record the first of his 9(!) victories in this strong, 10-round tournament.]
4.e3 Be7
[In Minsk, albeit the preceding blitz event, Jobava also had to face 4...Bd6 5.Nf3 a6 6.Bd3 h6 , which feels a little slow. The position after 7.0-0 c5 8.dxc5 Bxc5 9.e4 should be compared with our main game and dxe4 10.Nxe4 Nxe4 11.Bxe4 Qxd1 12.Rfxd1 Nd7 13.c4 g5 14.Bd2 a5 15.a3 g4 16.Bc3 Rg8 17.Nd4 left the hero of the line doing very well at this stage in Jobava-Rakhmanov, Minsk (blitz) 2015.]
5.Nf3 0-0

(Diagram)



6.Bd3 c5 7.dxc5 Thematic, especially with Black having already moved his dark-squared bishop. **7...Bxc5 8.0-0 Bd7**
[This would appear to be new. Previously we took a decent look at 8...Nc6 9.e4 dxe4 10.Nxe4 Nxe4 11.Bxe4 Qf6! 12.Bg5? Qxb2 , which failed to give White enough compensation in a previous version of the same tournament, Jobava-Malakhov, Warsaw (rapid) 2013.]
9.e4 dxe4 10.Nxe4 Nxe4?
[10...Be7 11.Nxf6+ Bxf6 12.Ne5 would have given White a pretty pleasant edge, but Black badly needed to retain his defender of h7.]

11.Bxe4 Already White has a double threat and the game is pretty much up.
11...Bc6
[The machine argues that 11...Nc6!? was a better try, intending 12.Bxh7+! Kxh7 13.Ng5+ Kg6 14.Qg4 f5 15.Qg3 Qe7 , which is calm, but does

keep the game going for a bit, such as with 16.Nxe6+ Kh7 17.Ng5+ Kg8 *(and not 17...Kg6? 18.Rfe1)* 18.Qh3 g6 19.Rfe1 Qg7 20.Qb3+ Rf7 21.Rad1 Re8 22.Rxe8+ Bxe8 23.Ne6 .]

1.d4 Nf6 2.Nc3

[The London route into the game would be 2.Bf4 d5 3.e3 c5 4.Nc3 .]

2...d5 3.Bf4 c5 4.e3 And so we reach another important position for the Jobava-Prie, as well as for the London should London practitioners not mind switching things up with Nc3 on occasion. **4...cxd4 5.exd4 a6**

A popular and sensible idea, cutting out any issues with Nb5. **6.Nf3 Nc6**

[Black also has 6...Bg4 when 7.Be2 *(* the choice of the young super-talented Indian generation, but *7.h3 Bxf3 8.Qxf3 e6 9.g4* would be somewhat more typically Jobava-Prieesque in my view*)* 7...Nc6 8.h3 *(* Gukesh and Vachier-Lagrave twice debate *8.Ne5 Bxe2 9.Nxe2 e6 10.0-0 Bd6* in the recent Chess.com SpeedChess Challenge, with *11.Ng3 0-0 12.c3 Qc7* eventually leading to a win for White, but was surely absolutely fine for Black at this stage the knight on g3 isn't overly happy here *)* 8...Bxf3 9.Bxf3 e6 10.Ne2 Bd6 (Black's pieces flow to good squares) 11.Be3 0-0 12.0-0 Ne7!? 13.g3 Nf5 14.Bc1 Rc8 15.c3 b5 gave Black easy and good counterplay in Sadhwani-Subelj, Pula (blitz) 2023.]

7.Ne5 Bd7 8.Qd2

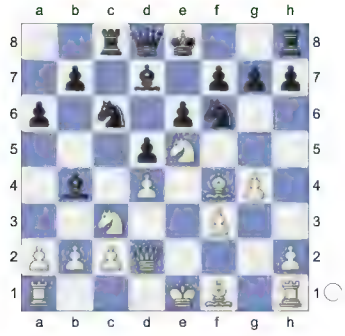
[I suggested this move and the follow-up a few years ago on ChessPub, but these days an aggressive white player is likely to prefer 8.g4!? , as recommended in Simon Williams's 'Opening Repertoire: The Jobava London System' and covered of late in Erigaisi-Lenderman, PRO League (rapid) 2023.]

8...e6 9.f3 Keeping Black out of e4 while

hinting at expansion with g2-g4. **9...Bb4** The pin is ever fairly critical in these positions. **10.g4?!**

[Consistent, but probably too optimistic here and it may well be that White does better with the calmer 10.a3 Ba5 11.Nxc6 Bxc6 12.Bd3 , keeping open options of b2-b4 if required.]

10...Rc8



11.a3 Bxc3

[Tempting when White can't recapture with the queen, but it may be that maintaining the pin is even stronger or at least the engines prefer 11...Ba5!? , and if 12.h4 h5! 13.g5 Ng8 when White does begin to look a little overextended.]

12.bxc3 0-0 13.Rb1

[Engine-approved, although it may be that the more natural 13.Bd3 is very slightly better, and if Na5 14.a4! to keep Black's queenside play under control.]

13...b5

[13...Na5!? would exploit White's inability to push the a-pawn and here 14.Bg5 Bb5!? 15.Bxb5 axb5 16.Rxb5 b6 should be decent value for a pawn.]

14.Nd3?!

[Heading for c5, but e5 is also a rather important square here and I'd certainly prefer to take White after 14.h4! when Be8!? 15.h5 Nd7 16.Nxd7 Bxd7 17.h6 g6 is how the engines want to grovel slightly as Black.]

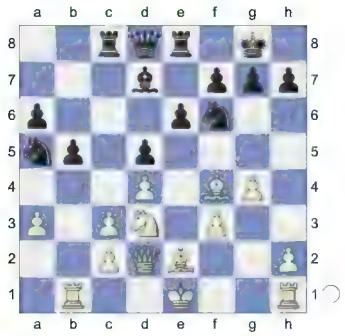
14...Re8

[Or again 14...Na5!? , and if 15.Nc5? e5! 16.Bxe5 Re8 , gaining a decent initiative at the cost of a pawn.]

15.Be2

[Even here White would have chances to be better after 15.Ne5! .]

15...Na5



16.Nc5? The wrong way. The American GM playing Black now counters White's flank optimism in classically-approved fashion in the centre. **16...e5!** Ouch.

17.Be3

[Of course, 17.dxe5 Rxc5! 18.exf6 Qxf6 wouldn't be at all fun for White,]

[and 17.Bxe5? Rxc5 18.Bxf6 Qxf6 19.dxc5 Nc4 gives Black a deadly initiative, but the text is hardly a panacea for White.]

17...Nc4

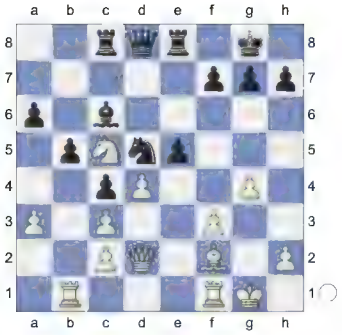
[A decent move, but the vigorous 17...e4! would have left White's position teetering on the brink.]

18.Bxc4 dxc4 19.0-0 Nd5!?

[And here 19...exd4 20.Bxd4 Bxg4! would have retained a clear advantage, in view of 21.fxg4 Rxc5 .]

20.Bf2 Bc6

(Diagram)



21.Rfe1??
[White was almost fully back in the game, but now his kingside collapses. In contrast, 21.dxe5 Rxe5 22.Ne4 would have kept things under control and restricted Black to an edge.]
21...Qf6! There's just no good way to defend f3. **22.Kg2 Nf4+ 23.Kg3 Qh6** Threatening mate as well as to win the queen. The game is up for Fiorito. **24.Be3 Qh3+ 25.Kf2 Qg2#**

[White has also tried to do without this, but 8.Be2 -0.14/20 8.c2-c3 0.24 Bd7 9.0-0 c4! was a critical response in Grandelius-Firouzja, Doha (blitz) 2016, where 10.Nc3 *(*here *10.a4* -0.45/21 10.Nb5-c3 -0.04 can be met with *Bxb5 11.axb5 Nc7)* 10...b5 11.a3 Rc8 12.Ne5 Nb8 13.Bf3 a6 seemed about equal.]

8...Bd7 9.a4! Cementing the knight in place and making it as hard as possible for Black to shake off White's grip. Indeed, the position resembles a pleasant London System for White, since Black lacks counterplay. **9...c4**

10.b3! Another good move from Trjapishko, undermining without delay and so not allowing Black time for . .. Bxb5 axb5 Nc7. **10...cxb3**

[Meek. 10...Ne4!? would be more to the point, although it requires Black to spot the brilliant 11.bxc4 Qa5! 12.Qc1 And now Bf1-d3 would win. 3.Bf4 a6

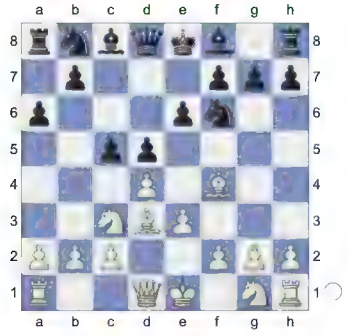
[Ruling out any tricks on c7 so has been quite popular of late. The move is sensible, but is hard to view as overly critical unlike, say, 3...c5 . Richard Rapport faced this critical counter of late and 4.e3 cxd4 5.exd4 a6 6.Nf3 Nc6 7.Ne5! reached a position we've noted briefly before, suggesting that Black should be fine. White may well and, indeed, did obtain a structural plus in Rapport-Bu Xiangzhi, World Team Championship Tsaghkadzor 2015, but Black always seemed OK: e6 8.Nxc6 bxc6 9.Na4 Bd6 10.Bxd6 Qxd6 11.Bd3 0-0 12.0-0 e5 13.dxe5 Qxe5 14.Qf3 Re8 . The position reminds one of the Four Knights and after 15.Qg3 White was, of course, for choice, but never really looked like breaking the solid defence of his Chinese adversary. Still, defending solidly this way will not appeal to many players, ideal though doing so can be in a team event.]

4.e3 e6

[Black sets up in QGD style. Instead, 4...g6!? 5.h4! Bg7 6.h5!? Nxh5 7.Rxh5 gxh5 8.Qxh5 was that fine game Jobava-Savchenko, Bronstein Memorial, Minsk 2014 - see the Archive.]

5.Bd3 c5



6.dxc5 Bxc5 7.Nf3

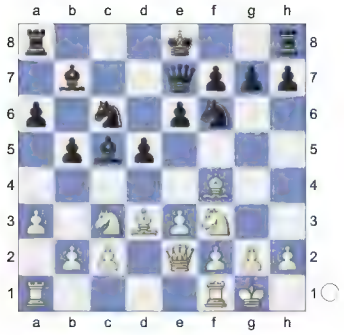
[Very natural. White has also tested 7.Nge2?! -0.72/17 7.Ng1-f3 -0.20 , but this doesn't battle for the e5-square and Nc6 8.Bg3 -0.91/18 *(8.Ng3∓* -0.54/17 *)* 8...0-0 -0.48/19 *(8...e5∓* -0.91/18 *9.Nc1 Be6)* 9.0-0 -0.98/19 *(9.Nd4∓* -0.48/19 *)* 9...Nh5 favoured Black right back in the earliest days of this line (long before Messrs. Prie and Jobava were born), Mason-Weiss, Vienna 1882.]

7...Nc6 8.0-0 The position is equal.

8...b5 9.a3!?

[Holding Black up on the queenside and even preparing a crafty, dynamic counter there. I quite like the text, although one might also make a case for relocating with 9.Ne2 .]

9...Bb7 10.Qe2 Qe7



Now one's eye might be focussed on the e3-e4 break, but instead there came:

11.b4!? Bb6 12.a4 Nxb4? 0.99/21

[Kislinsky misassesses and loses his way in the complications. Instead, 12...0-0 would have left b4 vulnerable and after 13.axb5 axb5 Hoping for ... Ra8xa1. 14.Bxb5 Nxb4 15.Na4 Ba5 it's very hard to believe that Black should have any problems.]

[12...0-0!= 0.07/21]

13.axb5± Nxd3 14.cxd3

[Improving his structure, although one might also make a decent case for 14.Qxd3!? a5 15.Be5 0.18/18 followed by Na4. In either case, Black is coming under pressure. *(15.Na4± 0.80/18 Bd8 16.Nd2)*]

14...0-0 15.d4! Ne4?! 1.21/22

[This attempt to simplify doesn't particularly help. Black should have gone in for the critical line 15...axb5! 16.Qxb5 Nd7 *(*and not *16...Qd8?!* 1.08/20 16...Nf6-d7 0.65 *17.Ne5* possibly followed by Bg5*)* 17.Ne5 Nxe5 18.Bxe5 Qd8 1.23/21 . White retains an undoubted pull here, but it's not so easy to turn it into more as shown by *(⌓18...Rxa1* 0.75/23 *19.Rxa1 Rc8)* 19.Rab1 Ba5 20.Qxb7 Bxc3 21.Rfc1 Rc8 followed by ...Rc4.]

[⌓15...axb5 0.80/22 16.Qxb5 Rfc8]

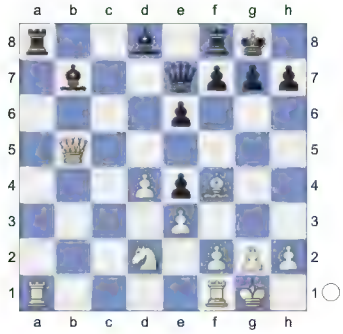
16.Nxe4 dxe4 17.Nd2 Heading for c4 as the pressure quickly mounts and in a difficult position Kislinsky quickly cracks.

17...axb5 3.35/22 This move loses the game for Black.

[17...a5± 0.90/19 was called for.]

18.Qxb5+- Bd8

[Far from optimal, but 18...Qd8? 19.Nc4 would have won a piece.]



19.Nc4! Hoping for Bf4-d6. **19...Rxa1 20.Rxa1** This game is a good example of how exchanges don't always help the defence as well as of the perils of cramped positions. Suddenly Bd6 is a huge threat and White is winning material. **20...Bd5**

26.Bf4 Qf6 27.Be5 Qg5 28.Ra7 Kg6 29.h3

[Very sensible play from Bortnyk since winning the exchange. Move by move White calmly improves his position while maintaining control. That said, here there was an immediate win with 29.Bf4! Qh4 30.h3 as now Bf6 31.Qe8 is a killer.]

29...Bf6 30.Bf4

D00: 1 d4 d5: Unusual lines
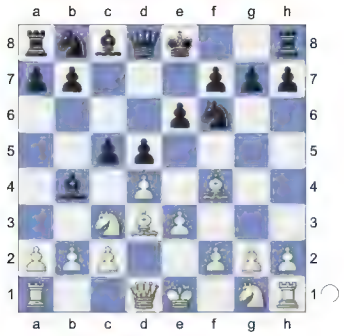
1.d4 d5 2.Bf4 Nf6 3.Nc3 Yet another route into the Jobava-Prie Attack. **3...e6** A solid approach. Of the wide range of alternatives, two combative ones caught the eye of late:
[a) Regular readers will know that I find 3...c5 quite critical and there have been a couple of recent tests of 4.e3 a6 *(4...cxd4 5.exd4 a6* is safer *)* 5.dxc5! , which continues to look like it should favour White, although Nc6 *(*or *5...Qa5!?* , which is tricky some time ago Eric pointed out that *6.Bxb8?! Rxb8 7.Qd4* is not the way to go, but White wasn't listening in Bentivegna-Gundavaa, Sliema 2014, and landed up worse after *e6 8.b4 Qc7 9.Nf3 b6! 10.cxb6 Rxb6 11.Rb1 Bd6 12.b5 0-0)* 6.Nf3 *(6.a3!* is probably more effective - see Nakamura-Fressinet, Dubai (rapid) 2014, in the Archive*)* 6...Bg4 7.h3 Bxf3 8.Qxf3 e6 *(8...e5? 9.Bg5* leaves d5 under huge pressure*)* 9.0-0-0 Qa5 10.Bd6 Bxd6 11.cxd6 Rc8 12.Bd3 0-0 13.Kb1 Rfd8 gave Black sufficient counterplay in Vaisser-Raznikov, Douglas 2014.]
[b) 3...g6!? 4.Qd2 Bg7 5.Bh6 0-0 6.Bxg7 Kxg7 7.e3 *(* an attempt to be solid before committing the king earlier this year we looked at Cabrera-Dvirnyy, Catalan League 2014, where *7.0-0-0 c5 8.dxc5 Qa5 9.Nxd5 Qxa2 10.Qc3* was rather unclear, but surely not better for White *)* 7...c5 8.dxc5 (the point of White's play) e5!? *(8...Qa5* also seems fine, and if *9.Ne4 Qxd2+ 10.Nxd2 a5! 11.c3 a4* , playing against b2-b4 before targeting c5*)* 9.0-0-0 Qa5 10.f4 exf4 11.exf4 Rd8 12.Nf3 Bg4 13.Be2 Bxf3 *(* once again I'm not sure there was anything wrong with the simple option, *13...Nc6)* 14.Bxf3 d4!? plunged the board into chaos in Winants-Edouard, Belgian League 2014.]

4.e3 Bb4 5.Bd3 c5



As an aggressive set-up as Black can muster after his third move, but once again White can flick in a little capture.

6.dxc5! Nbd7

[Hardly terrible, but now White can overprotect c3. As I've mentioned before, 6...Bxc3+!? 7.bxc3 Qa5 is surely critical and it would be interesting to know what Jobava has in mind here. White can go 8.Bd6 , but after Nbd7 9.Ne2 Nxc5 10.f3 -0.19/19 *(10.0-0 0.17/19)* 10...Qb6 Black must be OK.]

7.Nge2 Nxc5

US Online League (2) 02.09.2015

[Richard Palliser]

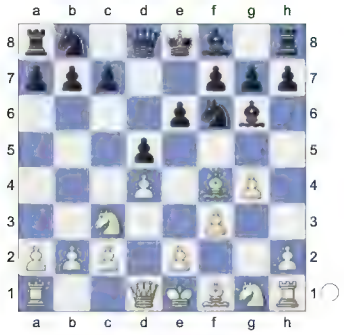
1.d4 Nf6 2.Nc3 d5 3.Bf4 The young American Grandmaster is but the latest to be drawn to the still fertile fields of the Prie-Jobava Attack. **3...Bf5**

[Classical development, but so is

3...e6 , as Jobava faced in his most recent outing with his sometime pet line: 4.Nb5 Na6 5.a3!? Be7 6.e3 0-0 7.Nf3 b6 8.c4 Bb7 9.Qc2 c6 10.Nc3 c5 11.Rd1 and White was perhaps a shade better thanks to that knight on a6, Jobava-Swiercz, Abu Dhabi 2015.]

[Meanwhile the Belorussian Grandmaster Vladislav Kovalev has made extensive use of the white set-up this summer, including against Daniel Fridman: 3...a6 4.e3 e6 5.Nf3 c5 6.dxc5!? (new in this position, if a common idea in the Prie-Jobava) Bxc5 7.Bd3 Nc6 8.a3 h6 9.e4 0-0 10.0-0 d4! 11.Ne2 Nh5 12.Bd2 *(12.e5!* followed by Qc1 or *Nxf4 13.Nxf4 Qc7 14.Qe2* would have been more challenging*)* 12...e5 13.Ng3 Bg4 and Black was already very comfortable in V.Kovalev-Fridman, Liepaja (rapid) 2015.]

4.f3 e6 5.g4 Bg6



6.h4 Perhaps this might even be considered the main line of the Prie-Jobava and it's one that White should be fairly happy to see. **6...h6 7.e3 a6**

[Prudently covering the b5-square and so avoiding 7...c5!? 8.h5 Bh7 9.Nb5 , which gave White a small edge in Jobava-Mamedyarov, World Rapid Championship, Dubai 2014, as we've seen before.]

8.Bd3

[It's interesting that Naroditsky keeps his h-pawn firmly on h4. We've previously only really explored 8.h5 Bh7 9.Bd3 when Black doesn't even have to exchange on d3.]

8...Bxd3 9.cxd3!?

[Not engine-approved, but a recapture I quite like. Nakamura preferred 9.Qxd3 , but c5 10.Nce2 Nc6 11.c3 Bd6 12.0-0-0 didn't seem too scary in Nakamura-Nepomniachtchi, World Rapid Championship, Dubai 2014.]

9...c5

[Enabling White to undouble his pawns and Black may do better with the previously-played 9...Bd6 . Indeed, ...c5 isn't his only break and here 10.Nge2 Bxf4 11.Nxf4 Qd6 12.Kf2 Nc6 put ...e5 firmly on the agenda and seemed fine for Black in Zavgorodniy-Kanarek, Katowice 2014.]

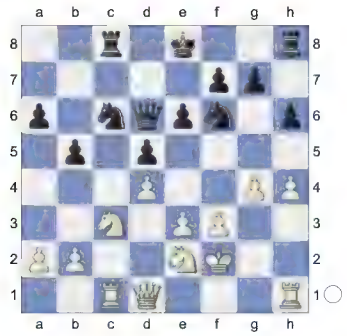
10.dxc5 Bxc5

11.d4 Bd6 12.Nge2 Nc6 13.Kf2 Naroditsky may even have considered this position before the game. The structure is of an Exchange Slav and White has quite a pleasant game. His king is quite safe on f2, the advanced pawns mean that Black is unlikely to go short and White can even play on the queenside. **13...Rc8 14.Rc1 b5?!**

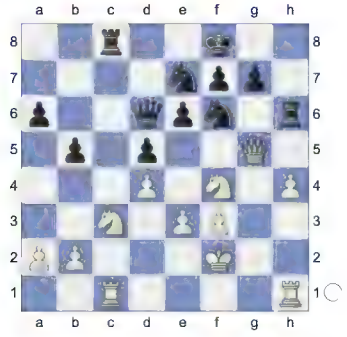
[Creating a hole on c5. Black would

have done better to keep his bishop with 14...Be7 , challenging White to find a plan and meeting the direct 15.Bg3 *(15.a3 Na5!* is another point *)* 15...0-0 16.g5?! with Nh5 17.gxh6 g6 .]

15.Bxd6 Qxd6

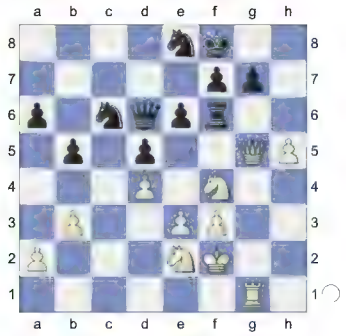


16.Nf4! Taking the h5-square away from Black's knight in the event of g4-g5 and also facilitating ideas of Nd3. **16...Ne7 17.g5 Nd7** Two good knight moves from Kiewra, keeping lines closed as much as possible, but even here White's game is the more pleasant. **18.gxh6!? Rxh6 19.Qg1 Kf8 20.Qg5** White simply wants to bludgeon his way through on the g-file. **20...Nf6**



21.Rhg1 Ne8 22.h5 Rc4 23.b3 Rc6 24.Nce2! My engine isn't convinced, but this retreat retains a pleasant edge to my eyes. After all, if the queenside opens up with Black still having a rook on h6... **24...Rf6** A slightly strange move as even on f6 the rook will not find it too easy to get into the game.

25.Rxc6 Nxc6



26.Rc1 Ne7

[Without the rook on f6, Black might even try ...e5 at some point, but here 26...e5? 27.Rxc6! Qxc6 28.dxe5 Rh6 29.Nd4 Qc7 30.e6 would be rather sub-optimal.]

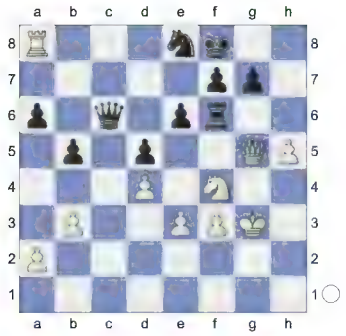
27.Ng3 Naroditsky continues to calmly improve his pieces. Kiewra's position is still very solid, but such a gradual building up of the pressure can quickly crack even such an edifice. **27...Nf5 28.Rc8?!**

[White can't resist the chance to invade, but he should really have continued his patient approach with 28.Nxf5 Rxf5 29.Qh4 .]

28...Qd7 29.Ra8?! Nxg3

[Time trouble, quite possibly, as here 29...Nfd6! would have been a little awkward, and if 30.Rxa6 Qb7 31.Ra5 Qc7 with a perpetual attack on the rook.]

30.Kxg3 Qc6



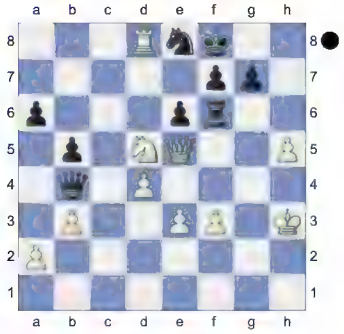
31.Rd8 Qc1

[Going active makes a lot of sense. Kiewra may also have wished to avoid 31...Qc7 32.Rxe8+! *(32.Ra8 Qc6* repeats *)* 32...Kxe8 33.Qxg7 , but after Ke7 34.h6 Rxf4! 35.exf4 Qc1 Black seems to be in time to scramble a draw.]

32.Qe5 Qe1+ 33.Kg2 Qd2+?

[Losing on the spot, although the path to the draw was perhaps not so obvious: 33...Rxf4! 34.Qd6+ Kg8 35.Rxe8+ Kh7 36.Qxf4 leaves White a rook ahead, but unable to escape the checks after Qe2+ 37.Kh3 Qf1+ 38.Kh4 Qh1+ 39.Kg4 f5+ 40.Kg5 Qg1+ .]

34.Kh3 Suddenly there are no more checks and so White wins, either thanks to the check on d6 or the game continuation. **34...Qb4 35.Nxd5!**



A most deadly fork.

(a novelty and sensible way of dealing with the kingside situation) 11.Rg3 *(11.Ng7+ Kf8 12.Rg3 Bd6 13.f4 Be7* should be fine for Black*)* 11...Qh4 12.Rh3 Qg5 13.Rg3 Qh4 14.Rh3 Qg5 15.Qf3!? saw White spurning the repetition and Black being OK after Bd6 16.0-0-0 Bd7 followed by castling long in Aravindh-Shuvalova, Ciutadella de Menorca 2024.]

5...b5

[I've never been entirely sold on this follow-up in the Jobava-Prie, preferring to see ...a6 as a prophylactic device designed to keep

White out of b5, then follow up with the other queenside pawn advance, namely 5...c5 . Here 6.g4!?

A) _____ despite being played by an experienced Croatian Grandmaster, 6...h6?! 0.44/18 6...Qd8-b6 -0.21 only looks weakening after 7.Qf3! and Nc6 8.Nge2 b5?! 9.g5 cxd4 1.00/19 *(9...Nd7!± 0.33/17)* 10.Nxd4± Nxd4 11.exd4 hxg5 12.hxg5 Rxh1 13.Qxh1 was already something of an opening disaster for Black in Koepke-Palac, Austrian League 2024, which may go to show that even in 2024 the Jobava-Prie still contains some surprise value;

B) 6...Qb6! 7.g5! Qxb2 8.Nge2 Nh5 9.Rb1 Qa3 10.Bh2 left White with lasting play for the pawn in Komodo Dragon-The Baron World Computer Championship, Vienna 2022 - see the Archive.]

6.g4! A consistent and fairly strong advance. **6...b4!** And this too is consistent and critical. **7.Na4**

[Clamping down on c5 certainly improves over 7.Nce2? -0.36/18 7.Nc3-a4 0.18 Nxg4 8.Ng3 Nf6 9.h5 -0.86/17 *(9.Nh5∓ -0.50/17)* 9...h6 , which didn't give White enough for the pawn in Fiorito-Esmeraldas Huachi, Titled Tuesday Blitz 2023.]

7...Bd7 Challenging the knight so is by no means forced, but is certainly quite critical. **8.Nc5** -0.33/17

[As Pranav may have realised in advance, now Black is better, something which isn't the case after 8.c4! dxc4 9.Bxc4 when, for instance, Bd6 10.g5 Nd5 11.Bxd5!? exd5 12.Ne2 would lead to a classic case of chances for both sides, Black's unopposed light-squared bishop offsetting the hole on c5.]

[8.c4= 0.11/19]

8...Bxc5∓ 9.dxc5 Nc6 White might have the bishop-pair, but her problems are clear: Black has the centre and also a lead in development. **10.Bg2**

[The alternative was 10.g5!? Ne4 11.Nf3 when Qe7! *(11...Nxc5 12.Ne5 0-0 13.Rg1* menaces aggression on the kingside and must supply some compensation*)* 12.Bxc7 Nxc5 slightly favours Black, with ...Rc8 and/or ...Ne4 on the way.]

10...Ne4

Simply going after the weakling on c5. **11.Bxe4?!**

[A definite concession and it's notable that the engines prefer 11.Ne2 Nxc5 12.Rc1! when White will at least get c2-c4 in and have some play, if not quite enough for the pawn.]

11...dxe4 12.Bg3 Qf6? 0.01/20

[An overly ambitious move from the young Indian Grandmaster. Black would just have been doing pretty well after 12...f6 13.g5 e5 followed by ... Qe7 or 14.Qh5+ Ke7!? .]

[Black should play 12...f6∓ -0.78/19]

13.Rb1? -1.67/19 White is now going downhill.

[White won't get a second chance after this. Kazarian absolutely had to keep her Jobava-Prie bishop alive with 13.Bxc7 when Qxb2 14.Ne2 would just have been rather unclear and with White certainly not looking worse after, for example,. Repels Qb2-c3+ h6 0.01/19 *(14...Rc8!∓* -0.36/19 should be considered. *15.Bd6 Ne5)* 15.Kf1!?= Qf6 16.a3 .]

14...exf3 15.Qxf3 Qg6!

Calmly emphasising how White's position is just rather shot on the light squares. **16.Bxe5** -3.64/21

[Likewise, while the game would have continued, it's hard to imagine that White would have survived after 16.g5 Qxc2 17.Rd1 0-0-0 ...Bd7-f5 would now be deadly. 18.Rh2 Qf5 .]

18.h5!? -4.09/22 White is weak on the light squares

[18.Bf4 -2.52/19 is a better defense.]

18...Qe6

[18...Bxh5 was also very playable and after 19.Qxg6 *(* or *19.Qh3+* -6.32/20 19.Qg2xg6 -4.11 *Bg4)* 19...Bxg6 20.Bf4 Bxc2 Black would surely have won.]

[Richard Palliser]	

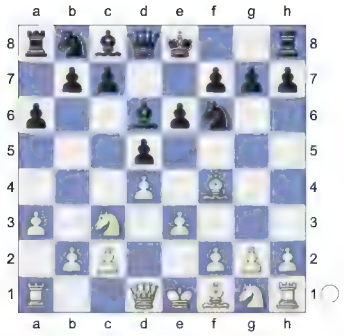
1.d4 Nf6 2.Nc3 d5 3.Bf4 a6
Sensibly ruling out Nb5 ideas once and for all, but Black has a whole host of alternatives, including:
[a) 3...Bf5 4.Nb5!? is a new idea for us and one employed twice in the recent rapid match So-Praggnanandhaa. So appeared far from his best in Leon and after Na6 5.e3 e6 6.c4 c6! *(* deviating from their first game where *6...Be7 7.a3 0-0 8.c5! Ne8?! 9.b4 c6 10.Nc3 Nb8 11.g4 Bg6 12.Nf3* had left White calling the shots in So-Praggnanandhaa, 1st matchgame Leon (rapid) 2018, only for Black to later claim a memorable scalp*)* 7.Nc3 Nb4 8.Rc1 Qa5 9.Qd2 dxc4 10.Bxc4 Nbd5 Black had quite a reasonable version of a Cambridge Springs in So-Praggnanandhaa, 1st matchgame, Leon (rapid) 2018.]
[White has also struggled a little of late after 3...e6 4.e3 *(4.Nb5* has been played here too - see the Archive *)* 4...Bb4 5.Bd3 c5 6.dxc5 , with Nbd7 *(* as I've mentioned before, *6...Bxc3+!? 7.bxc3 Qa5* must be pretty critical and this turned out fairly well for Black in Jayakumaar-Sandipan, Bhubaneswar 2018: *8.Bd6 Nbd7 9.Ne2 Nxc5 10.Qb1?! Nfe4 11.Bb5+ Bd7 12.Bxd7+ Kxd7 13.Bxc5 Nxc5 14.0-0 Rhc8* and White continued to suffer on the queenside *)* 7.Nge2 Bxc5 *(* by no means forced instead, *7...Nxc5 8.a3 Nxd3+ 9.Qxd3* gave White a definite edge in Jobava-Shalamberidze, Georgian Team Championship 2014, as we saw at the time,*;* but there's absolutely nothing wrong with *7...0-0* , and if *8.Bd6 Re8 9.Bb5* even *b6!?* is possible, intending *10.Bc6 Ba6! 11.Bxa8 Qxa8 12.0-0 bxc5 13.Bg3 e5* with a big centre and some initiative for the exchange*)* 8.0-0 Nh5! 9.Bb5?! *(9.Nb5 Nxf4 10.exf4 0-0 11.Nbd4* isn't inspiring for White, but was better than giving away both bishops*;* quite possibly simplification with *9.Na4 Be7 10.c4* is his best policy *)* 9...Nxf4 10.Nxf4 a6 11.Bxd7+ Bxd7 12.e4 d4 13.Nce2 Bc6 14.Ng3 h5!? leaving him unable to close the position to favour his knights and so worse in Aravindh-Kanarek, Warsaw 2018.]
4.e3 e6 5.a3!?
[A new move for us played so early, although the idea and following moves are thematic enough. Before we saw 5.Bd3 c5 6.dxc5 Bxc5 7.a3 Nc6 8.Nf3 0-0 9.0-0 h6 10.e4 , which left Black with an extra ...h6 over our main game in Prie-Arnaudov, Lyon 2017 - see the Archive.]
5...Bd6

(Diagram)



6.Nf3 0-0

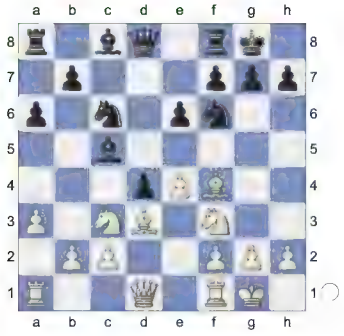
[6...Bxf4 7.exf4 would but increase White's grip over e5, although b6 8.Bd3 c5 should not be too terrible for Black, as d4 is less secure than in related London lines (where White has c2-c3 available).]

7.Bd3 c5 Thematic, but Black is about to lose a tempo with his dark-squared bishop. **8.dxc5 Bxc5 9.0-0 Nc6 10.e4** And Horvath meets Black's thematic break with one of his own. **10...d4**

[A new move. Previously, 10...Be7 11.Re1 dxe4 12.Nxe4 Nd5 13.Bg5!? h6?! 14.Bxe7 Qxe7 15.c4! Nf4 would have left White doing well in Akdag-Reimanis, Copenhagen 2017, had he now found 16.Nd6! .]

[Perhaps Black should, though, maintain the tension, with 10...h6!?]

[and even 10...Re8 not without merit.]



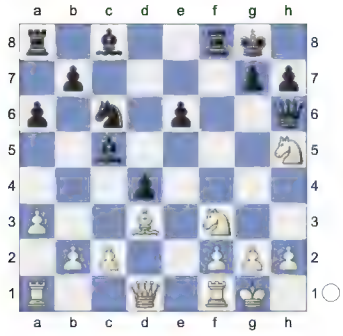
11.Ne2 Nh5 Otherwise, White would just have begun to take over after Ng3 and/or b2-b4. **12.e5!** The experienced Hungarian Grandmaster gives up the bishop-pair in return for a lead in development and attacking chances. **12...Nxf4 13.Nxf4** White menaces Nh5 followed by Qe2-e4, hence Black's next. **13...f6! 14.exf6** would transpose to the game.

[Natural, although 14.Bc4!? Qe7 15.Nd3 also feels like it should give White a pleasant enough edge.]

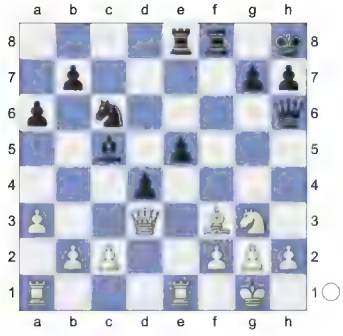
14...Qxf6

[Likewise, if 14...Rxf6 15.Nh5 Rh6 16.Ng3 with an edge for White due to his central control, better structure and safer king position.]

15.Nh5 Qh6



16.Ng3 e5 17.Be4 Horvath takes the opportunity to improve his bishop. Vrolijk is gunning for an opposite-coloured bishop scenario, but even that won't give him anything like equality. **17...Bg4 18.Qd3 Bxf3 19.Bxf3 Kh8 20.Rfe1 Rae8**



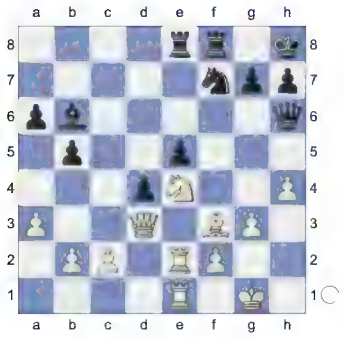
21.Ne4 Ba7 22.g3

[Useful and natural enough, although it should be noted that the unexpected 22.c4!? was perhaps even better. After dxc3 23.bxc3 White's queenside pawns are split, but he controls d4 and will attack down the b-file.]

22...Nd8?!

[I'm not totally sold on this manoeuvre. 22...Qg6 23.Bg2 Rc8 looks like a stouter defence, possibly followed by ...Na5.]

23.Re2 Nf7 24.Rae1 Horvath impressively continues to tidy and improve his pieces, all the while retaining full control over the position. **24...b5 25.h4!** It's finally time to expand. **25...Bb6**

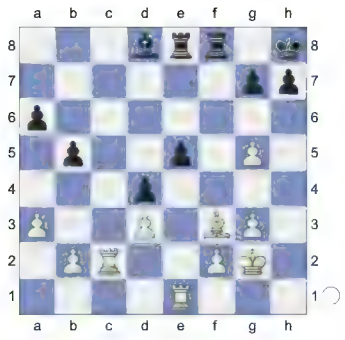


26.Kg2 Qg6? Black's position was grim in any case with a3-a4 on the way, but now White is able to force a favourable transformation. **27.Ng5! Qxd3**

[27...Qh6? 28.Nxf7+ Rxf7 29.Rxe5 would pick off a pawn, and that just for starters.]

28.cxd3 Nxg5 29.hxg5 And so Black has his opposite-coloured bishop scenario, but that is the end of the good news for him: only one bishop is really playing and White's rooks are much the more important. **29...Bc7 30.Rc2 Bd8**

(Diagram)

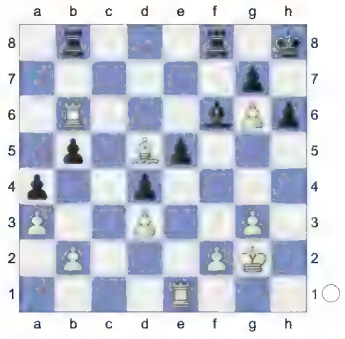


31.g6! h6?!

[Now Black's king will be well and truly jammed in the corner, but he could hardly allow 31...hxg6? 32.Bc6 Re7 33.Bd5 when the open h-file would prove decisive.]

[As such, 31...Bf6 32.Bb7 *(32.Rh1!? h6 33.Bd5 Rd8 34.Bf7* is also quite tempting *)* 32...Re6 33.gxh7 Rb6 was likely the last real chance to mount a defence.]

32.Bd5 Bf6 Just compare the bishops and now White will invade with his rooks. **33.Rc6 a5 34.Ra6 a4 35.Rb6 Rb8**



Not such a premature resignation in my view. Indeed, if you input the moves **36.Bb7 Rfc8 37.Rxb5 Rc2 38.Bc6 Rxb2 39.Rxb2 Rxb2 40.Bxa4 Rb8**

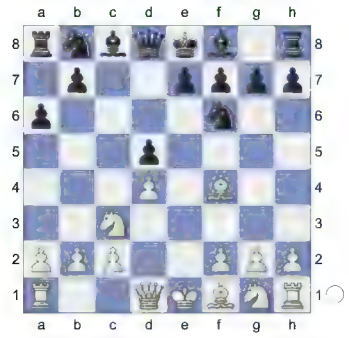
Gibraltar Masters 2020 (4.45) 24.01.2020
[Richard Palliser]

1.d4 Nf6 2.Bf4 d5 3.Nc3 c5 4.e3 cxd4

[The correct move order if Black wants to play this way, since 4...a6?! can be met by 5.dxc5! Nc6 6.a3 - see Nakamura-Fressinet, Dubai (rapid) 2014.]

5.exd4 a6



This Exchange Caroesque handling from Black hasn't been too popular of late, but remains a simple and sensible approach and we shouldn't forget that it was also advocated by M. Prié against his own weapon. **6.Nf3**

[Invariably played these days, although there was once some testing, including by Carlsen, of 6.Bd3 Nc6 and then both knight moves to e2 - see the Archive.]

6...Nc6

[Still following the Prié-approved method. Levon Aronian recently preferred 6...Bg4 , but after 7.h3 Bxf3 8.Qxf3 Nc6 9.0-0-0 e6 10.g4! Rc8 *(*a new try *10...Bb4 11.Ne2! Qa5 12.Kb1 Ne4 13.Nc1!* favoured White in Rapport-Sutovsky, Tromso Olympiad 2014, as we've seen before,*;* as well as that *10...Bd6* is probably Black's best move*)* 11.g5 Nd7 12.h4 Qb6 13.Qe3 Bb4?! 14.Nxd5 *(*tempting, but *14.a3! Bxc3 15.Qxc3 0-0 16.h5* would have left White with the bishops and complete control *)* 14...Qa5 15.Bc4 0-0 16.Nf6+! Black found himself facing a dangerous attack in Artemiev-Aronian,

Internet (blitz) 2019.]

7.Ne5 Ever a thematic leap in such positions. **7...Bd7**

[Ruling out any structural damage on c6. White's last was also directed against this light-squared piece, with 7...Bf5 8.g4! Bg6?! 9.h4 a position Black is advised to avoid.]

8.Qd3

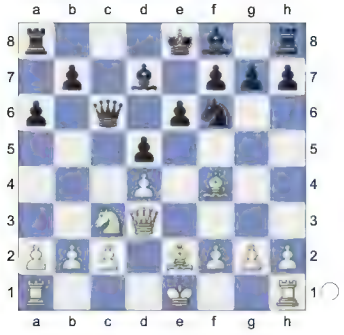
[Trent is happy to follow his earlier choice. I was delighted if not that surprised to see Lc0 already suggesting 8.h4!? here,]

[but while not totally ridiculous 8.g4 e6 9.g5 Nxe5! 10.Bxe5 Ng8 11.h4 probably just leaves White overextended.]

8...e6 9.Be2 Qb6 10.Nxc6

[A positional method and it's not hard to see why the commentator and strong IM didn't want to allow Black obvious attacking chances after 10.0-0-0 Rc8 11.a3 .]

10...Qxc6



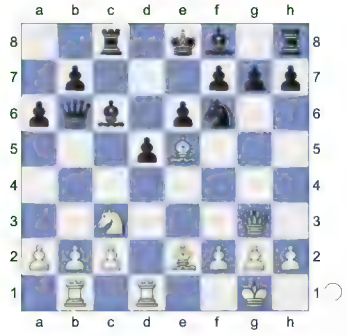
11.0-0 Rc8 12.Qg3!?

[A novelty as well as the move White would really like to play. Trent had previously first gone 12.Rfc1 , which makes a strange impression, even if it does free the c3-knight for duties elsewhere, and after Bd6 13.Be5 0-0 14.Qg3 Bxe5 *(14...Ne8!?* followed by ...f6 looks pleasant enough for Black*)* 15.dxe5 Ne4 16.Nxe4 dxe4 there was no amazing reason for White to reject the natural 17.Qe3 in Trent-Dragnev, Sitges 2019.]

12...Qb6 It would be interesting to know if Abergel had checked 12 Qg3 in his prep, but this is certainly a critical response. **13.Rab1!** The right pawn to defend. **13...Qxd4 14.Rfd1 Qb6 15.Be5** White's dark-squared bishop radiates power and Black faces issues untangling, which, at least from a practical perspective, should grant White sufficient compensation. **15...Bc6**

[Black frees d7 for his knight, but notably the only move which worries the engines is the radical 15...h5!? . With 16.h3 Rh6 17.b4 h4 18.Qf4 Nh5 19.Qd2 Bd6 Black has succeeded in developing his kingside, but White does have 20.Nxd5!? exd5 21.Bd4 Bf4 *(21...Qd8 22.Bxh5 Rxh5? 23.Qe2+* is the main point*)* 22.Bxb6 Bxd2 23.Rxd2 Rxb6 24.Bxh5 when Black is slightly for choice, but play is most likely to end up as a draw.]

[15...Qd8 was also far from ridiculous, when 16.b4 again looks like the right move to try to involve all White's pieces.]



16.b4! Nd7?

[Now Black will be put to the sword.

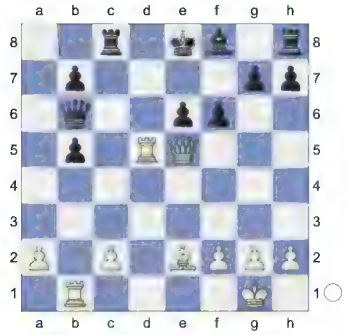
Amazingly 16...h5!? is still touted by the silicon beast, when 17.b5 axb5 18.Nxb5 Ne4 19.Qf4 Qd8 offers the exchange in return for a fair degree of stability.]

17.b5 Nxe5

[17...axb5!? 18.Nxb5 Nxe5 would have avoided what occurs in the game, but also, of course, have allowed 19.Nd6+! Bxd6 20.Rxb6 0-0 when Black surely doesn't have quite enough for the queen.]

18.Qxe5 axb5 Saving the bishop, but now Black's position is blown into smithereens. **19.Nxd5 Bxd5 20.Rxd5 f6**

[20...Be7 21.Qxg7 exd5 22.Qxh8+ Bf8 23.Bxb5+ is also a massacre.]



21.Bh5+! Trent finishes clinically. **21...g6 22.Qxf6 gxh5 23.Rdxb5**

[And not, of course, 23.Qxh8?? exd5 .]

23...Qc6 24.Rxb7 There's even no need to take the rook. **24...Qd6 25.R7b6 Qd5**

World Junior Open 2015 (12.8) 14.09.15
[Richard Palliser]

1.d4 Nf6 2.Nc3 d5 3.Bf4 Bf5
[Another recent game in the Jobava-Prie (or should I say the Prie-Jobava?) saw 3...c5 4.e3 and now the pretty rare g6!? , which looks fairly ambitious to me. However, after 5.Nb5 (new and just in case you thought 3 Bf4 was a modern fad, in Hartmann-Moehring, Leipzig 1960, *5.Nf3 Bg7 6.Nb5 Na6 7.Be5 0-0 8.Be2 Qa5+ 9.c3 c4 10.Na3?! b5 11.0-0 b4* had given Black an early initiative of course, White should have preferred a2-a4 to the knight retreat) 5...Na6 6.dxc5 Bg7 7.Be5 0-0 the position seemed like a reasonable Barry for Black in Lenderman-Schroer, US Online League 2015, before 8.Qd4?! Nb8 9.Qd1 Na6?! (I wonder if this repetition really occurred, as here *9...Nc6 10.Bc3 a6 11.Nd4 Ne4* would have been pretty good for Black) 10.c4?! (*10.Nf3* would have been much safer) 10...Bg4 11.Nf3 Nxc5 12.h3 Bxf3 13.gxf3 Rc8 left the somewhat higher-rated white player already in grave danger of overextension.]

4.e3
[A new trend or just a sign that Black is fine after 4.f3 e6 5.g4 Bg6 6.h4 h6 , as we've seen on several occasions before? Only time will tell.]

4...e6 5.Nf3
[Another September encounter saw White switch back to 5.f3 , but after Bd6 6.Nge2 Nc6 7.Bxd6 (Colovic had earlier tried *7.g4 Bg6 8.h4 h6 9.Qd2* , but had possibly decided that *Nb4!? 10.Rc1 Nc6 11.Kf2 e5* was fine for Black) 7...Qxd6 8.Ng3 Bg6 9.Bb5 0-0 Black was at least equal in Colovic-Petkov, Kragujevac 2015. It feels strange to go f2-f3 if the kingside pawns aren't to be pushed, especially as Black can always hit back with a timely ...e5.]

5...a6
[5...c5?! 6.Bxb8 Qxb8 7.Bb5+ would be a little annoying, so Black first prepares the break.]

(Diagram)

6.Ne5 Nbd7 7.g4!?

[New and certainly more lively than the previously-seen 7.Bd3 .]

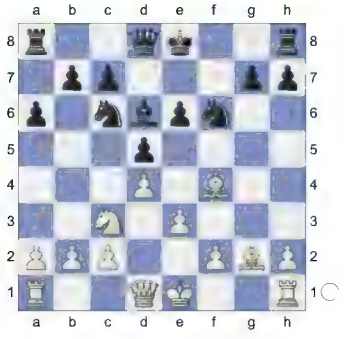
7...Nxe5!

[Black is right to take up the challenge, as now 7...Bg6?! 8.h4 would be a little awkward, and if Nxe5 9.dxe5 d4!? 10.exd4 Nd5 11.Be3 when there shouldn't be enough compensation for a pawn.]

8.gxf5 Nc6 9.fxe6 fxe6 An original and unbalanced position. White has the bishop-pair and a half-open g-file, but Black too is not without his trumps: he is very solid, might eventually exploit the f-file and can hint at ...e5. All in all, I suspect the position should be about equal and that who to prefer is really a matter of taste. **10.Bg2**

[10.Qd3 prepares aggression should Black go short, but after Bd6 11.Bg3 Qd7 12.0-0-0 0-0-0 13.Bh3 Kb8 14.Kb1 Rhf8 Black shouldn't be too badly off.]

10...Bd6



Sensibly trying to neutralise the bishop-pair and equally sensibly, White now improves his knight. **11.Ne2 0-0 12.0-0 Ne7?!**

[I'm not so sure about this and Black's next though. With White's knight back on e2, ...e5 is easier to achieve and 12...Qe8 would also have hinted at some timely kingside counterplay.]

13.Bg3 Nf5 14.c4! Opening up the bishop on g2 and so giving White a definite pull. **14...Kh8**

[This feels a little planless, but Iskandarov presumably couldn't find a great plan, and who can blame him? After 14...Nxg3 15.hxg3 c6 16.Qb3 Qd7 White is pleasantly better and might even expand with 17.f4 , Bf3, Kg2 and g3-g4,]

[while 14...Bxg3 15.hxg3 Qe7 16.Nf4 is also quite nice.]

[And note too that there was absolutely no time for the radical 14...c5? on account of 15.dxc5 Bxc5 16.Nf4 , hitting e6 and d5.]

15.c5!?

[Clamping and ensuring that White will land up with a bind on the position, but this was by no means forced with the calm 15.Qb3 one decent alternative.]

15...Bxg3

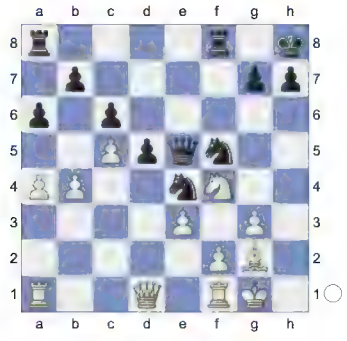
16.hxg3 c6 17.Nf4 Qe7

The one downside to White's 15th is that Black has gained a pawn break, but at

first one might assume that Chigaev has judged things well. **18.b4?**

[But this suggests that he may not have done. White should have inserted 18.Nd3 Nd7 , not to play after exchanges with a bad bishop against the knight on f5, but rather to counter with 19.Re1! . The point is revealed after e5?! 20.e4 when the tactics work for White, as shown by dxe4 *(20...Nxd4 21.exd5 Qf6 22.Rc1* is also surprisingly strong that knight on d3 really does glue everything together*)* 21.Rxe4 Rad8 22.Qa4 and Black continues to suffer: for example, Nf6 23.Rxe5 Qd7 24.d5! Nxd5 25.Bxd5 cxd5 26.Qxd7 Rxd7 27.Nf4 with a large advantage in the endgame.]

18...e5 19.dxe5 Qxe5 20.a4 White stakes everything on his queenside trumps, but Black too has cards to play. **20...Ne4**



21.Qc2 Rf6

[Tempting, although most certainly not forced. Indeed, I must admit that after the calm 21...Rae8 I might even prefer to take Black. He can keep recapturing with pieces in the event of exchanges on e4 and kingside threats will soon be imminent after ... g5.]

22.Bxe4! A big decision, but a good one. Chigaev realises that his king can cope without one of its defenders and so opens the d-file for counterplay.

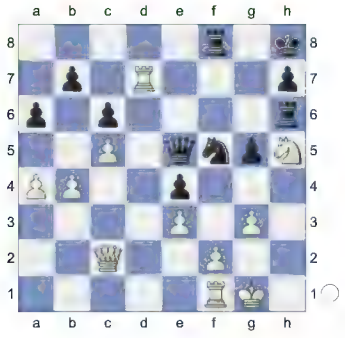
22...dxe4 23.Rad1 Raf8?

[Very natural, but too slow. Black should have preferred 23...g5 , and only if 24.Ne2 *(24.Nh5 Rh6 25.Qe2* seemingly echoes the game, but here Black has the sneaky *Rg8 26.Rd7 Nh4! 27.gxh4 Rxh5* when White can't take on h5 and so should head for a draw with *28.Qd1! Rxh4 29.Qa1)* 24...Raf8 leaving everything to play for.]

24.Rd7 Not only is b7 attacked, but White is also ready to go Qd1, strengthening his position on the kingside while facilitating a timely Rd8.

24...g5 25.Nh5 Now this is a well-timed and disruptive leap. **25...Rh6**

[Iskandarov never really lands a blow after this, so maybe he should have tried 25...Nxe3!? 26.Nxf6 Rxf6 27.fxe3 Qxg3+ 28.Qg2 Qxe3+ 29.Rf2 g4 . That said, it seems that White can do more than draw here, with the extremely calm 30.Kf1! Qc1+ 31.Ke2 Qc4+ 32.Kd1 Qb3+ 33.Rc2 indicated by the ice-cool silicon.]



26.Qe2 Ne7

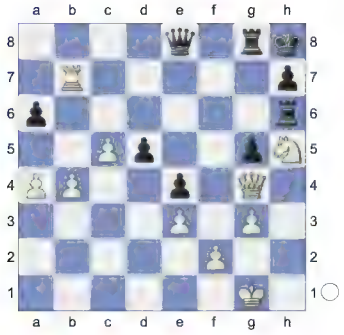
[And here the creative 26...Nh4!? 27.gxh4 Rg8 was worth consideration, although unfortunately 28.Kh1 Rxh5 29.Qxh5 Qf5

(the point of Black's play) 30.Rxh7+! Qxh7 31.Qxh7+ Kxh7 32.Rd1 seems to be a winning rook ending, as shown by gxh4 33.Rd4 Rf8 34.Kg1 h3 35.Rxe4 h2+ 36.Kxh2 Rxf2+ 37.Kg3 Rf7 38.Kg4 .]

27.Qg4 Nd5 28.Rxb7 White dominates the board in addition to the first pawn which has just fallen. **28...Rg8**

[Played to avoid 28...Qe8 29.Nf4 .]

29.Rd1 Qe8 Iskandarov comes up with the best try, but unfortunately for him, Chigaev has already prepared a strong counterblow: **30.Rxd5! cxd5**



31.Qf5 Neat. Both ways of taking the knight lead to mate and meanwhile White is all set to exploit his queenside trumps. **31...g4 32.Nf4 Qc6?** A blunder in a completely lost position. **33.Rb6**

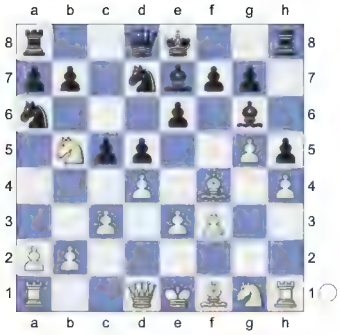
1.d4 d5 2.Nc3 Nf6 3.Bf4 Bf5
Two other recent games with the Prie-Jobava caught my eye too:
[a) After 3...e6 4.e3 Bb4 it will be interesting to see if Jobava goes back to 5.Bd3 , as we last considered in Jobava-Shalamberidze, Georgian Team Championship 2014, *(as 5.Nge2 0-0 6.a3 Bd6 7.g3!?* (a novelty the bishop won't be so bad on g2, but unless White can break in the centre his knight on c3 will appear misplaced) *b6 8.Bg2 Bb7 9.0-0 c5 10.Re1 Be7! 11.h3 Nc6 12.g4 Rc8 13.Qd2 a6* already left Black slightly for choice in Jobava-Caruana, Wijk aan Zee 2015. *)*]
[b) 3...a6 4.e3 c5 5.dxc5 e6 continues to be seen. That said, 6.Na4! should be a little better for White, as indeed Bxc5 7.Nxc5 Qa5+ 8.c3 Qxc5 9.Nf3 Nc6 10.Be2 0-0 11.0-0 Re8 12.Ne5 Nxe5 13.Bxe5 Nd7 14.Bg3 e5 15.Rc1 b5 didn't seem too bad for Black in Hector-Carlsson, Swedish League 2015.]
4.f3 e6 5.g4 Bg6

(Diagram)

6.h4 The typical kingside expansion and now Black must decide what to do with his own h-pawn. **6...h5 7.g5 Nfd7 8.e3**
[Keeping things solid as 8.e4 dxe4 9.fxe4 Bb4 10.Bg2 e5! gives Black sufficient counterplay, as we've seen before.]
8...c5 A logical counter, if far from forced:
[a) After 8...Bd6 9.Nh3 Nc6 10.Nb5 Bxf4 11.Nxf4 Bf5 12.Bd3 Ne7 Black was quite solid in Jobava-S. Zhigalko, Dubai (blitz) 2014.]
[b) 8...a6 9.Bd3 Bxd3 10.Qxd3 c5 is a how a few games have gone and now the critical 11.g6!? f6 12.Nge2 Nc6 13.a3 Qb6 14.Bh2!? 0-0-0 *(14...Qxb2 15.Kf2!* looks like decent compensation as *Qb6 16.Rab1 Qa7? 17.Nf4* is not really what Black wants to be doing*)* 15.0-0-0 left White for choice in Ipatov-Kantans, Tromso Olympiad 2014.]
9.Nb5! White should always have an eye on this leap in the Prie-Jobava. He may not win the bishop-pair, but does crucially free his c-pawn for action.
9...Na6 10.c3 Be7

(Diagram)

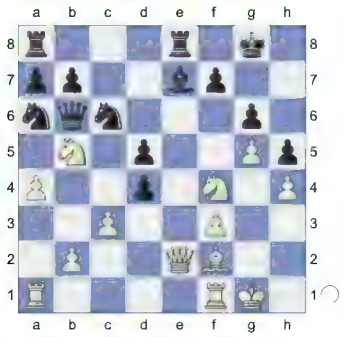


11.Bd3
[Of course, 11.Nd6+? would just have been repelled by Bxd6 12.Bxd6 Qb6 , so Nabaty prefers to swap off his opponent's more active bishop.]
11...Bxd3 12.Qxd3 g6 13.Ne2 Qb6 14.a4 Black has only played natural moves so far, but now that the knight as been cemented on b5, I think we might well say that White has a pull. For a while it seemed that the first player might lack central options (in terms of pawn breaks), but now it is Black who is struggling to break out. **14...0-0**
[One doesn't associate the year 2003 with the Prie-Jobava, but in an earlier game 14...Qc6 15.0-0 0-0 16.Rac1 *(16.Bg3* , and if *Nb6 17.Nf4* looks like the way to go*)* 16...Nb6 17.Qd1 Qd7 18.b3 had been seen, and now in Boguszlavszkij-Roberts, Budapest 2003, c4! 19.b4 Rfc8 20.Qc2 Nb8! would have enabled Black to obtain some much-needed counterplay with his a-pawn.]
15.Bg3! A nifty retreat. The bishop may come to f2 to support an advance of the e-pawn and White also has ideas of Nf4 and Nxg6. **15...Rfe8**

(Diagram)

16.0-0 cxd4
[Here 16...c4?! 17.Qc2 Ndb8?! would just have been far too slow on account of 18.Nf4 Kg7 19.e4 .]
17.exd4 e5 The Italian makes a spirited attempt to free his position, but remains unpleasantly worse nonetheless. In short, White's king is safer, his dark-squared bishop much the superior and Black's knight remains rather sidelined on a6. **18.Bf2**
[Perhaps not best. The position is pretty complex, but White might have done better to unpin with 18.Kg2!? Bf8 19.Rae1 .]
18...exd4
[An attempt to force the pace, but Black didn't have to release the tension with 18...Qe6!? 19.Kg2 e4 a worthy alternative.]
19.Nf4! Nabaty has realised that there's no need to recapture as he hits d5 and the tempo begins to rise. **19...Ne5 20.Qe2**
[Staying off the open e-file with 20.Qd1! would have been my choice, with the added bonus that Nc4? 21.Nxd5 Qc6 can now be met by 22.Qxd4 , and if Bc5 23.Nf6+ .]
20...Nc6?
[Too defensive or materialistic if you prefer. 20...Nc4! 21.Nxd5 Qc5 22.Nxe7+ Rxe7 would have cost Black his custodian of the dark

squares, but after 23.Qd3 Nxb2 24.Qxd4 Qc6 he would have obtained reasonable counterplay down the central files.]



21.Qc2 Qd8?

[And this completely missed the threat. The silicon prefers 21...Nc7 , although even here White remains clearly for choice after 22.Nxg6 Nxb5 23.axb5 Qxb5 24.Qf5! , and if fxg6 25.Qxg6+ Kf8 26.Qf5+ Kg8 27.Rae1 .]

22.Nxg6! fxg6 23.Qxg6+ Kf8

[23...Kh8? would have been even worse: 24.Qh6+ Kg8 25.g6 leading to mate.]

24.Qh6+ Kf7 25.Qh7+

[A disgusted Codenotti threw in the towel here, rather than wait for 25.Qh7+ Ke6 26.Rae1+ Ne5 27.Rxe5+ when various neat mates are possible, such as Kxe5 28.Bg3+ Ke6 29.Nxd4+ Kd7 30.Qf5# .]

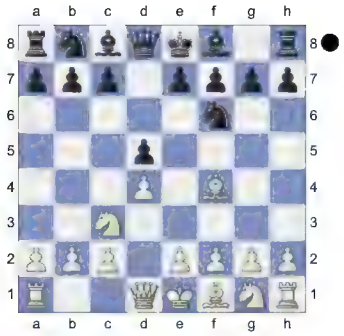
1.d4 d5 2.Nc3 Nf6 3.Bf4!? Diagram

(Diagram)



A very interesting line, which is becoming more and more popular lately. It looks a bit strange at first, but the main idea behind this line is to get unclear positions with a tendency towards tactical play. This approach is obviously more attractive to aggressive players, so it is not a big surprise that the top players who have tried this line are Jobava, Naiditsch, Rapport, and Miladinovic. The aim is to avoid the more "solid" and "boring" systems which can appear sometimes from openings like the Ruy Lopez or the Slav Defense, while also avoiding highly theoretical lines found in openings such as the Sicilian Defense. The trade-off is that White is often forced to take risks in trying to maintain an opening advantage.

3...e6 One of the main options for Black, trying to develop his pieces in logical way. The alternatives are: 3. ...Bf5 (Nabaty-Gomez Esteban 1-0 Benasque 2012, game 2 of this survey) 3. ...c6 (Rapport - Sachdev 1/2 Gibraltar 2014, covered in game 2 of this survey) 3. ...g6 (Prie - Lillo Castay 1-0 Catalonya chT 2013) 3. ...c5 (Hector - Andersen 1-0 Vaxjo 2013, presented below) 3. ...a6!? with 4. ...g6 (Jobava-Savchenko 1-0 Bronstein Memorial 2014, game 3 of this survey) or with 4. ...e6 (Jobava-Zhao Xue 1-0 Wijk Ann Zee 2014, presented in game 3 of this survey)

White can choose between several interesting options:

A) 4.e4 Nxe4 5.Nxe4 dxe4 6.d5 Nd7 This position resembles one that might arise from the Alapin with colors reversed. From an objective point of view, Black is probably fine here. But in a practical game, the position is completely unclear. *(6...g6 7.Be5)* 7.Qd2 *(7.Ne2)*;

B) 4.Nf3 Nc6 *(4...cxd4 5.Qxd4 Nc6 6.Qd3!)* 5.e3 cxd4 *(5...Bg4 6.dxc5 e6 7.Nb5 e5 8.Bg5)* 6.Nxd4 *(6.Nb5 Qa5+ 7.Qd2 Qxd2+ 8.Kxd2 dxe3+ 9.fxe3 Kd8)* 6...e6 7.Bb5 Bd7 8.0-0 Be7;

C) 4.e3 cxd4 *(4...Nc6? 5.Nb5)*

C2) 5.exd4 a6! It is important to prevent White from playing Nb5. 6.Nf3 Nc6 7.Ne5 Bf5 *(7...e6* is a more solid alternative, but then there is no great future for Black's light-squared bishop.*)* 8.g4!? Diagram

An interesting but risky continuation. White is fighting for the intiative!

C2a) 8...Bg6 9.h4 is bit unpleasant for Black. Actually this position can also arise from the Caro-Kann after : 1.e4 c6 2.Nc3 d5 3.Nf3 Bg4 4. h3 Bh5 5.exd5 cxd5 6.g4 Bg6 7. Ne5 Nc6 8.d4. 4.Nb5!? An interesting move, but it was probably better to start with 4.e3 (as played in the nice game Jobava-Andreev Al-Ain 2013 given below). I tried to force Black into the unusual development of his knight, but it costs me time to do so.

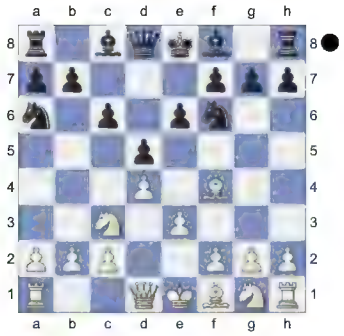
(Diagram)



6...Nc7?! The question is if White really wanted to take the knight on a6 or not? The answer depends on whether or not White could take control of the important c5-square after the exchange on a6. 3.Bf4 c5 4.e3 A somewhat calmer approach than going all the way to e4 and the typical Jobava-Prie follow-up.

4...cxd4

[The correct move order if Black wants to play this way, since 4...a6 5.dxc5! gives White definite chances for an edge, and if Nc6 6.Nf3, as in Williams-Melaugh, Bunratty 2019, *(*or even *6.a3!* , Nakamura-Fressinet, Dubai (rapid) 2014 - see the Archive for both encounters. *)*]

5.exd4 a6

[Black doesn't have to keep White out of b5 so, with 5...Bg4!? 6.f3 Bd7 an important alternative, after which 7.Bd3 *(7.Nb5 Bxb5 8.Bxb5+ Nc6* didn't seem too bad either for Black in Esipenko-Van Foreest, Wijk aan Zee 2021, as we've also analysed before *)* 7...Nc6 8.Nge2 Qb6 9.Na4 Qa5+ 10.c3!? -0.43/22 *(10.Nac3=* -0.01/21 *)* 10...e6 0.35/17 *(10...Nxd4 11.Nxd4 Bxa4 12.Qe2 e6 13.g4* offers White some compensation probably not enough from an objective perspective, but at blitz...*; 10...Nxd4∓* -0.43/22 *11.Nxd4 Nh5)* 11.0-0 -0.32/20 *(* White should play *11.Bc2±* 0.35/17 *)* 11...Nh5 *(11...Nxd4!? 12.Nxd4 Bxa4=)* 12.Be3 Bd6 13.Nc5! Qc7 14.g3 saw White invading the weakened dark squares to claim an edge in Jobava-Maksimovic, Internet (blitz) 2022.]

6.Nf3

[Just a quick reminder that 6.Bd3 Nc6 7.Nce2!?

A) interestingly Caruana copied Carlsen's approach in Caruana-Dobrov, Internet (blitz) 2022, where 7...Nb4!? 8.Nf3 Nxd3+ 9.cxd3!? Qa5+ 10.Bd2 Qb5 0.43/20 *(10...Qb6=* -0.23/19 *)* 11.0-0 -0.01/18 was perhaps even slightly better for White with Ne5 on its way *(11.a4±* 0.43/20 *Qxd3 12.Ne5)*;

B) 7...Bg4 8.c3 e6 9.Qd2 was preferred in no less an encounter than Carlsen-Bok, World Rapid Championship, Doha 2016.]

6...Nc6 7.Ne5 Thematically heading forwards and now Black needs to be a little careful. Inhibits Bc8-g4. **7...Bf5?!** 0.44/19

[Natural, but this runs into a strong rejoinder. As such, 7...Bd7! is the critical move - see Trent-Abergel, Gibraltar 2020, in the Archive.]

[7...Bd7= 0.05/18]

8.g4!± Another thematic move and one which seizes a useful early initiative. White is slightly better. **8...Bc8**

[A radical and new try. Unsurprisingly Black should avoid 8...Bg6? 1.19/19 8...Nc6xe5 0.46 9.h4 followed by structural ruin,]

[and 8...Nxe5 0.76/20 8...Bf5-g6 0.22 9.dxe5 is quite a dangerous temporary pawn sacrifice, as shown in Simon Williams' Chessable course on what he terms the Jobava London: Nxg4 *(or 9...Bxg4* 1.21/22 9...Nf6xg4 0.49 *10.f3 Nh5! 11.fxg4 Nxf4*

9.g5!

[Continuing to force the pace. 9.Bg2 also seems good,]

[as does 9.Nxc6!? bxc6 10.g5 Nd7 11.h4 .]

9...Ne4

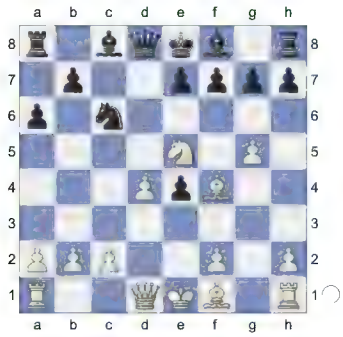
10.Nxe4 dxe4



11.c3 White is more active.

11...Nxe5 12.Bxe5 Qb6 1.09/20 Black is weak on the dark squares

[Better is 12...Qd5± 0.70/18]

13.Qd2? 0.31/18

[This rather routine move throws away a large chunk of White's advantage. 13.Qb3! Qxb3 14.axb3 followed by b4 and/or Bg2 would have been excellent for White,]

[as would 13.Bc4!? Qxb2 14.0-0 .]

[13.Bc4± 1.09/20]

13...Bf5 14.Bg2 h6! Stanojevic seizes his chance to break out. Suddenly Black is developing counterplay and White doesn't have time to just pick off e4, as I'm sure he'd hoped to do. **15.h4**

Yorkshire League (8.2)	02.04.2022

[Richard Palliser]

1.d4 d5 2.Nc3!? Having recently edited a book on the Jobava-Prie Attack, it made sense to avoid any preparation by wheeling it out. **2...Nf6 3.Bf4 a6 4.e3 Bg4?!**
[This simply loses a tempo compared with 4...Bf5 5.f3 *(5.Nf3!? e6 6.Ne5* was preferred in Bortnyk-Firouzja, Internet (blitz) 2021, where *Bd6?! 7.g4! Bxe5 8.dxe5 Nxg4* should have been met by *9.f3 Nh6 10.e4!* with promising play for White*)*

5...e6 6.g4 Bg6 7.h4 h6 , which sees Black getting in ...e6.]
[Black also has 4...e6 when 5.g4!? is a tempting continuation - see Hebden-Baker, Guernsey 2019, in the Archive.]

5.f3 Bh5

6.g4! Standard expansion in such positions of course. **6...Bg6 7.h4 h6 8.Bd3 Bxd3 9.Qxd3**
[Sometimes 9.cxd3!? is a good move, with the idea of ...c5 dxc5 Bxc5 d4, but here it makes more sense to facilitate long castling and early aggression.]

9...e6 10.Nh3!?
[This felt like the right square for the knight, hinting at g4-g5 while overprotecting the bishop on f4, but 10.0-0-0! was likely more precise, and if c5 11.dxc5 Bxc5 12.Nge2 followed by Nd4 with a definite pull.]

10...Bd6
[A hard move to criticise, but Black had shown the way in Petr-Svatos, Czech League 2017, where 10...c5! 11.g5 *(11.dxc5 Nc6 12.0-0-0 Bxc5* leaves the knight slightly misplaced on h3 *)* 11...Nh5 12.dxc5 Nc6 13.0-0-0 Bxc5 would merely have remained pretty unclear and hard to assess after 14.Bh2! Bd6 15.f4 .]

(Diagram)

11.0-0-0 Nc6!
[Obstructing the c-pawn, but necessary or at least Black could hardly have allowed 11...c5 12.g5 Nh5 13.Bxd6 Qxd6 14.e4 when the position is opening up much too quickly for him.]

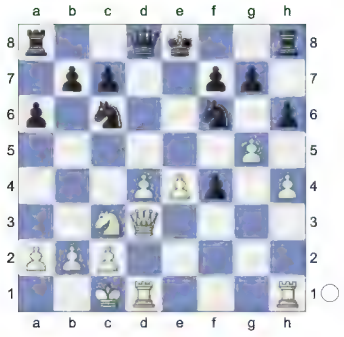
12.e4!? Getting on with it and continuing to raise the stakes, partly in a bid to exploit White's already large lead on the clock. **12...dxe4 13.fxe4**
[Once again forcing the pace, although I did also consider quieter methods, not least 13.Nxe4!? Nxe4 14.Qxe4 Qe7 15.Bxd6 cxd6 16.d5! , which should be a little better for White.]

13...Bxf4+ 14.Nxf4 e5! Gill responds critically. Otherwise, Black would simply be swept aside in the centre. **15.g5!?**
[Played after some thought. I also spent a bit of time on 15.dxe5 Qxd3 16.cxd3 Nxg4 , which didn't seem at all clear (and isn't),]
[but must admit that I totally overlooked the idea of 15.Nfd5! exd4 16.Qg3 . Perhaps surprisingly, White isn't winning here, although 0-0 17.g5 Nh5 18.Qf3 g6 still feels rather risky for Black to my eyes.]

15...exf4?!
[I was pleased to see this, if also expecting it. Black surely can't allow 15...Ng8 16.Nfd5 *(*or even *16.Nh5*

g6 17.Qf3! gxh5 18.Rhf1 Qd7 19.g6) 16...exd4 17.Qg3 ,]

[but the engines point out that 15...hxg5! 16.hxg5 Rxh1 17.Rxh1 Nd7 leaves White without a knock-out blow. There is 18.g6! exf4 19.gxf7+ Kxf7 20.Qc4+ Ke8 21.Qg8+ Nf8 22.Rh8 , but after Qf6!? 23.Nd5 Qg6! 24.Qxf8+ Kd7 25.Qxa8 Qg1+ Black escapes with a half-point.]



16.gxf6 Qxf6 17.e5!?

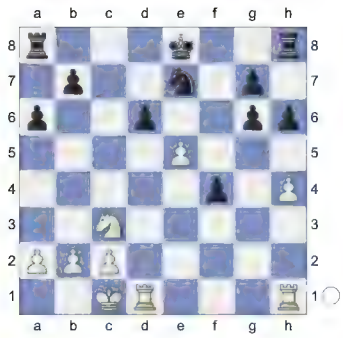
[I suspected that objectively Black would be able to defend after this and the resulting transition, but that in practice the task would prove far too much for him. In any case, I should really have spent longer here, not least as 17.Nd5! Qd6 *(17...Qd8? 18.Qb3!* is suddenly very awkward for Black, and if *Rb8 19.Nxf4 0-0 20.Qg3* with an ideal centre and huge attack *)* 18.Qh3 would have offered promising ongoing compensation.]

17...Qg6!

[Necessary unless Black wants to get crushed after 17...Qd8? 18.Qe4 0-0 19.Nd5 .]

18.Qxg6 fxg6 19.d5! It's high time to make maximum use of Delroy, not least with the e-pawn clearly taboo. **19...Ne7 20.d6 cxd6**

(Diagram)



21.exd6 Nf5 22.d7+! Kf7 23.Ne4 Menacing Nc5-b7 while also cutting out any ...g5 resources. **23...b6**

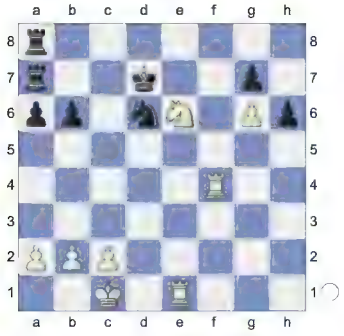
[Keeping White out of c5, but he actually might just have gone 23...Rhd8! and after, say, 24.Rhf1 *(24.Rhg1!?* was my idea, but *Ra7!? 25.Nd6+ Nxd6 26.Rxd6 b5 27.Rdxg6 Raxd7* seems to be fully tenable for Black*)* 24...Ke7 25.Rxf4 Rxd7 26.Rg1 Rad8 Black definitely wouldn't have been worse.]

24.Rhf1 Rhd8 25.Rxf4 Ke7?

[Finally cracking, missing my well-disguised 27th move. Instead, 25...Ra7 26.Nd6+ Kf6 would have left everything to play for, with 27.Nxf5 gxf5 28.Rd6+ Ke7 29.Rxb6 Raxd7 30.b4 a pretty random rook endgame if ever there was one.]

26.h5! Rxd7 27.Re1! As I'd realised some moves before, there just isn't a good square for Black's king and his knight on f5 is a major tactical liability.

27...Rda7!?
[27...Kf7 28.hxg6+ Kxg6 29.Rg1+ was one key point, picking off the knight.]
28.hxg6 Nd6 Played with just seconds left. I failed to find an immediate knock-out for White, but thankfully it wasn't too hard to pick between the various tempting options I could see. **29.Nc5+**
[Simple chess, although I should really have found 29.Nf6+ Kd8 30.Nd5! .]
29...Kd8 30.Ne6+ Kd7



31.Nxg7 Rg8 32.Nf5 Rxg6?
[Losing immediately, not that 32...Nxf5 33.Rxf5 Kd8 34.Re6 Rag7 35.Rff6 would have changed the result.]
33.Re7+ Kc6 34.Rxa7

D00: 1 d4 d5: Unusual lines
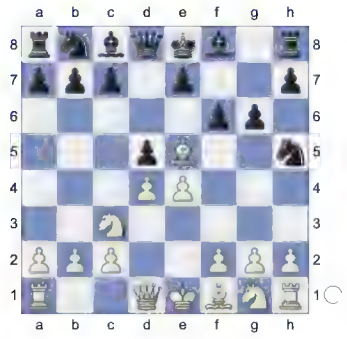
1.d4 d5 2.Bf4 Nf6 3.Nc3 From the London into the Jobava-Prie... **3...Nh5?!** A new move for the site and, frankly, if this leap to the edge was good, White's opening would be much less popular than it is. **4.Be5!?**
[Angling to induce ...f6. The alternative is 4.Bg5 when notably Stockfish simply wants to go 4...Nf6 and play a Veresov a tempo down, assessing White as only very fractionally better (I'll blame the knight on c3!). Humans though have tended to prefer h6 when 5.Bh4 g5 6.e3! is a key motif, giving White a pleasant edge: for example, Nf6 7.Bg3 Bf5 8.Bd3 e6?! 9.Nf3 *(9.Bxf5! exf5 10.Qf3 Qd7 11.Be5* leaves Black's position creaking *)* 9...Ne4?! 10.Bxe4! dxe4 11.Nd2 with some advantage for White, if eventually a 114-move draw in Naroditsky-Holt, Titled Tuesday Blitz 2023.]
4...f6
[Consistent at least, whereas 4...Nc6?! 5.e4! Nxe5 6.Qxh5!? *(the simple 6.dxe5 Nf4 7.exd5* is just an extra pawn*)* 6...Nc6 7.exd5 Nxd4? *(7...g6 8.Qd1 Nb4* was essential*)* 8.0-0-0 Nf5 9.Bb5+ was effectively already all over in Fiorito-Curtis, Titled Tuesday Blitz 2023.]
5.e4! Breaking so with tempo must be critical in turn. **5...g6**

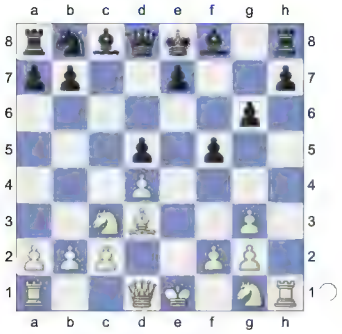


6.Bg3 Nxg3?!
[Black didn't have to grab the bishop just yet and if you really do want to try and make 3...Nh5 work, I suspect 6...dxe4 is the move here when 7.Nxe4 Nc6!? and ...Bc8-f5! should not be overlooked 8.Nf3 Bf5! 9.Bd3 Nb4 10.0-0 followed by Re1 shouldn't be more than a little better for White.]
7.hxg3 c6
[Black also suffered after 7...dxe4 8.Nxe4 Bg7 9.Bc4 Nc6 10.c3 Na5 11.Bd3 , which continued to leave his light squares looking quite vulnerable in J.Horvath-Huemmer, Arco 2019.]
8.exd5 Opening lines makes a lot of

sense considering Black's lack of development and badly weakened kingside. White is more active. White is slightly better. **8...cxd5 9.Bd3 f5?** 2.10/20

[Preventing the threat, but Black really needed to do so with 9...Kf7! when 10.Qf3 Nc6 11.Nge2 Nb4 0.97/19 would have seen him grovelling on. *(11...e6± 0.55/19)*]

[9...Kf7!± 0.40/20]



10.g4!+- Fletcher needs no invitation to continue his assault on the light squares and against the black kingside. **10...e6**

11.Qf3

[Hardly bad, but the straightforward 11.gxf5 exf5 12.Qe2+ Be7 13.0-0-0 would just have been pretty strong.]

11...Nc6 12.Nge2 0.84/20

[12.gxf5 Nxd4

12...Bg7?

[Returning the favour. 12...fxg4 13.Qxg4 and Bd3xg6+ should not be overlooked Qf6! would have minimised the damage and only left Black slightly worse.]

13.gxf5 exf5 1.75/18

[Likewise, 13...gxf5 1.63/19 13...0-0 1.27 14.Qh5+ 1.12/19 *(White should try 14.g4+-* 1.63/19 *)* 14...Kf8± 15.g4]

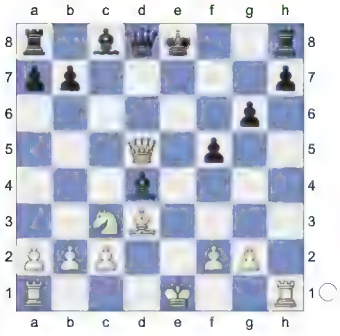
14.Qh3 0.78/21 *(⌓14.0-0-0!* 1.46/19 *)* 14...exf5± 15.0-0-0!? would have left Black in some trouble.]

[13...0-0± 1.09/20]

14.Qxd5 Removing a big central pawn while retaining the initiative. **14...Nxd4?** 4.40/21

[The final mistake. Black either

needed to grovel with 14...Qe7]
[or 14...Qxd5 2.05/19 14...Qd8-e7 1.49 15.Nxd5 Rb8 , rather unpleasant though both would have been.]
[14...Qe7± 1.59/19]
15.Nxd4 Remove Defender. White is clearly winning. **15...Bxd4**
[Now, of course, 15...Qxd5 16.Nxd5 Bxd4 17.Nc7+ just wins material.]



Black is weak on the light squares
16.Bb5+ And that was pretty much that, Fletcher now finishing in brutal fashion.

What happens now will decide its course until the end.' **6...Nxh5?** 1.53/20 QUESTION: Any better idea for Black? And how should White react to the game move? (the comments below and Hebden's next move will provide answers)
I remember years ago grandmaster William Watson, a former British Champion who Spassky endearingly called 'the drunken machine-gunner', scolding me in a post-mortem. I had responded to his attack on my king with some overly passive moves and he wasn't impressed: “You were looking for a miracle playing like that. It's just what I wanted. You get no counterplay and I get to attack like crazy.”
I can't help recalling these words when I ponder Black's decision to allow the h-file to be levered open. James Moreby, at the time of this game already one of the best young players in England, won't get to show any of his skill. From now on he has to sit there while his opponent prepares an attack.
In other words the initiative is fully in Hebden's hands. But there will be nothing 'crazy' about his forthcoming manoeuvres. White will build up his forces methodically until the pressure proves too much. Indeed why should he hurry when Black is doing nothing active?
ANSWER: Remember we said that Hebden allowed himself a quick wing attack because of the quiet situation in the centre. But just how solid is the white structure there? We might note that his knight on c3 is blocking the strengthening move c2-c3, meaning that d4 is slightly under-defended. Neil McDonald,MH: 'QUESTION: Any better idea for Black? [For this course, I have chosen a classical approach. In my previous course on the Magnus Queen's Gambit, I chose to recommend a system with ...Bf5. I still definitely believe this is a great system for Black, but in regards to the rest of our repertoire, and especially our setup against the London, [/course/140404/12] I believe the mainline and classical approach with 3...c5 makes the most sense.

A) 4.e4 In interesting sideline, advocated by Hans Niemann in his LTR Jobava London course. I actually used to play quite a bit myself in blitz and rapid during 2016-2017, but my opinion has not really changed since then. It's a very decent surprise weapon, especially for shorter time controls, but if we are prepared against it, it's hardly a challenging line. Nxe4 Important. Trading a set of knights secures us much more freedom. 5.Nxe4 dxe4 6.dxc5 Nd7 *(The most ambitious move! 6...Qa5+ followed by ...Qxc5 looks rather equal, but our move is aiming for a more complex fight.)*

A1) 7.b4 This keeps the c5-pawn alive forever but does not prevent our central break. e5 '!' This is already a big achievement for us. '!' '!' 8.Bg3 Be7 If we can finish development undisturbed, we will now just be better. 9.Bb5 The only move to disturb us. a6 '!' Forcing the issue. '!' '!' 10.Bxd7+ Bxd7

11.Bxe5 Forced, as otherwise, we would have a strong bishop pair for free. b6 '!' It's important that we do this before castling, as now the b4-pawn is hanging with check. It looks a bit loose with g7 also hanging, but the main point is that the position becomes open, favoring our bishops. '!' '!' 12.Ne2 *(12.Bxg7 Rg8* followed by ...Rxg2 only helps us. *)* 12...bxc5 13.bxc5 0-0 14.Bd6 Again, if we were allowed to take on c5 next, we would just be better. Bb5 '!' A good move, putting pressure along the b5-f1 diagonal. Next, we will pick up the c5-pawn (on c5 or d6), but White is likely able to get out in the meantime, so probably it's only equal. '!' '!'Maroczy Bind Ng4-Karup,E corr WC27/final 2011;

A2) 7.Qd4 Clearly the most interesting move, and the one given by Niemann in his course. 7...e5 '!' The first tactical blow! Now play gets really sharp. '!' '!' 8.Qxe4 *(8.Bxe5 Bxc5 9.Qxe4 Qe7* followed by ...f6 is definitely not what White wants.*)* 8...Bxc5 9.0-0-0 This requires some care. The White king is vulnerable long term, but we have some concrete issues due to the d-file pin and not having castled yet. Qh4 '!' Important, provoking g3 so White can't retreat the f4-bishop to a good square. '!' '!' 10.g3 Qe7 11.Be3 Now there is much less pressure on our e5-pawn, giving us more freedom. Nf6 '!' Superficially, this looks risky, as it allows an annoying check on b5, but it's important to act with force here before White can develop their kingside. '!' '!' 12.Bb5+ *(* The most challenging move. *12.Qa4+ Bd7* followed by ...O-O-O is perfectly fine for us.*)* 12...Kf8 '!' Looks risky, but we have it all under control. It's all about the momentum here. Later on, the king will find safety on g7 after we play ...g6. '!' '!' 13.Bxc5 Qxc5 14.Qc4 Qe7 '!' This is our deviation from Niemann's course. The trade of queens is obvious, but although Black is objectively fine, White has some initiative in the ending. Keeping the queens is much more challenging. We put our king on g7, and then we start our play along the c-file. To me, it looks like excellent counterplay. '!' '!' 15.Qe2 '!' '!' '!' *(15.Nf3 Bg4* followed by ...e4 is a disaster for White.*)* 15...g6 We are far away from the realms of the Slav, with an unusual position that might be a bit hard to grasp. In general, we want ...Kg7, ...Bf5, and a rook to c8. In the meantime, White will put pressure on our e5-pawn. We are happy to give it up in order to get our play going faster. All in all, it's sharp and very double-edged but certainly interesting to play. 16.--Maroczy Bind Ng4-Karup,E corr WC27/final 2011 *(16.Re1 e4 17.f3 a6* '!?' is an interesting way to get our play going. '!?' '!?' *18.Bd3* Utilizing the e-file pin. *Be6* '!' '!' '!' *19.Bxe4 Kg7*

Possibly followed by ...Bxa2!? next, but also just bringing the rooks to the center makes sense. White is struggling to activate the g1-knight, and the pawn deficit is not really felt at all. *)*;

B) 4.e3 The main move, and the way both Jobava and Carlsen play. 4...cxd4 In the London System chapter, I talked [/variation/22642673/#/7/b] a lot about how we were not so keen on entering the Carlsbad structure. With the knight on c3, things are a bit different, however. First of all, the knight is misplaced on c3 in the Carlsbad, as White prefers their pawn to support the center. Secondly, if we don't trade on d4, White can consider dxc5!? which makes it harder to regain the pawn due to the knight on c3 available to protect it. 5.exd4

B1) 5...a6 is the traditional move, and a solid one as well. It looks to me like it equalizes without any big effort, but I still prefer 6.Nf3 Nc6 7.Ne5 Bd7! 7...Bd7 is better than 7...e6. 7...Ld7 ist besser als 7...e6. 8.Be2 e6 9.0-0 Qb6 10.Nxc6 Bxc6 11.Rb1 Be7 12.Re1 0-0 13.Bd3 Rac8 14.Ne2N *(*Vorgänger: *14.a4 Qa5 15.Be5 g6 16.Re3 Nd7 17.Bf4 Qd8 18.Rh3 Bf6 19.Bd6 Re8 20.Qg4* 1-0 (57) Alekseenko,K (2696)-Stevens,C (2260) Chess.com INT 2020*)* 14...Bb5 15.c3 Bxd3 16.Qxd3 Bd6 ½-½ Hornstein,L (1323)-Grabowski,P (1656) Verden op-B Velden 2023 (7);

B3b) 6.f3 The most common move. Our bishop does not have a great square to retreat to, but on the other hand, White can no longer play Nf3. 6...Bd7 Necessary, to cover the b5-square. The bishop is slightly clumsy here, but the pawn also looks really ugly on f3.

B3b1) 7.Bd3 The most common move in practical play and the favorite of Jobava himself. The computers hate such play for White, but we should not underestimate it, as it's easy to drift into an unpleasant position. Nc6 8.Nge2 Nb4! A good move. The d3-bishop is clearly White's best piece, so we make sure to trade it off. We will be slightly behind in development, but White has no way of opening up the position quickly. 9.a3 Forcing the issue, enabling

White to castle long soon. Nxd3+ 10.Qxd3 e6 11.0-0-0 (This was played in Jobava-Navara, 2021. Black was already slightly better, and indeed, went on to win a good game.) 11...Be7 Calmly preparing to castle. The remaining moves indicate how the game might develop rather than a concrete forcing line. 12.g4 The most natural way of attacking. 0-0 13.h4 Ne8! Remember this maneuver! White will anyway kick our knight away, so we might as well immediately reroute it. From d6 it can either go to f5, helping with the defense, or to c4, where it might create annoying threats toward the White king. Next up, ...b5-b4 is a dangerous idea to get counterplay.

D00: 1 d4 d5: Unusual lines **1.d4 d5**
In this Chapter, we examine the sidelines after 1.d4 d5. We have dedicated Chapters on theQueen's Gambit 2.c4 and on theLondon System 2. Bf4 - the chapter you are looking at now features everything you need to know about White's more offbeat tries. A word about move orders: some of the variations discussed in the current chapter can be played in two move orders by White. They can choose the direction on move two or on move three, including 2.Nf3 Nf6. Common examples are 1.d4d52.g3 and 1.d4d52.Nf3Nf63.g3, or 1.d4d52.e3 and 1.d4d52.Nf3Nf63.e3. I decided to cover all these cases the same way, having the lines split already on the second move. So in this chapter,

I use the move order 1.d4d52.e3 to cover all early e3 systems. In this Chapter, we examine the sidelines after 1.d4 d5. Attacking the centre with c2-c4 and then using the knight afterward is the play according to classical principles. The main line of the QGD 1.d4d52.c4e63.Nc3 shows exactly this school of thought. 2.Nc3 ignores these principles but instead focuses on a fast queenside development. Our approach against 2.Nc3 should be focused on playing a quick c7-c5 break ourselves, generating play on the queenside and, in particular, on the c-file. After our natural reply 2...Nf6, we have an essential split. White develops the knight in front of their c-pawn, which is a strategically risky decision in 1. d4 d5 structures. [Andrew Martin]

1.d4 Nf6 2.Nc3 d5 3.Bf4 g6 4.Qd2 c6 5.Nf3 Bg7

[Instead, after 5...Nbd7 an obscure position can be reached, with both players deliberately delaying castling: 6.h3 b5 7.a3 a5 8.e3 Ba6 9.Bd3 b4 10.axb4 Bxd3 11.cxd3! (keeping Black from occupying e4) axb4 12.Na4 Bg7? *(12...Ra6 13.0-0 Qa8* does not really help Black after *14.b3;* but even after *12...e6* I prefer White thanks to *13.0-0 Be7 14.Rfc1)* 13.Qxb4 and Jobava coasted to a win in B.Jobava-N. Vlassov, Internet (blitz) 2021.]

With a bit of juggling, we reach a Barry position where Black settles for the solid ...c7-c6. There cannot be anything wrong with this move, which dissuades White from castling queenside, after which a black attack will come very quickly. Jobava now moves in, Tarzan style. **6.Bh6**

[6.Ne5 is a good alternative and then launching with h2-h4. Bh6 can wait for the time being. Here Nbd7 7.h4 Nxe5 *(7...h5 8.f3* looks nice for White *)* 8.Bxe5 h5 9.0-0-0 b5 10.f3 Qa5 11.a3 *(*and not *11.Kb1? b4)* 11...Bh6 12.e3 0-0 13.Kb1 Qb6 *(or 13...b4 14.Na2)* 14.g4 hxg4 15.h5 g5 16.f4 (once under way, the speed of the attack is impressive) b4 17.axb4 Qxb4 18.fxg5 Bxg5 19.h6 Bf5 20.Bd3 Bh7 *(20...Rab8 21.b3 Bh7 22.Rdg1* is like the game*)* 21.Rdg1 a5 22.Bxh7+ Nxh7 23.Qd3 Qc4 *(*if *23...f5 24.Rxg4!)* 24.Qf5 1-0 was T.Rakic-O.Cvitan, Kladovo 1991.]

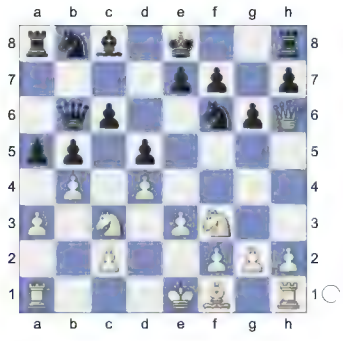
6...Bxh6 7.Qxh6 b5

[I think I prefer 7...Bf5 , inviting White to sacrifice a pawn. 8.Ne5 Bxc2 9.g4 Nbd7 10.Rc1 would then lead to complications: Nxe5 11.dxe5 Be4 12.f3 Nxg4 13.Qg7 Rf8 . Your guess is as good as mine as to what is going on here. I merely point out 14.fxe4? Qb6 as a sample variation.]

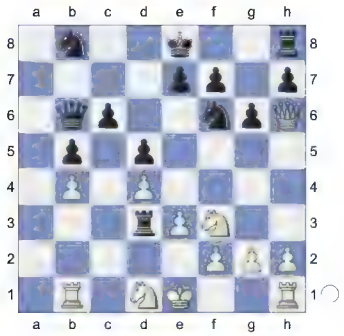
8.a3 Is there any real need to play this move?

[8.e3 seems OK to me, when Black can try to justify his early queenside aggression, but has no real threats: b4 9.Na4 Qa5 10.b3 Nbd7 11.Bd3 c5 12.dxc5 Nxc5 13.Nxc5 Qxc5 14.0-0 when Black is hampered by his inability to castle and therefore stands worse.]

8...Qa5 9.b4 Qb6 10.e3 a5



11.Rb1 axb4 12.axb4 Ra3 Black seems to be attacking with only one piece and still has to resolve the kingside position, but there are concrete threats to deal with. **13.Nd1** Jobava is always interesting to watch, but the game so far has a definite blitz feel to it. I should point out it is easier for White to castle in this position and that, from my chair, is why he stands better, even at the upcoming cost of a pawn. **13...Bf5 14.Bd3 Bxd3 15.cxd3 Rxd3**



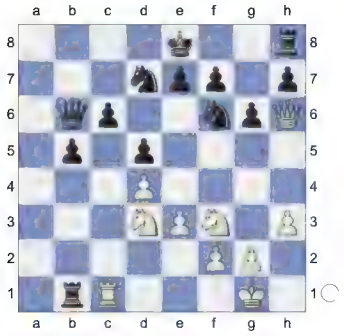
16.0-0 Ra3 17.Nb2!?

[I think I prefer 17.Ne5 Nbd7 18.f4 Nxe5 19.fxe5 Ne4 20.e6 f6 21.Qg7 , with confusion on the board.]

17...Nbd7 18.Rfc1 Rb3 19.h3

[19.Rc2 Rxb4 20.Rbc1 looks like a good alternative.]

19...Rxb4 20.Nd3 Rxb1



21.Rxb1 It is hard to take this game too seriously, given that it is played at high speed. Basically, from here, Black swindles himself. **21...c5** The time control sends the game haywire.

[21...Qa7 22.Rc1 Qa8 was less committal and perhaps Black is even better here.]

22.dxc5 Nxc5 23.Rc1 Nxd3 24.Rc8+ Kd7 25.Rxh8 Black can survive, despite the ominous white attack. **25...Qc5**

28.Qd8+ Ke6 29.Nd4+ Ke5 30.Qxe7#

[30.-- Summary: At the end of it all, what are we to make of the Tarzan Attack? The idea of Qd2 and Bh6 is crude and combative. I guess the issue for me is that there are just too many ways for Black to get good counter-chances, with 5...0-0, 5...Ne4 and 5...c5 at the top of my personal list. You play the Tarzan Attack at your own risk!]

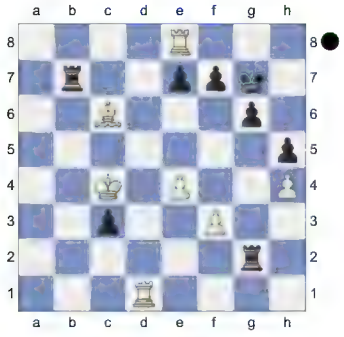
Summary: All of 5 h3, 5 h4 and 5 Ne5 are playable, with 5 h3 the favourite if I am forced to make a choice. Gazing into my crystal ball, I see a comparatively long future for 5 h3 at all time controls by comparison with the others, which, frankly, are just geared for blitz.]
[36.Rc1= 0.01/22]



. One can certainly try 5 Ne5. The likelihood is that the opponent won't have played against it before. It seems a good weapon for blitz. Positions are reached which are similar to the main lines already covered. While I have my doubts about the effectiveness of the idea when the time control slows down, I am willing to be proved wrong.

[Better than 10...Bb4 , as played in the previous game. Black prepares queenside castling by exchanging the dark-squared bishop, as the kingside is too dangerous a place for the black king.]

11.Be3 Perhaps influenced by the previous game he had played earlier against Sutovsky, Rapport again declined the exchange of dark-squared bishops. However, avoiding exchanges is not necessary.
[Indeed, after 11.Kb1 Qc7 12.Bxd6

Qxd6 13.h4 Rf8 14.g5 Nd7 15.Ne2 0-0-0 16.c3 White has a slight advantage as Black has little chance of counterplay. The natural break with ...e6-e5 leaves a weakness on d5, or if f6?! 17.Qg3! (White exploits the weakness on e6 created by Black's last move) Qxg3 18.fxg3 when White has a straightforward plan of Ne2-f4, Bf1-h3 and Rh1-e1 to attack the e6 weakness.]

11...Qa5 12.Kb1 Rc8 13.g5 Nd7 14.Bc1 The logic behind this move is not hard to understand.

[Rapport is aiming to prevent the exchange sacrifice on c3 after 14.h4 Nb4 15.a3 Rxc3 16.bxc3 Qxa3 17.cxb4 Ne5 *(17...Bxb4 18.Rd3* wins for White*)* 18.Qh3 *(* and not *18.dxe5?? [After 15...b4 16.Ne2 Qc7 17.Bh3 Nce5 18.dxe5 Qxc2+ 19.Ka1 Nxe5 20.Qe3 Black has no immediate threats and White can consolidate his position next move with Ne2-d4.]

16.a3 Nc6 17.Na2! QUESTION: What is the logic behind this knight retreat? ANSWER: By moving the knight to a2, White has three objectives. The first is to prevent any possible rook sacrifices on the c3-knight. Secondly, White clears the third rank for defensive purposes by the queen and later a rook on h3. Thirdly, the move also discourages Black from advancing 17...b4 as after 18 axb4 Nxb4 19 Nxb4 Bxb4 the exchange of knights nips any possible black attack in the bud. QUESTION: What is the logic behind this knight retreat? ANSWER: By moving the knight to a2, White has three objectives. The first is to prevent any possible rook sacrifices on the c3-knight. Secondly, White clears the third rank for defensive purposes by the queen and later a rook on h3. Thirdly, the move also discourages Black from advancing 17...b4 as after 18 axb4 Nxb4 19 Nxb4 Bxb4 the exchange of knights nips any possible black attack in the bud. **17...Qb6 18.Qd3** Another dual-purpose move. White waits to see if Black will castle kingside. The move also further discourages any intentions of ...b5-b4 as the pawn on a6 will be lost. It is strange that White has most of his pieces on the first and second rank, and yet he holds all the cards as Black has no safe haven for his king.

18...Kd8

[Nikolic cannot be blamed for wanting nothing to do with 18...0-0 19.h5 when White is ready to play g5-g6.]

19.Rh3 The rook lift tells Black's king that even on the queenside, he will not be safe as the rook can now swing to b3 or c3. **19...g6** It is getting harder to find good moves. The point of 19...g6 is to free the king's rook from having to

defend the h- pawn, but now White has the possibility to open up the h-file for his rooks.

[Black can try 19...Qb7 to cover the weak f7-pawn and free b6 for his knight. However, after 20.h5 Ne7 21.Re1 Nb6 22.Rf3 Nf5 23.Rxf5 exf5 24.Qxf5 (Black's exposed king and the weakness of the h7-pawn makes White's exchange sacrifice quite sound) Rb8 25.h6 g6 26.Qf6+ Kc7 27.Bf4 the multiple threats of Qxd6 and Re7+ will force Black to resign.]

20.h5 Rf8

21.hxg6 hxg6 22.Rh7 Ne7 23.Bh3 a5?! Black's best chance was to sit quietly and see how White would try to break through. Weakening further squares with this move just makes his position much harder to hold.

24.Qf3 Ke8 White has built up a very strong position just by playing simple and logical moves. Now to break the black defences, he needs to exchange some pieces.

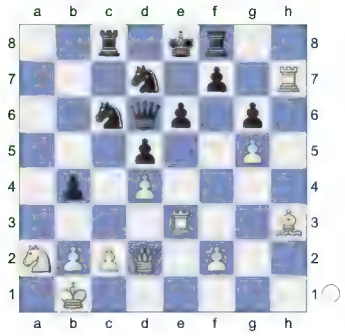
25.Bf4! Bxf4

(Diagram)

26.Qxf4 b4 Played to create some counterplay, but in reality Black ends up with a weak b-pawn. **27.Rd3 Qb8 28.Qd2 Nc6 29.axb4 axb4** Now Black has another weakness on b4 to defend.

30.Re3 Qd6

[After 30...Nb6 31.Bxe6 Nc4 32.Bxc8+ Kd8 33.Qe2 Nxe3 34.fxe3 Kxc8 *(34...Qxc8 35.Qb5* loses either the d5- or b4-pawn) 35.Qf3 another pawn falls.]

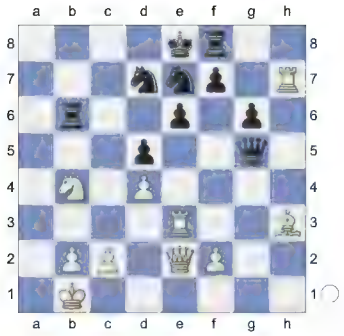


31.Qd3 Ne7 32.Qe2 Rc6 33.Nc1!? Rapport goes for a line where he can play a promising-looking sacrifice.

[However, Black's weaknesses are not going to go away and a quiet way to maintain White's advantage could be 33.Qd2! Rb6 34.Rb3 Nc6 35.Bf1 . White prepares to switch his other rook to the h-file and maintains the possibility of Na2-c1-d3/b3 without any pawn exchanges.]

33...Qf4 34.Nd3 Qxg5 35.Nxb4 Rb6

(Diagram)



36.Bxe6 This is the point of White's previous moves. He breaks through on the e-file with a sacrifice, but leaves his own king vulnerable. **36...Rxb4 37.f4?** The bait that Rapport is dangling before his opponent: "come for my king". **37...Qg1+**

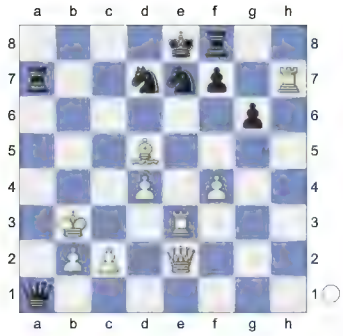
[Black cannot resist the bait. However, he could have turned the tables with the calm 37...Qf6 38.Bxd5 and now and now 38...Kd8 39.Bb3 Rxd4 when White does not have sufficient compensation for the piece.]

38.Ka2 Ra4+ 39.Kb3 Ra7 40.Bxd5 The difference between this position and the one in the notes to Black's 37th move is that the black queen does very little on g1. It does not help in the defence and it needs time to get into an attacking position.

40...Qa1??

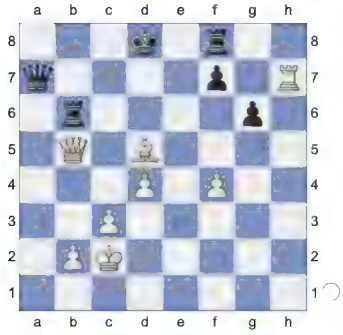
[After 40...Kd8 41.Rxe7 Qxd4 (now ...Nc5+ is threatened so White's next move is forced) 42.Rxd7+ Rxd7 White is down an exchange for a pawn. Normally the two queenside pawns supply enough compensation, but with the king so exposed White is just lost.]

(Diagram)



This loses the game. **41.Rxe7+ Kd8 42.Rxd7+ Rxd7 43.Qb5** We see the big difference. White now has three passed pawns that his king can shelter behind and, more importantly, Black's queen is poorly placed.

43...Qa7 44.c3 Rd6 45.Kc2 Rb6



46.Qc4 Qb8 47.b4 Black is clearly lost. **47...Qxf4 48.Qc5 Qd6 49.Bxf7 Rc6 50.Qa5+ Rc7**

1.d4 Nf6 2.Nc3 d5 3.Bf4 The most logical move. **3...e6!?** Black has a number of reliable options here. For instance 3... a6, 3...c5 or 3...g6. [4.e3 allows 4...Bb4!

A) 4...Bd6 is possible.

A1) Here I found an interesting setup for White. 5.Qf3!? This occurred in a few dozens of games, but mainly among club level players. 0-0 *(5...c5 6.0-0-0 Nc6 7.g4!* with some pressure. *)* 6.g4 c5 7.g5 *(7.Bxd6 Qxd6 8.0-0-0 c4 9.g5 Ne8 10.e4 b5!⇄)*

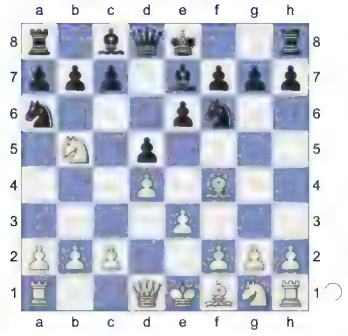
[4.a3 Bd6 5.e3 Bxf4 6.exf4 0-0 7.Nf3 b6∓ We will take a look at this structure in the London System chapters, but in a better version for White, as his knight is misplaced on c3 here.]

4...Na6 With the pawn still on c7 those Nb5 lines are just harmless. **5.e3 Be7**



6.Nf3 0-0 7.h4!? The only try to develop some initiative. Otherwise

Black will execute his plan without any hurdles. In this position, if Black plays a random move, White can start some kingside play. But Black has the powerful

8.Nc3 Qa5! Black starts his own counterplay. White has no time to develop an initiative because the Ne4 threat is too annoying. After casting, the pawn on h4 will be rather misplaced

Black has a very comfortable position and it is White who should think about equality. Generally speaking the move 2. Nc3 is just bad. White has two different setups: 3.Bg5 and Bf4, but against both of them, Black is more than OK. Against 3.Bf4 you should remember to just finish development without pushing c5 too quickly. Black's counterplay is directed against the misplaced knight on c3 via Bb4 or c6, Qa5.

I love it when an opening has consistent themes. Sooner or later everyone will get out of book and need to think for themselves and this is where a good grasp of the plans of a particular opening are worth their weight in gold (or saffron) ! And such is the precarious nature of Black's position that an innocent developing move, which prepares O-O-O, is an outright blunder ! This move takes away the d7-square from the f6-Knight, which is crucial. 18...dxe4 This unnatural looking move was the only way to maintain the balance, but White can simply reply with 19.fxe4 , gambitting the g4 pawn, when play could continue 19...Nxg4 20.Qf3 h5 21.e5 Qc7 22.Ne4 Rd8 23.Bg5 ! when the weakness of Black's dark squares ensure White has some edge and a much easier position to play.
